# ANCIENT SCOTTISH POEMS;

THE

GABERLUNZIE-MAN,

AND

CHRIST'S KIRK ON THE GREEN.

WITH NOTES AND OBSERVATIONS.

BY

JOHN CALLANDER, ESQ. OF CRAIGFORTH.

By strange chanellis, fronteris, and forelandis,
Uncouth coistis, and mony vilsum strandis,
Now goith our barge — G. Douglas.

TO THE HONOURABILET DUO

iola or boso o habita

SIR DAVID DALRYMPLE, BART.

I O R D H A LES,

ONE OF THE SENATORS OF THE COLLEGE

OF JUSTICE. NO. 12.

MY LORD,

IN addresses of this fort, it is almost equally dissicult to avoid the servile tone of flattery, as to suppress the honest feelings of the heart, while we speak to those we love and esteem. Happily for me, the public and private character of Lord Halles will ever secure the author of the following observations from an imputation he dissains, while he gladly embraces the opportunity of presenting this little tract to the person who can best judge, whether an attempt to replace the Etymology of

A

our

## [ ii ]

our ancient language on a rational and stable basis, deserves any attention from the public.

Your Lordship has permitted me to look to you, as the patron and guide of my refearches; and it is a poor return to this condescension I now make, in subscribing myself,

MY LORD,

Your Lordship's much obliged,

And most faithful humble servant,

JO. CALLANDER.

CRAIG-FORTH, April 2.

# INTRODUCTION.

TE have published these little poems, which tradition afcribes to James the Fifth of Scotland, with a few notes, as a specimen of the advantages which Etymology may derive from comparing those called original, and fifter languages, and their various dialects. The science of Etymology has, of late years, fallen into difrepute, rather, I believe, from the ignorance or negligence of fome of its professed admirers, than because it is of little utility or importance to the Republic of Letters. But many attempts, and fometimes with fuccefs, have been made in this kind of investigation. The Dutch has been illustrated by the Frifian and Teutonic; the English by the Anglo-Saxon; and the German has been explained, with much labour and care, by Wachter, and others, from the ancient monuments of the Francs, Goths, and Alamanni. The learned Ihre, Professor at Upfal, A 2

#### INTRODUCTION.

Upfal, has illustrated the ancient language and laws of Sweden, in his Lexicon Swio-Gothicum, a work that will ever be regarded as a noble treasury of Scandinavian antiquities. Men of learning need not be told how much Britain owes to the labours of Hickes, Junius, Spelman, and Lye. These writers have followed, with indefatigable pains, the faint and almost vanishing traces of our ancient language; and have succeeded, as far as it was possible for men to succeed, without the knowledge of those principles which alone form the basis of true Etymology.

Not attending to this great truth, which we have recorded in the scriptures, that the whole race of mankind formed at Babel one large family, which spoke one tongue, they have confidered the different languages now in use all over our globe, as mere arbitrary founds,--names imposed at random by the feveral tribes of mankind, as chance dictated, and bearing no other than a relation of convention to the object meant to be expressed by a particular found. They were ignorant that the primæval language fpoken by Noah and his family, now fubfifts no where, and yet every where; that is to fay, that at the dispersion of the builders of Babel, each hord, or tribe, carried the radical words of the original language into the feveral districts

to which the providence of God conducted them; that these radical words are yet; in a great measure, to be traced in all the different dialects now fpoken by men; and that thefe terms of primary formation are not mere arbitrary founds, but fixed and immutable, bearing the strictest analogy to the things they describe, and used, with very little material variation, by every nation whose tongue we are acquainted with. The proofs of this great etymological truth rife to view, in proportion to the number of languages the refearches of the learned, and the diaries of the traveller, bring to our knowledge; and we hope, by the fmall collection we have been able to form, and which, at fome future period, we propose to lay before the public, to fet the truth of our affertion beyond the reach of cavil. But this is not the place to enter further into the arguments by which we propose to elucidate our hypothesis, and therefore we fhall prefent to the reader a word or two, felected from a vast number of others which might be produced, as a specimen how far our principles are just, and confonant to analogy.

Moon....Goth. mane. Ulph. mana, A. S. mona. Ifl. mana. The primitive is the Oriental mun, enlighten, advertise. Hence Lat. moncre, Engl. monish, admonish. Pers. mah, the moon. The

Turks write it ma. Gael. mana. Gr. unun, and Æol. μανα. Dan. maane. Alam. mano. In the ancient Arabic manat. Hebr. meni, in Isa. 66. ii. and the Americans of Virginia fay manith, and in the Malabar dialect mena, a month. From man the Greeks formed wavia, madness, supposed to be occasioned by the influence of the moon. Hence our maniac, a madman; Menuet, minuet, facred dance, and of very high antiquity, representing the movements of the fun and moon. The primitive mun, pronounced man, fignifies the hand and a fign. Hence mon, men, man, are applied to fun and moon, also to denote every thing relative to figns. Hence Lat. manus, and our month, &c.

Instead of carrying on our refearches into the many other collateral meanings of this word, we shall amuse our readers with another, shewing that the same principle of universality in language prevails in all.

MALADY.—Hebr. malul, evil, chagrin, grief; moul, patience. Perf. mall, evil. Hebr. mulidan, to fuffer. Arab. mel, patience. Celt. mal, bad, corrupt. Hence Lat. malum; Fr. mal; malade; maladerie, an hospital; the malanders, a disease to which horses are subject; malice, malignity.

Lat.

Lat. B. male-aftrofus, ill-starred, as Shakespeare has it, Othello, Act V.

Had the laborious Johnson been better acquainted with the Oriental tongues, or had he even understood the first rudiments of the Northern languages from which the English and Scots derive their origin, his bulky volumes had not presented to us the melancholy truth, That unwearied industry, devoid of settled principles, avails only to add one error to another.

Junius, Skinner, and Lye, though far fuperior to Mr Johnson in their knowledge of the origin of our language, yet, in tracing its foundation, feldom go farther back than the Celtic, and Ulphila's Gothic version of part of the New Testament. Nay, the elegant and learned Ihre tells us plainly, that it is unjust to demand any thing further. But still the question recurs to an inquisitive reader, Whence were these Celtic and Gothic terms formed? Every fmatterer in Etymology knows that the Greek and Latin are modern tongues, when compared to the Oriental and Celtic dialects; and the blundering attempts of Eustathius, the author of the Etymologicon Magnum, Varro, and Festus, prove, beyond a doubt, that these writers were equally ignorant of the true meaning of their mother

mother tongues, and of the originals from whence they were derived. Misled by those blind guides, we find Vossius and Skinner very gravely afferting, that Venus is formed a veniendo, quia omnibus venit; vulgus, a volvendo; malus, from the Greek μελας, black, and μαλακος; manus from munus; and mons, a mountain, a movendo, quia minimè movetur; mare, quod amarum sit; muscle of the body, from mus; and musquet, from the Greek μοσχος, a calf.

It were eafy to fwell this catalogue, which any of our readers may augment at their pleafure from *every* page of *every* Lexicographer,

ancient and modern.

Of all the Nothern dialects none has been more neglected than the Scotch, though it transmits to us many works of genius both in poetry and profe; and also some glossaries, which are not unuseful in pointing out the affinity of the ancient Scotch with its kindred dialects. Of these, the largest is that annexed to Bishop Douglas's version of the Æneid. But it wants many words which actually exist in that translation, and a great many more are so distorted by false derivations, that they only serve to multiply our doubts.

Our language, as it is at prefent spoken by the common people in the Lowlands, and as it

appears

appears in the writings prior to the feventeenth century, furnishes a great many observations, highly deferving the attention of those who wish to be acquainted with the Scandinavian dialects. in general, or the terms used by our ancestors in their jurifprudence and poetry, in particular. Many of those serve materially to illustrate the genius, the manners, and customs of our forefathers. In Scotland, the Old Saxon dialect, which came over with Octa and Nebriffa, the founders of the Northumbrian kingdom, has maintained its ground much longer than in England, and in much greater purity. must be owing to the later cultivation of this part of the island, and its less frequent communication with strangers. In South Britain, the numerous fwarms of Normans and French, who followed William, and the Plantagenets, foon made their language that of the bar, and of the court. At the fame time, the long wars with France, and the extensive possessions of the English on that part of the continent, entirely changed not only the orthography, but also the pronunciation of the original Saxon; nor do we hefitate to fay, what we shall foon endeavour to prove, that we, in Scotland, have preferved the original tongue, while it has been mangled, and almost defaced, by our fouthern neighbours.

It is an undoubted fact, that the original language of this whole Island was the Celtic, now fplit into the feveral dialects of the Gaelic, Welch, and Armoric. In the present Scotch, we see indeed a few traces of this ancient torgue, which the inhabitants left behind them, when they fled for refuge to the mountains of Scotland and Wales; but these are very easily distinguished from the now prevailing language of the country. In like manner we discover to this day, in the German, many marks of the fame original, which were infused into it by the neighbouring Belgæ and Gauls, the posterity of the ancient Celts, by whom this Island was originally peopled. Sufmilch has proved this from the likeness of many German and Armoric Many more examples might be adduced from the Gaelic, in which the radical word is often preserved, though lost in all the dialects of the German language. Of this number is the word febleufe, the root of which is only to be found in the Welch Llaw, the arm, or the hand. From this word was formed Llawes, which has been adopted into all the German dialects, in the fame manner as manica from manus, or the Irish word braccaile, a bracelet, from brac, the arm, and caile, an ornament or covering. The word treten, has also greatly puzzled

puzzled the German etymologists, though it feems naturally derived from the Irish troed, the foot, whence also comes our word tread.

The intimate connection of the Scots with the Teutonic, German, Islandic, and other northern dialects, appears, first, from the similarity of found, and enunciation. This is principally to be remarked in the found of the vowels, which retain the fame uniform tones in the broad Scotch, that they do in the languages above mentioned; whereas the fingular caprice of the English pronunciation has varied and confounded them beyond the comprehenfion of rule. The German guttural pronunciation of ch, g, gh, is quite natural to a Scotchman, who forms the words eight, light, fight, bought, &c. exactly as his northern neighbours, and as the Germans do. How much the English have deviated from this, we may see from the few following examples.

German.	Scots.	English.
Beide,	· Baith,	Both.
Eide,	Aith,	Oath.
Kiste,	Kift,	Chest.
Meiste,	Maist,	Most.
Brennen,	Bren,	Burn.
Gehe,	Gae,	Go, &c.

## 12 INTRODUCTION.

We have to observe, in the second place, that our language contains many words which were never admitted into the English dialect. These, a few excepted, which are derived from the Gaelic, are either pure German, or Scandinavian. We have annexed a few examples from our Scoto-Gothic glossary as a specimen.

Scots.	Gern	ian, &c.
Blate,	Bel.	Blode.
Dech,		Deeg.
Barm, yest,	В.	Barm.
Kail,	G.	Kohl.
Coft,		Koest.
Bikker,	G.	Becher.
Sicker,		Sicher.
Kemp,		Kampfen.
Haus,	G.	Hals.
Mutch,	G.	Mutz.
Skaith,	G.	Schade.
Slough, skin,	В.	Slu.
Spill,	В.	Spillen.
Red, advise,	G.	Rathen.
Lift, fky,	G.	-Luft.
Tig, touch gently,	В.	Ticken.
Forloffen,	G.	Weglaufen.
Bruick,	G.	Branchan.
Reck,		Rauch.
Bouk,	G.	Baugh, the belly.
Fie, cattle,	G.	Vieh.
Kummer,	G.	Kummer, forrow.
Krummy, crooked,	G.	Krumm.

Fremd,

Scots.	Ger	German, &c.	
Fremd,	G.	Fremd, strange.	
Low, flame,	G.	Lohe, flame.	
Leglen,	G.	Leghel, a milking-pail.	
Win,	G.	Wohnen, to dwell.	
Yammer,	G.	Jammern, to complain.	
Keek,	В.	Kieken.	
Girn,	In.	Girnd, desire, anger.	
Muil,	Iſl.	Molld, pulvis.	
Egg,	Ifl.	Egg, acies.	
Awn,	Goth.	Aigan, to possess. Aigin, my own.	
Elden,	Ifl.	Eldur, fire.	
Etter and ettercap,	IA.	Eitur, poison, venom.	
Dill,	Ifl.	Dil, to conceal.	
Ern,	III.	Ernur, large hawk.	

These may suffice, though it were easy to add more examples.

The use of investigating our Scottish dialect, will also appear from its retaining many radical words, which are either totally loft in its fifter languages, or which are no longer enounced in the primitive founds. In this number is gear, or gier, which fignifies dress, furniture, wealth. This word, like the Greek Livis, denoting originally a goat-skin, afterwards a shield, and lastly the facred shield of Minerva, has greatly enlarged its primitive fignification. From the original meaning of the Islandic gera, a sheep-skin, this word came to fignify covering, drefs, ornament,

goods,

goods, riches; cattle being all these to the most ancient nations. Now this word is used by our writers, in all these acceptations; and, though no longer found in the German, yet it is the fruitful mother of many ancient and modern words in that language. From it are. evidently derived hausegeraeth, the Saxon gerada, and the Swedish gerad and gerd, tribute paid both in goods and money; the etymon of which neither Spegel nor Ihre understood:---(Vide Ihre, Lex. in gerd, utgerd). The word graith, in our language fignifying utenfils and furniture of all kinds, is from the fame origin; as also the German gier, a miser; gieren, to defire anxiously; gcirig, covetous; gern, willingly; whence our yearn, with many others of the fame family, the fignification being changed from the object itself to the defire of possessing it, and afterwards enlarged to express any desire in general, in the fame manner as in English the word liquorifb, from liquor, in its primary fense first denoted the defire of drinking, and afterwards any lustful defire. Our word gar, make, prepare, is another word not found at prefent in the German language, in its original meaning. But from it come the words gar, ready; garven, to prepare and curry leather; with a great many more in the old and pure German dialect; and

in the Alammanic garuuin, garuuen, whence garue, ready, prepared; the Islandic giorwer; ready made; and in the ancient Runic Inscriptions, gjarva, kiarva, whence our carve, to cut up, i. e. prepare meat for eating. The Welsh fay kervio, and the Gaels corrbham. Casaubon and Stephanus were certainly driven to the last extremity, while they bring in this word from the Greek eyxega, or rega, a picture. But with these writers, the most extravagant conjectures often supply the want of solid principles.

To mention only one inflance more; our word grean, the muzzle or upper-lip of cattle, is the only root from whence the German grynen, to laugh, can be derived, the etymology of which has given rife to a variety of conjectures. Our girn, and the English grin, are from the fame root.

These few remarks may suffice to shew the great usefulness and importance of investigating the terms and phrases of our ancient language, since these not only tend to elucidate the ancient manners and customs of our remote ancestors, but also throw much light on its sister-dialects of the North; by which we mean all those spoken from the heads of the Rhine, and of the Danube, to the farthest extremities of Scandinavia and Iceland.

### 16 INTRODUCTION.

It is high time that fomething of this kind were attempted to be done, before the prefent English, which has now for many years been the written language of this country, shall banish our Scottish tongue entirely out of the world.

We cannot conclude these cursory remarks without congratulating our readers on the establishment of a Society, which promises to revive a taste for the study of national antiquity. The worthy nobleman to whose truly patriotic spirit it owes its institution, and the gentlemen associated for so laudable a purpose, it is hoped, will look with indulgence on this poor attempt to second their endeavours, in restoring and explaining the ancient language of Scotland.

## GABERLUNZIE-MAN.

Į.

THE pauky auld Carle came o'er the lee,
Wi' mony gude eens and days to mee,
Saying,

Gaberlunzie] This word is compounded of Gaber, Gabber, a Wallet or Bag, and Lunzie, loin, i. e. the man who carries the wallet on his back, an itinerant mechanic, or tinker, who carries in his bag the implements of his trade, and strolls about the country mending pots and kettles. In such disguises as this James V. (as is faid) used to go about the country, and to mingle, unknown, with the meanest of his subjects. These frolicksome excursions often gave birth to little amorous adventures, which our witty Monarch made the subjects of his song, as he was second to none of his age in the sciences of poetry and music.

The root of the word gab is the Celt. cab, fignifying to contain. Hence Scot. gab, the mouth, which contains our food; English gobbet, a morsel; the French gober, to swallow, and goster, the throat. The large barks on Loch-Lomond for

C

carrying wood, are called gaberts. From gab, and gab, come English gabble; and gabbing is used by Douglas for idle talking, Prologue to I. Æn. p. 6. v. 43. Rud. Edit.—and last line of leaf 3. Lond. Edit. 4to, 1553.

## " Quhilk is nae gabbing fouthly, nor no lye."

In the same sense, Isl. gabb; Ludibrium, gabba, to deride; A. Sax. gabban, and many more words of the same import, gaggle, gaffer, and Old Fr. gaber, gabbaffer, to mock; gabatine, mockery; Islandic gamman, drollery; Gal. geuhbeth, falsehood; and gaw, caw, gab, cheating; Old Fr. ganelon, We have collected these words from various lana traitor. guages, as they not only explain the primitive idea of the word gaber, which none of our Etymologists have done, but prove what we shall every moment have occasion to shew, that the radical term once afcertained, throws light on all its derivatives, which are eafily reducible to it, though feattered far distant from each other, among the various dialects used by different nations. To this family belongs Lat. capio, whence our capacity, capture; the Seots cap, a drinking veffel; cab, a measure, mentioned in the Version of the Old Testament; and many more, all including the idea of capacity, or content; as cabin, Belg. kaban; Welsh, cab, caban, all fignifying the same thing; Gr. navarn; Lat. cabana, cabbage, from the form of its top, refembling a bason or large eup, which has much puzzled Junius; Lat. cavus, our cave, and the Fr. and Engl. cabinet.

Lunzie] We have elsewhere observed, with Mr Ruddiman, that the Z, by the old Scots writers, is always used in the beginning of the syllable for the English Y. The reason is, that the figure Z much resembles the Saxon G, which the English often change into Y, as yard from geard; yea from gea;

year from gear, &c. Thus Yetland is by us written Zetland, and ye, year, young; ze, zere, zyng; ranzies, fenzies, for reins, feigns, and the like. This we remark once for all. In other fifter dialects Z has the force of S. Thus Bel. zour, four; zuid, fouth; zon, fun; Slav. zakar, fugar; Ital. zanni, Gr. sasvot, and in the Bar. Gr. Isavot, buffoons, whence our zany.

Lunzie] Lung, loin, lunzie; bene, the thigh bone. Swed. lend, land, the loin. In the Laws of Gothland, cap. 23. 4. Synes lend oc lyndtr; si appareant lumbi et pudenda. They also write it Ljumske; Ihre, in voce. Isl. lend, boh, ledwi. Ger. lenden and lanken, and hence our flank. Welsh, Llavyn; and in Finland, landet, the loin. Ital. longia; Fr. longe; Scot. Jend. Vide Not. S. Kirk. St. From the ancient Goth. Ljumske; the Lat. lumbus; Dan. ljuske; whence our lisk. The primitive is Lat, Let, broad, extended; whence the Gr. TRATUS, and the Latin latus.

Thus the Gaberlunzie-man literally fignifies the man who bears a bag, or wallet, on his back or loins; a pedlar; Scot. a pack-man.

#### STANZA I.

VER. I. Pauky Sly, cunning, Bel. Paiken, to coax or wheedle. Douglas, p. 238, v. 37.

Prattis are repute policie, and perrellus paukis.

Auld] Old Ger. alt, as eald. Isl. aldradur. Dan. Eeld. Scot. eild. Cafaubon brings this from ewaoc, vetus, and Lye from and few, augeo; as if our ancestors had no word to express old age, till they got it from the Greeks. But this is indeed an old wife's tale. The primitive E denotes existence; every thing that lives. Hence Eve is called emphatically, the mother of all living. Lat. eft. Fr. etre, being, effentia, whence our essence, what constitutes the being of that thing. Hence C 2 Hebrew

Hebrew hei, life, and God emphatically; i. e. He auho lives. heie, to live, life itself. Arab. hei-hi, to live, to be glad. In Zend, gueie, foul, life. This word furnishes a remarkable example of the truth of our general principle, explained in the preface, and therefore we hope the reader will allow us to trace it a little further. The aspirate H, in the northern dialects, is changed into W, and Qu, and hence Swed. weet, wight, living animal; Engl. and Scot. wight; Goth, qwick, lively; ewicka, quicken, quick-filver, from its lively motion. In Sued. gwick-filfwer. The Latins used the V, and so formed vita, vivere, vivax, victus, victo, vis, vigor, vigeo, and a thousand more; as also the derivatives we have adopted from that language, vivacity, violent, vivid, &c. Vossius, able to get no further than the Greek, deduces vita from Gorn: but 6105, life; 610, violence, Gianomai, 610m, all come from one primitive, as also Gr. 15, the vis of the Latins, 15706, 15 x va, 15 x v p 25, only by suppressing the aspirate. In the more ancient dialects of Scandinavia, we find the same word denoting the same objects; Teuton. vuith. Isl. vatir. a Sax. vught, vight, all fign. animals, living creatures; and the Alam. quick, quickr. Old German queck. Dan. queg, living, animal, every thing alive. Suab. vich, viech, animal. From the same source we formed wife. Bel. wyf. Swed. wif. Suab. wib, all fignifying woman, mother of a family.

Thus we have followed this word from the remotest East, to the farthest extremities of the West and North. Such coincidences of found and meaning, demonstrate that language is no arbitrary thing, nor etymology that fallacious science it has been called, by those who find it more easy to decide in haste, than to examine at leisure.

Carle The true spelling is karl in all the Scythian dialess, in which it denotes a man, or warrior. The primitive is car—kar, strong. This root we have preserved in the Armenian,

menian, in which car, posse, valere, et carol, potens. Not attending to the universality of language, the learned Ihre did not fee the justness of this Etymology. From kair, kar, the Mefogothic, vair, a man; whence the Lat. vir, vira, a woman, as from the Gothic kas, they formed vas, which Vossius could make nothing of, though he has flung together every passage almost, where this word occurs. From karl are formed the Alamm. karl; Ger. kerl; A. S. ceorl; Isl. karl; L. B. Carolus, karlus. Vid. Cange Gloss. in V. From kerl, Sued. karlklader, men's clothes; karlfmather, and karlfwag, the highway; and in the old Gothic laws karl/bo, man's habitation. The word karl is opposed to gasse, a youth; the former denoting a man of ripe age. We find that of old, in the Gothic, as now with us, karl, and carl, were used to signify people of a low rank, fuch as farmers, mechanics, &c. In the old laws, (ap. Ihre gloss. Vol. I. P. 1033,) karl oc konung, plebs et princeps; and in Gothr. Saga, cap. 86, opter that I karls husi er ej er in conos ranni, oft do we meet in a cottage, what we feek in vain in the palaces of kings. In general, karl is used to fignify a husband; and in Sweden the country-women call their husbands min-karl. In the Swedish tongue the gander is called gas-karl. So in Engl. a carle-cat, is the male of that species. The Anglo-Saxons fay ceorl, for a husband, and ceorlian, to marry.

As this word was commonly used to fignify rustics, the Enlish from it formed churl, churlish. In the A. S. ceorlborin is a man meanly born; ceorlise, a rustic; ceorlise hlas, loaf made of the second flour. In Dutch, kaerle a rustic; whence the Italian phrase, a la carlona, like a rustic, ill-bred. The Welch carl has the same meaning. As karl, all over the north, denotes an elderly man, from it we have formed carling, an old woman of the lowest cast, a word which occurs in all cur poets.

The

Saying, Gudewife, for zour courtesse, Will zee ludge a filly poor man.

The

The Bar. Lat. Carolus, and our Charles, come from the same origin, a name of high antiquity among the Germans, from whom we borrowed the name of the constellation Charles's wain, in Gothic Karlwagn, and in Sax. Carleas wagn; Dan. Karlwagn. This proves the ignorance of those who will have this name given to these stars in honour of Charles the Great, which was in general use many ages before Charlemain was born. The Welch also call this constellation Cart Wyn.

VER. 1. Lee, or lea] An unplowed field, or a field formerly under corn, and afterwards laid down in grass. Primitive la, and le, fignify broad, extended. A. S. lea, leag, leah. Old Ger. la, lo, lohe. Goth. lee, which Ihre explains, locus tempestatibus subductus; whence our lown, calm. In the northern parts of Germany, we have it in many names of places, as Oldesloh, Kartla, Lohagen, &c. vide Grupen Antiq. Van Den Bonnen. P. 556. Isl. logn, and Goth. lugn, sign. calm. The Hebr. lech, denotes a meadow, green, verdure; and the Polish leka is the same, for all these are derived from the same root, la. The Celtic and Gallic las, sign. grass. Welch Llys; bas, Brett. luzavan. Hence Lucern, a species of grass growing abundantly in Switzerland. The Canton of Lucern has its name from this plant, not the plant from it, as the high antiquity of the word proves.

Ver. 3. Gudewife] Properly the mother of a family; Goth. wif, a woman, a married woman. A. S. id. Ger. weif. This by fome has been derived from wifiva, to weave; by others from wif, or havif, a woman's head-drefs,

in the same way as the Swedes say gyrdel and linda, the belt, and girdle for the man and the woman. They also use hatt and hatta, the hat and cap, in the same sense. But the true primitive of this word is E, life, existence; whence Eve, the general mother of mankind; Arab. heih, the female fex, also modesty. This word heih, pronounced hai, gave birth to the ancient formulary of marriage among the Romans, Ubi tu eras Caius (fays the woman) ego ero Caia. None of their writers tell us any thing of the origin of these verba concepta. Caia was in reality a title of honour given to the Roman matrons, answering to that of Thane, used by the Etruscans; whence, it would feem, the Italian Donna came. So Pliny, 1. 8. cap. 48. tells us that Caia Kaikilia, wife to the elder Tarquin, was called in the Hetruscan, Thana Quilis. He and hei, the primitive, with the change of the H into G, the easiest of all transpositions, formed in Greek yaw, whence yeyaw, to generate, yevests, yevos, race, family; yoveus. parent ; your, a wife ; Lat. genus, gigno, gens ; Chin. gin ; Celt. gen, a man; Greenl. kora; Isl. Teut. Dan. kona; Cuen. quin, woman; and our quean and queen; Gaelic, quenast, to marry; Slav. fyena, a woman; and Fr. guenon, the female monkey.

From the same root the Earth, the nourisher of men and animals, is, in every language, called by the same appellation. Chinese chi; Gael. gwe; Zend gweth, enanm; Pehlvi gue, ha, the world; Gael. gwaed, riches, goods produced by the Earth; Celtic, gueth, a poor man, one destitute of these goods, composed of gue, the Earth, and the negative termination th; Ancient Gr. Ala, yala, yea, and yn, the Earth. Hence we can easily trace the origin of the Latin egeo and egenus, which literally signifies to be without ground, to be destitute of the fruits of the Earth. Inops, from the negative

in and ops, the ancient appellative of our common mother, as in that verse of the old poet Accius, Ap. Prisc. Lib. 7.

"Quorum genitor fertur esse ops gentibus."

Plautus Cistellar:

"Itaque me ops opulenta illius avia, imo mater quidem."

How little Vossius and Isidorus knew the real origin of the Latin words, may be seen, apud Voss. Etym. in Egens. Nor has Festus succeeded a whit better, when he says, Egens, relut exgens, cui ne gens quidem sit reliqua; and yet these writers are called Etymologists. We leave them amidst these suite derivations, and proceed to observe, that from this primitive he, life, nourishment, are derived a number of Celtic words, all of the same import; as hei, our hay, food of animals produced by the Earth; heize, barley; hai, trees, a forest; hei, wei, passurage, hunting; he and hai, habitation, literally the place where we live. And as those who abound in goods are, or should be cheerful, hence Gr. yee, rejoice; Chinese, gao, to laugh or be glad; Celt. gae, id. Latin, gavisus, gaudere; the French and our gay, and Scot. gaus.

We have extended our remarks on this word, as it strongly consirms our hypothesis relating to the universality of the primitive language, and the existence of its elementary parts, in every dialect spoken by men, even at this day, from the remotest parts of the East, to the farthest limits of the North and West. In all these languages, we have seen that this root, exceedingly simple in itself, has proved the fruitful mother of many families in every quarter of the globe. These may shew, that the primæval language was not eradicated at Babel, but only split into a great variety of dialects, as the facred Historian informs us; and that the several languages now in use, are so far from being formed by the tribes who

fpeak

The night was cauld, the carle was wat, And down azont the ingle he fat;

My

fpeak them, that they are only branches of that primæval tree, which flourished long before the deluge.

We might easily accumulate more proofs of the truth of our leading principle, were we to add the Hebr. eia, being; Indian he; Pers. aist; Gr. 65; Lat. est; Basq. isan; Celt. es; Teuton. ish, ys; Ital. e; and English is: But these we shall reserve for our Glossary, in compiling of which we have already made some progress.

VER. 4. Silly.—Simple, without guile. In old English fely, felie. So Chaucer, Miller's Tale, and Reve's Tale, v. 992. The Sely Carpenter, and elsewhere felie-man. This is quite different from Sely, fign. holy, from Goth. falig, A. S. fel.

Ver. 5. Cauld.—In this word we have an inflance of our following the original orthography. Ulphila writes calds; A. S. ceald; Ifl. caldur and kulde; Alam. kalt; Dan. kuld; all fignifying cold.

Wat.—Engl. wet; Prim. u, au, water; Ulph. wato; Goth. watn; Pol. wat, humid; A. S. water; Alam. wuaszar; Ger. wasser; Pol. wæda; Gr. Law, which Plato (in Cratylo) allows to be a barbarous word; and he is in the right, for the Greeks had it from the Celtic. Island. udr is water. Hence Goth. wattu-siktig, the dropsy, literally the water-sickness. From the Isl. watska, the English wash. From the same origin comes the Swedish O, an Island, because surrounded with water; Aland, Eland, an Island in the Baltic; Ho-lland, literally a land of waters. There is a district in Normandy called Auge, for the same reason. Eau has the same origin.

We shall add some other coincidences of language here, in support of our general-principle, that the radical words of the first tongue are to be found in dialects spoken by nations, who never had any connection with each other fince the dispersion These are so numerous, and deviate so little both at Babel. from the original found and fense, that it can never be supposed, without the groffest absurdity, to be the effect of chance. Thus the Chinese ho-hu, fignifies water in general, a lake, and hai, the fea. The Tartar Icho, a river in Siberia; and in the fame language, O-mo, a lake, literally a great water, for mo is great. Greek "s, water; whence "w, to rain, "Sur, "Spor, User ; yet Stephanus and Scapula tell us, that User and Vw are radical words, not knowing that no radical word ever confifted of two fyllables. Indeed, we may venture to affert, that no example can be produced of a true radical word having more than one. The public has lately been told, in very pompous terms, that the Greek language is the work of philosophers, complete and perfect in itself. We can most easily show, that this wild affertion is fo far from being true, that no person, but one utterly devoid of all skill in Etymology and the analogy of language, could have hazarded an hypothesis so replete with abfurdity. So far is the Greek tongue from being the work of philosophers, that one of their best philosophers, in one of his (best) dialogues, ingenuously confesses, that he is quite ignorant of the origin of many of the most common words in the language. Such is the word The mentioned above, and a vast number of others, which he, with a true Attic supercilious air, allows to have been borrowed from the Barbarians. True it is, these terms do derive their origin from the Seythians, Thracians, Phrygians, and Celts, whose language exifted many ages before Athens was even a poor village. The very meanest of these people, whom he sligmatifes with the name of Larbarians, could have informed him of the origin of و ۽ اُل ن

Usage, as well as of many others of which he owns himself equally ignorant. After Plato, it is almost needless to observe, that those who were far inferior to this Athenian in the knowledge of language, were still more unfortunate in their explications. Let every page of Hefychius, Eustathius, Suidas, the Etymologicon Magnum, Tzetzes, Harpocation, and the whole herd of their commentators and lexicographers, bear witness to their ignorance, and account for the difgrace into which the useful study of Etymology has, by their means, fallen among those who have rashly concluded, that because nothing good was done by these Scioli in the profession, therefore nothing better could be done. Let us leave this language of yesterday, faid to be formed by philosophers, to the admiration of those profound philosophers, who have told us, that, in certain Islands in the Eastern Ocean, the human race have tails, and whose credulity can digest the account the natives of Attica gave of themselves, pretending that they sprung, like mushrooms, from the very foil on which they dwelt. All thefe pretenders to the highest antiquity, were outdone in Grecian rhodomontade by the Arcadians, who afferted, that they inhabited their mountainous district long before the moon appeared in the heavens.

We hasten to return from a digression, which, we are asraid, many of our learned readers will deem unnecessary; though perhaps others may think, that the hints here thrown out, concerning the Greek tongue, may help to loosen the college-setters of those, who, from their early youth, have been accustomed to look upon nothing as genuine and valuable, unless found in some of the writers of classic authority; nor any thing expressed with elegance and propriety, unless written in Greek. The chronological blunders of those, who are perpetually deriving Scythian, Tartar, and Celtic words, from

a language which did not receive its present form, till many centuries after the others were spoken and cultivated, deserve nothing but contempt.

We have faid that "I wo comes from the primitive Celtic A—U, water, liquid. From the fame origin the Latins formed udus, humidus, humeo, humor, hyems, literally the feason of rains, concerning which, see the nothings of Vossius, in Humor and Hyems. From the same cause the 'Tass, Hyades, derived their name. The primitive au was sometimes pronounced oua; whence Fr. eau, the Lat. aqua, and, with the termination ter, ouater, water.

VER. 6. Azont .- Beyond. A. S. begeond, begeondan. The primitive is ga-ge, to go, and on, forward, or beyond the place one stood in. Ulphila, ganga, to go or walk; whence our gang, gae, and gete, way, as in S. G. it is written ga. From ga, written ba, the Greeks formed 6aw, 6avw, and all their derivatives. The English gad-about is from the same origin; and Ihre explains the S. G. gadda, capita conferre, ut folent novas res molientes. The fame idea is found in the A. S. gaderian, gadran; Bel. gaderin; whence Engl. gather; the Ger. gatten and ehegatten, married pair. Ulphila, Mark 3. V. Fa sah gaiddja sitt mangeei, the people were gathered together. Wherever in the Mæso Gothic we find the prefix ga, it always denotes a gathering, or going together. So gafinthja, comitatur; garanznans, vicini, from razn, a house : gadailans, partaker, from dail, a part; galhaiba, contubernales, from illaibs, bread; Alamm. caleibo, literally Eaters of the fame bread, whence Ihre deduces Fr. compagnon, companion. The Isl. kuon gaudur, married, is from the fame origin, as Wachter rightly observes, though Ihre does not approve of this derivation.

Ver. 6. Ingle.—This word is commonly derived from ignis. In our language it denotes a fire on the hearth, or in kilns

# My dochter's fhouthers he 'gan to clap, And cadgily ranted and fang.

0

kilns and ovens, and is used by Douglas in many places. It is likewise preserved in Cumberland, as Ray informs us.

VER. 7. Clap.—From the Isl. and Goth. klappa, to clap the hands. Dan. klappe. Belg. klappen, cloppen. This word is plainly an onomatapæa, formed from the found made by clapping the hands. Hence too was formed the Greek x22antw, tundere. Whence Junius idly derives our word clap. fpeaking by the fingers was an art well known to the ancient Islanders, who called it clapruner, or letters formed by the motion of the hands, vide Worm. Litt. Run. p. 41. watchmen in Holland carry a wooden instrument with two leaves, which, by clapping together, produce a great noife: whence these night-guardians are called klappermen. In the ancient Alammanick, the tongue of a bell is called clepel: whence our Scots word to clep, or talk idly, repeating the fame thing over and over. The Dutch use the verb klappen. in the fame fense. Goth. klæk, infamy, dishionour; klæknamn, klækord, opprobrious language, nicknames. The ingenious and learned professor Ihre takes klapa, with great probability. from the primitive laf, the hand; Suiogoth. lofa, lofwa; Welch llaw; whence Scot. lufe, the palm of the hand; and the Latin vola; Welch lloffi, dyloffi, to stroke with the hand. Hefych.

To stricke, from the same origin, as also colaphus, and alapa, Bar. Lat. eclassa. In a charter of the year 1285, "Si mulier det ei unum eclassa, non debet bannum." Cange in voce.

VER. 8. Cadgily.—After the manner of the cadgers, or those who carry about goods for fale in cages, by us called creels,

II.

O Wow! quo' he, war I as free,
As first whan I saw this country,
How blythe and mirry wad I be!
And I wad never think lang.

He

creels, on horses backs, who use to sing, in order to beguilte the tediousness of the way. Prim. ca, cad, cap, any thing made for containing, as we have already observed. Some think it comes from the Gael. cadhla I.

Ver. 8. Ranted.—Made a noise. Prim. Hebr. ran, to cry. Hence the Latin rana, a frog, and French grenouille, its diminutive. From hence Gr. γερανος, which Stephanus in Βιδυνια explains πικρος βατραχος; also written γυρινος, γερινος, as Eustathius observes.

#### STANZA II.

VER. I. Wow.—Interjection, from Ger. weh, alas; Isl. warla, with difficulty; Snorro, Tom. 2. P. 102. Sava warla feek. Brætit ut ægre dirui possit; written also valla, verkunna, to have pity; and S. G. warkunna, id. Douglas p. 158.

"Ut on the wandrand spreits quoqu thou cryis."

VER. 3. Blyth.—Glad. A. S. blythe; Belg. bly, id. Ulphila bleiths, pitiful. Lucke 6. 36. Jah Atta ifwara bleiths ift, as your father is merciful. In the A. S. it denotes meek, placid, simple; Isl. bluther, bludar, bland, affable. Hence the A. S. blithsan, bletsian, rejoice; whence our bless. In Douglas it is written blyith.

VER. 5.

He grew canty, and fcho grew fain; But little did her auld minny ken

What

VER. 5. Canty.—Cheerful. Belg. hantig, merry. Een cantiger karl, a gamesome fellow; and, as cheerfulness attends good health, the Cheshire-man says, very cant, God yield you, i. e. very strong and lusty. To cant too, is used for recovering or growing better; Yorkshire, A health to the goodwise canting, recovery after child-bearing. Douglas, cant, merry, cheerful; cant, the language of gypsies, vid. Spelm. in Egyptiani. Gaelic, caint, discourse; canteach, sull of talk. From this Celtic origin comes Lat. cano, to sing; Fr. chanson, chanter, &c. Lat. occento, de qua voce vide Fest. It would have saved Vossius much labour, had he known the true Etymon.

Ver. 5. Fain.—Full of wishes. Douglas writes it fane, glad; Ulphila faginon, id. Isl. feigin; A. S. wægn, fægn. Ulphila thus translates the Angel's salutation of Mary, Luke 1. xxviii. Fagino anstaiaud ahasta, "Rejoice, thou sull of grace;" corresponding exactly to the Gr. zaus; Isl. fognudur, joy.

Ver. 6. Minny—mother. This word belongs to the Infantine Lexicon, being used by very young children to their mothers. The prim. is min, little, beautiful, pleasant, Hence Goth. minna, to love; Alamm. minnon; Fr. mignon, and mignard. From hence mama; Scot. mamy; Fr. maman; Goth. mamma; "vox" (says Ihre) "qua blandientes infantes matrem compellant." Welch mam; Armor. mammaeth, a nurse. Gr. Manna. Avia. Helladius (apud Phot. in Bibl.) informs us, that in ancient Greece the mothers were called  $\pi a \pi \pi a t$ . Confer Cange in Gloss. Graec. who also observes that, in the middle Latinity, the pap was called mamma; and hence comes Fr. mannacle. Pelletier, in Lexi-

What thir flee twa togidder war fayen,
Whan wooing they war fae thrang.

#### III.

And O! quo'he, ann zee war as black, As evir the crown o' your daddy's hat,

Tis

co Brit. p. 570, justly observes, "Ce mot est peutetre un des "plus anciens du monde, car c'est apres les cris, la premiere "ouverture de la bouche du petit ensant, a qui la nature dicte, qu'il a besoin de nourriture, qu'il ne peut recevoir que de la mammelle, de celle qui lui a donne la vie." The Hebr. em signifies mother. From the Prim. min, little, is formed the Lat. minor, (the or being the mark of comparison), and minimus. When we come to the Eighth Stanza of this Ballad, we shall explain the connection betwixt this and winsome.

VER. 2. Wooing.—A. S. wogere, lover, whence our wooer. It has been thought, and with probability, that this word was formed from the cooing of the dove, as Douglas fays, p. 404. 27.

I mene our awin native bird, gentil Dow, Singand on hir kynde, *I come hidder to woo*, So prikking her grene curage for to crowde In amorus voce, and *wowar* foundis lowde.

This is, at least, a better conjecture than that of Junius, who deduces it from wee. The A. S. wegan, sign. to marry.

#### STANZA III.

VER. 2. Daddy.—Engl. dad, father. The prim. is da, di, every thing elevated in dignity and power<sub>2</sub> and being denote

formed by a strong pressure of the tongue against the teeth, it comes to be a part of the child's first language, addressing him whom he is taught to look up to with reverence. Hence this radical word has given rise, in every language, to those which denote elevation. Such is the Celtic Di, God, the Supreme Being; dun, a hill; dome, dum, din, a judge. Hence too the Gr. Supasus, Surauss, power; and the Lat. dominus, dominatio; the Greek Sauae, to tame, i. e. bring into subjection; our dame, mistress.

In many dialects the d is changed into t, and most often, in those spoken in the North, though we also find it in the West, as in the Lat. totus, totality; Fr. tasser, entasser, to heap up. Ta, tata, father. From the idea of fatherly protection, were formed di, ti, prince or protector; and the Lattego, testum, whence the Engl. protect, pro-tection; and many more.

We shall here collect a few more infantine words, plainly derived from the structure of the vocal organs, and the most easy movements of their feveral parts. Such are, pappa, mamma, dad, atta: Fr. bon; bobo, bibbi, puppet; Fr. poupee; bus. Thus Cato, de Lib. Educand. talking of this part of language, "cum "cibum et potum, buas et papas, vocent; matremq; maman, " patrem, papam." We may add to these, pap, baba, and even the ancient story of the word bek, pronounced by two children educated by Pfammytichus king of Egypt, remote from all commerce with mankind, as Herodotus informs us. Confer. President de Brosse's Mechanism du Language, tom. 1. p. 231. fegg. To evince the univerfality of this truth, we might cite the Hebr. phe, and Chald. phum, mouth. Whence the fari of the Latins; the Hebr. phar, or par, ornament. Whence Latin paro, and Fr. parer, parure; Hebr. pulful, herbage. Whence the Lat. puls; the Gr. Coa, and Coona, to feed; Copa, meat; Lat. voro, devoro, and our devour;

# 'Tis I wad lay thee be me bak, And awa wi' thee I'd gang.

And

Catos, little; and the Ital. bambino; the Hebr. bag, nourishment, from the Prim. bek; from which is derived the Teuton. and Ger. becken, a baker; Babble, Ger. babbelen.

But how happen all these coincidencies? To this vain question we will only answer, in the words of the learned President last quoted, "L' homme parle, parceque Dieu l'a "creé etre parlant." The vocal organs are constructed alike in every tribe of mankind, and all children pronounce those sounds first, which are most easily formed by the motions of these wonderful instruments. The sounds they vary, and multiply, in proportion as practice makes them better acquainted with the organic powers, and more ready in the application of them. For the same reason, too, we find all the radical words in every tongue we are acquainted with, to be monosyllables, these being the first essays of man in using the vocal organs.

To the list of languages, in which dad, tat, fignifies father, let us add the Gael. daid; Welch dad; Cornish tad; and Armorick tat.

Verse 4. Awa] Engl. away; A. S. an wage, from wag, a way. Douglass, p. 124. l. 4.

"And the felf hour mycht haif tane us aqua."

Gang] From gae, to go. This is an inflance where our fouthern neighbours have vitiated the true old pronounciation. The primitive letter G, being a guttural, is therefore painted in all the ancient alphabets like the neck of a camel, or with a remarkable *bending* in its figure, as in the Gr.  $\Gamma$ ; the Hebr.

Hebr. 1. Hence it necessarily denotes every thing in the form of canal or throat, and every thing that runs or passes swiftly. We hope to produce many examples of this in our Scoto-Gothic Glossary. Mean while, we only observe the likeness in the following instances. Ulphila fays gaggan, to go; and gagg, a street or road. Though this word occurs very often in the Codex Argenteus; yet Junius has omitted it in his learned glosfary on Ulphila's version of the Gospels. Ger. gechen; Belg. gaen; Dan. gaa. From hence comes the Lat. eo, without the G; and the Gr. x-1211. Plato (in Cratylo, P. 281, Fic.) owns that x-lev is a barbaric term. The other corresponding word &w, is undoubtedly Celtic; and here Vosfius (in ea) stops, being quite ignorant of the primitive word, and that no true radical term has ever more than one fyllable. Ihre's deep refearches into ancient languages enabled him to discover this truth; "Lingua" (fays he, Gloss. Vol. I. Col. 646.) " quo antiquior, eo monofyllabicarum vocum ditior "est." Pity this very ingenious Etymologist had not carried this observation more into practice. The Armor. for ga, fay kea, ker. The Goths call rogation days, gandagar; literally, walking days, from the processions that then were usually made round the corn-fields, during the darkness of popery. justly terms these ambarvalia christiana. Rolf, the first who led the Scandinavians into Normandy, being a man of great stature, could find no horse strong enough to carry him. Being therefore always obliged to march on foot, from that circumstance he was furnamed Ganga Hrolf, by the Islandic historians. Gangare, in the old Gothic laws, is " equus tolu-" tarius qui tolutim incedit." In one of the referipts of King Magnus, anno. 1345, the bridegroom fends to his future spouse, en gangare sadul, betzil, armakapo, och hata, a horse, faddle, bridle, cloak, and head-drefs. Money of allowed currency is called gangle; and gangjarn, hinges; and hence E 3 the

And O! quo' sho, ann I war as whyte As er the fnaw lay on the dyke,

ľď

the Fr. gond. Perhaps our old word ganze, in Douglass, a dart, or arrow, comes from the Prim. ga, p. 461. 48.

" So thyk the ganzies and the flanys flew."

And p. 343. 46.

" Als fwift as ganze or fedderit arrow fleis."

VER. 6. Snaw] Snow; another instance of the English perversion of our ancient language. Ulph. snaiws; A. S. fnaw; Allam. fne; Isl. fnior; Swed. fnio; Prim. aw; water, ever foft and flowing gently. Hence Gr. raver; Hefich. vauer, 'peer, Cpurer, fluit, manat; A. S. sniwan, to fnow. How ridiculous are Junius, and the other lexicographers, who deduce our word from the Greek? Surely our ancestors had seen snow long before they saw Greece. The ancient Goths were fond of prefixing f to many of their words; and hence the Prim. aw, water, became with them fnaw; Sclavon. fneg; Pol. fnieg. When the f is taken away, it became niv with the Latins, and neve with the Italians; so the Gr. vipas, denotes a thick falling snow.

This has been prepofteroufly derived from Telyos, a wall. The true primitive is the Celtic digh, folid, strong, powerful; applied particularly to every rampart, whether to keep off enemies, beasts, or inundations. Hence the Telyos of the Greeks; Ger. teich; Belg. dyke; French digue; the Ger. dick, folid; whence our word thick. The other German word dight, sign. folid, connected; A. S. dic, rampart; dician, gedician, to build a rampart. Hence our

ditch ;

I'd cleid me braw and lady like,
And awa wi' thee Ild gang.

IV.

ditch; A. S. diker, a ditcher; the Gr. Sinerra, a spade; Sinerras, a digger, one who uses the spade.

VER. 7. Cleid] Engl. clothe. Our claith is the true pronounciation, not the English cloath, our word being immediately formed from the Goth. klaede, clothing, and klaeda, to clothe. Prim. kla—kle, covering; A. S. clath. Observe, that the ancient Scandinavians said, Eff par klæder, a pair of garments, for a complete suit of clothes; the one formed the breeches, and the troja, or vest, the other. The old Teutonic Version of the Gospels (app. Ihre, vol. 1. col. 1076.) Luke xv. ver. 22. "Hemtin mik fram thet basta par klæder jak "hafwer;" Bring forth a pair of the best garments I have. Chron. Ryth. p. 121. "Est hosweligt ors, ok klæder ett "par;" An excellent horse, and a pair of garments.

The Islanders pronounce it klade; the Germans kleide, arm; arm klade, a scarf worn on the arm; jaga klader, a monk's gown.

Braw] Handsomely, elegantly. Prim. Celt. bra, strength, might, elegance; every thing having these qualities. Goth. braf, honest; Scot. bravery, sumptuous apparel. In the Bas—Bret. braw, arm, id. Hence the Fr. and our brave; Ital. bravo. Hence too the Goth. brage, a hero, and Brage, the name of one of the companions of Odid, of whom Edda, Agietus ad Spæki, &c. He was very elegant, and wise, and a great poet; so that from him all persons, both men and women, who excelled in these arts, were called Bragmadur. From the same source the bragebækare, or large cup, drunk off by the new King, just before he assended

IV.

Between the twa was made a plot, They raife a wee befor the cock,

And

fcended the throne, while he folemnly vowed to atchieve fome great deed in arms, of which many inftances occur in Snorro, and the other historians of the North. This ceremony gave rife to the usage, according to which the knights, in ancient times, made vows of the same kind at their solemn banquets. The learned and accurate Annalist, to whom Scotland owes the elucidation of many historical difficulties, observes (ad an. 1306) that Edward made a vow after this form, by which he bound himself to punish Robert Bruce.—See also St Palaye Mem. De l'ancienne cheval. tom. 1. p. 184, and 244.

#### STANZA IV.

VER. 1. Twa] Ger. twee; A. S. twa; Welch dau, dwy; Armor. du; Cimber. tu; Sued. twa; Celt. id. Whence Gr. Sve, and Lat. duo. Hence our twin; Dan. twilninger; Alam. zuinlinge; A. S. getwinn. Douglas calls sheep of two years old twinleris, p. 130, v. 34.

" Fyfe twinleris Britnyt he, as was the gyis."

Confer page 202, ver. 16. as being two winters, i. e. two years old; Ulphila twai, two. Hence to twinne, used both in Scotland

And wylily they shot the lock,

And fast to the bent ar they gane.

Up-

Scotland and England to fignify, to feparate, divide into two parts. Chaucer, 1. 518.

" The life out of her body for to twyne."

Pard. Prol. 167:

"' Out of that place."

VER. 2. Wee] Little. This is an infantine word, denoting every thing little. Ger. wenig. Hence our wean, i. e. wee-ane, a little child. Of the fame family, as I conjecture, is the word weaena, which the learned Lord Hailes shewed me in an English book, where it denoted a fimpleton, or unlearned man; little of understanding, as the Dutch still say, Klein van verstanda.

VER. 3. Wylily] Cunningly. A. S. wile, whence our guile, the W being often changed for G. Belg. gylen, and in the Lower Germany they fay begigeln, to beguile. Dan. adwilla, to deceive. Isl. viel, deception; hence Willurunnur, Runæ deceptrices. Sax. Chron. ad an. 1128, Thurh his micele wiles, "Through his many wiles, or tricks." In a church-yard in Scotland are the following lines on the tombfone of a Magistrate:

Under-

<sup>&</sup>quot;He was baith wyss and wyly,

<sup>&</sup>quot; For which the town made him a bailey."

Upon the morn the auld wyf raife,
And at her leifure pat on her claife,
Syne to the fervants bed fcho gaes,
To fpeir for the filly poor man.

V.

Under-waistcoat is by Douglas called the wylie-coat, p. 201, v. 40.

" In doubill garment cled, and wyle-cot."

As this inner-vest (says Ruddiman) cunningly, or hiddenly, keeps us warm.

VER. 4. Bent] Properly a marshy place, producing the coarse grass called bent, from its small limber stalk easily bent, says Minshew; but may it not be rather derived from ben, a hill, as this coarse grass is common on the sides of hills, and on the rising ground on the sea-shore, or sandy hillocks, in Scotland? In Gaelic ban signifies wild or waste ground, on which this species of grass is generally found.

Ver. 6. Claise Vide Note to Stanza III. Ver. 7. Ver. 7. Syne Afterwards, then. Douglas writes sen, p. 100, v. 1.

"Sen the deceis of my forry husband." Sensyne, since that time, id. p. 44, v. 26.

"Senfyne has ever mair "Backwart of grekis the hope went."

Teuten. G. fyn and findes, whence our fince. Alam. ejnzen; and Otfrid, Lib. 3. cap. 26. findes.

Joh tharbetin thes findes, Their heiminges.

« And

"And were deprived of their country from that time." Ulphila, Luke 17. v. 4. Sintham. Ubi confer Jun. Suio-Goth. nagansinn, and more shortly nansin; nanstin, sometimes; hwatsin, how often; sinnam of sinnom, by degrees, gradually. Whence the Lat. sensim, understood by none of their Lexicographers.

As particles in general form a difficult part of language, a philosophical enquiry into the origin of these might highly deserve the attention of the critic. It is thought that many of them, being monosillables, will be found to be radical words. Such are, Engl. if; Scot. giff; A. S. gif, gyf; Gr. 21, enlarged by compassition to 21πε2, and 21πε2; and many others might be named. To derive if from giff, as some have done, is ridiculous, and shews that some writers will rather adopt the most suite conjectures, than ingeniously confess their ignorance. The limits we have prescrib'd ourselves in these notes, do not permit us to enlarge on this at present.

VER. 8. Speir] Prim. is pa-fa, the mouth. speech; Germ. spuren, to enquire. The learned and ingenious Mr Gebelin, to whom we confess ourselves indebted for the only rational principles of Etymology we have feen, in his Monde Primitive, tom. 5. p. 790, has shewn, that the P, in all the ancient alphabets, figures the mouth opened, viewed in profile; and, by necessary consequence, all the actions of that organ, as speaking, eating, drinking, &c. And this posi tion he has evinced to demonstration, by innumerable examples. We confine ourfelves here to what regards the word fpeir. We have already observed, that the general meaning relates to speech; Lat. fari; Fr. pa-rler, fa-ribole, vain and idle talking. Afterwards it was used in the North for wifdom, prudence. Hence Isl. spakr, a wise man; in Goth. spak, the same; spakum bonda, a prudent man; Isl. spakmæle, the fayings of the wife; Alam. spaker, and speke, wisdom. F Tatian,

V.

She gaed to the bed whar the beggar lay, The ftrae was cauld, he was away;

She

Tatian, cap. 12. Fol spahidu, full of wisdom. Isl. speja, to speculate, or consider. In restricting the general meaning, it came to signify only, to divine, prophecy. Isl. spa, to prophecy; whence our spae, to foretell suture events. From this the Latins have formed specio, auspex, aruspex, and the like. Douglas, p. 101. 50:

- "O welaway, of spaimen and divines
- "The blind myndis."

And p. 80. 26:

" The harpie Celena "Spais unto us an fereful takin of wo."

The Voluspa, containing the theology of the Scandinavians, has its name from thence, and literally fignifies a poem artfully contrived, or with much wisdom, compounded of wola, wool, art, and spa, poem or speech. Hence Isl. wolundr, artissicer; and wolundarhus, a labyrinth.

#### STANZA V.

VER. 2. Strae] Engl. straw; A. S. streew, strew; Al. kistreiew, to straw; Mæso-Goth. strawan; A. S. streawian. The chamber surn shed in Mark xiv: 15. is called in Gr. estrapera, and by Ulphila gastrawith. The ancients not only

Scho clapt her hands, cry'd, dulefu-day!

For fome o' our gier will be gane.

Sume

only filled their beds with straw, but on folemn days the floors were covered with it; and we remember to have read, that Queen Elizabeth's state-rooms were strawed with green grass or hay. It was also a part of the holding of several manors, both in England and Scotland, to furnish straw for the Royal apartments, when the King made a progress. In the Scandinavian writings, the straw used at the festival of Yule, was called Iulhalm, vide Ihre in V. So in Olaf's Trygwas. Saga, p. 1. p. 204. it is faid of Thorleif, Seeft han nither utarliga utarfiga i halmin, He sat down on the furthest part of the straw. Snorro tells us, tom. 1. p. 403. that when Olaf, fon of Harald, came to fee-his mother, Tweir karlar, baro halmin i golfid, Two servants brought straw into the apartments; and, in the History of Alf, p. 41. one of the Princes in the Court of King Hior, Their voru i halminum nidur a golfinu, They fat on the ground on the straw. It would appear, that this was commonly done in winter; for the fame reason we use carpets to keep the feet warm: For it is remarked of Olaf Kyrra, that he had his apartments covered with straw, winter and summer; han let giora stragolff um vetur, sem um sumur. The same mode was observed in France. In a charter of the year 1271 (ap. Cange in Jonchare) "Item debet et tenetur dictus Raulinus pro prædictis, Jon-" chare domum D. Episcopi quando necesse est." Vide id. in Junkus. Confer Spelm. in Strastura.

VER. 4. Gier, or gear Clothes, furniture, riches. To what has been faid in the preface of this word, and in the motes to Stan. 4. ver. 5. we have little to add. The prim. is

Sume ran to coffers, and fume to kifts, But nought was flown that cou'd be mift;

She

Ge; Gr. yn, the earth; fource of all our riches. Hence used by the Scots indiscriminately, to signify every thing we value, goods, tools, apparel, armour. So Douglass says, graithed in his gear, armed at all points. Gear, in some of our old poets, is used for the membra viri genitalia. A. S. gyrian, to clothe. Cædmon, 23. 7. gyred wædum, put on his weeds or garments.

VER. 5. Kifts | Engl. chefts. The primitive of this is found in the form of the letter c, (for which the northern dialects generally use the k) fignifying every hollow, like the hollow of the hand; as cavus, cavea; Gr. noing; cavity, cave, &c. This obtains in every language, as we shall prove at fome length in our Scoto-Gothic Glosfary. With respect to this word, we formed it from Goth. kifta, a chest; whence kistafæ, precious goods which are kept in kists; Isl. kistu; Welch cift, cyft; Ger. kasten; Fr. caisse; Gr. xistn; Lat. cifta, the origin of which simple word is not to be found in the many Greek and Latin Dictionaries we have. Hence too cisterna, our cistern. The etymon of this word by Festus is too curious to be omitted; cisterna dicta est, quod cis inest infra terram. Such are the reveries produced by ignorance of first principles. We add further, that the Persians call a chest, or kist, castr. In the north it signifies a prison where thieves are confined; teif kista. The Latins used a similar phrase, In arcam conjici, vid. Cic. pro Milone, cap. 22. The Islanders call a coffin leikistu, as we also do, and the Anglo-Luke 7. 14. Tha cyfle athran, He touched the coffin.

She dancid her lane, cry'd, Praise be bleft!

I have ludg'd a leil poor man.

VI.

VER. 6. Stown Engl. flolen; Prim. fill, tacitly, hiddenly; Goth. flilan; A. S. flelan; Swed. fliala, to steal; Tueton. fille, quiet, secret. Hence our Scots flowth, stealing, which we find applied to amorous pleasures, as being secret, by Douglass, p. 402. 52.

" Hys mery flowth, and pastyme lait zistrene."

So the Latins, Veneris furta. Stiala is used by the Northerns in the same sense as we say, to steal away; so stiala sig bort; and komma stialandes uppa en, to come privately upon one. They also use it to denote hiding, concealing, the meaning of the primitive. Hist. Alex. M. Apud Ihre, v. 2. 267.

Jordan kan eij gullit fwa stiala. The earth cannot so hide the gold.

Ulphila's hliftus fignifies a thief, from hliftan, to hide. Hence our Scots to lift, to steal. From the primitive still is the Gr. 521225321, to hide; and the Lat. celo, the st being often added in the Scythian words; as strafwa, for rofwa, spoliare; stracha, for racka, tendere, &c. The Islandic stiarlare is a thief, a stealer; and hence the Latin stellio, stellionatus, stellatura, occult fraud, as the ingenious Ihre has justly observed, and thereby unfolded the true etymon, about which all the Latin Lexicographers were puzzled.

VER. 7. Praise be blest God be praised. This is a common form still in Scotland with such as, from reverence, decline to use the facred name.

VER.

#### VI.

Since nathing's awa, as we can learn, The kirn's to kirn, and milk to earn,

Gae

VER. 8. Leil] Loyal, honest, truly. Dougl. p. 86. 46.

"The ceremonies leil, i. e. holy ceremonies."

And p. 43. 20.

"---by the faith unfylit, and the lele lawte."

#### STANZA VI.

VER. 1. Awa] Engl. away. Angl. Sax. an wege, from wag, a way. Dougl. p. 124. 4.

" And the felf hour mycht haif tane us awa."

VER. 2. Kirn] Churn. This is the same with the Ger. and Scot. quern, a hand-mill for grinding corn, butter being produced by the continued action of turning round. In the A. S. quearn, or cwyrn; Dan. handquern, hand-mill. The prim. is gur, kyr, any thing circular; Arab. kur, a round tower; ma-kur, a turban; Hebr. gur, to assemble; and ha-gur, a belt; Island. gyrta; whence our girth, and the verb to gird. Hence too Gr. yup-16; Lat. gyrus, and girare. The Fr. ceinture, and our girdle are from the same root, and the Gaelic cor, whence cord; Ger. gurt, a belt; and gurten, to gird about; Welch gwyr, bent; Bas. Bret. gourisa, to begird; Basq. gur, around; girata, to roll about; gurcilla, chariot wheel; guiroa, the seasons, i. e. the revolutions of the heavens. The Gr. xuples, vaulted, and xipxos, round, have the same origin; also zyosa, a place of public assembly where

# Gae butt the house, lass, and waken my bairn, And bid her come quickly ben.

The

the people flood round the orators. In Varro we find the ancient Latin guro, to make round; and the common words, circus, circulus, circum, circuitus, and many more, all deduced from the fame root. The gier-falcon has its name from the circular flight he makes; and the Ger. kurbis, a gourd; and the Lat. cu-cur-bita, cucumber; Gr. Γορυγος, a quiver. It were easy to add ten times this number of words, all taking their origin from gyr; but we only further mention gir, the Scots name for the hoop the boys drive before them with a rod along the streets.

Our pronounciation of this word kirn, is more correct than that of the English; for the Gothic verb is kernais, to churn; Fenn. kirnun; and the churn itself is called in Esshonia kirnu, and in Iceland kernuask. The round Tower of Stockholm is called Keerna by the ancient writers, as the learned Ihre informs us (Gloss. vol. 2. p. 1057.) to which we only add, that the Gr. zapraw miscoo, has the same origin, though it has not been observed by Junius, or any other.

VER. 2. Earn] To thicken or curdle milk. Ger. gerinnan, to coagulate. The root is only found in the Armorick, in which language go fign. fermentation; goi, to ferment. Hence the Goth. gora, effervescere; drinkat gores, the ale ferments, or works; Ger. gærung, effervescence; and the Swed. gorning, whence our earning, rennet.

VER. 3. Butt] From Belg. buyten, without; opposed to binnen, within. Thus Douglas uses it, p. 123. 40.

- " In furious flambe kendlit, and birnand fchire,
- " Spredant fra thak to thak, baith butt and ben."

The

The primitive is found in the Goth .bur-bo, habitation; Ancient Goth. bua-bu, to inhabit; whence bur, and Isl. byr and bycht, habitation. A. S. bur, a chamber; and Ray says, that in the North of England it is still pronounced boor, and bor. Swed. burtont, sloor of the house; iung frubur, apartment where the daughters of the family sleep; Bupior, cinnua, habitation. From the Goth. byr, we form byre, a cow-house. This primitive is also found in the Hebr. beth, and Pers. bat, a house; Teuton. bod, whence the Engl. abode; Gael. bruth, bottega, a shop; Fr. boutique. That part of Edinburgh where the merchants have their shops, is called Lucken-booths, rather Lockenboths, from the booths, or shops, being locked up at night.

VER. 3. Waken To a-wake. Prim. wak, watch. Hence Ulph. vakan, to awaken; vaknandans, vigilantes. the Nothern dialects use this word. Goth. and Isl. waka; Ger. watchten; Alam. uuachan. The Goths say also wakna, to watch; Isl. wekia, watch, and Goth. wabt, id. Ulphila fays, quahtus; Alam. uuaht; B. Lat. quadta, cap. 3. an. 813. c. 34. "Si quis wactam aut wardam demiserit." Vide Cange in Watta. Hence in our old Scots Laws, to watch and ward, duty of citizens to defend their town, and for which they often obtained fingular privileges from the Crown. Wastar, a watchman: It fignifies also to beware; Wacta fig for en, to be upon one's guard. From this, too, come the Lat. vigilo, vigilium; the Fr. guetter, and garder, our guard. The waiting a dead body before interment, is called in Sued. wahftuga. Hence our phrase to wake a corpse, and leikwake, compounded of the two words Goth. leik, a dead body, and wakna, to watch.

Bairn] Child. Prim. Gael. bar; A. S. bearn; Alam. barn. Hence comes Gaelic beirn, and Goth. baera, both fignifying to bear. We find our primitive in the Hebr. Bar, Creator,

The fervant gaed quhar the dochter lay, The fheits war cauld, fcho was away,

And

Creator, and Bara, creare. In the fragment of Sanchoniathon, Beruth, or Berut, is called the spouse of El-ion, or the Most High, because God alone creates; and hence allegorically Creation is called the spouse of God. In the Syriac, bar signifies a son. We say bairn-team, brood of children, from the Saxon team, progeny; hence a teeming-woman. In our old poets, bairn is often used to signify a sull-grown man. So Douglas, p. 244. 33.

"Cum furth quhat e'er thou be, berne bald."

#### And elfewhere:

--- " And that awfull berne,

" Berying schaftis fedderit with plumes of the erne."

The same author uses barnage for an army, or troop of warriors; but Mr Ruddiman was far mistaken in deriving it from the Lat. baro. We find the ancient English poets used child in the same sense. See the ballad of the Child of Elle, in Percy's Collection, vol. 1. page 107.

- " And yonder lives the childe of Elle,
- " A young and comely knight."

Vide ibid. p. 44. where two knights are called children.

VER. 4. Ben] The opposite of butt, in the former verse, fignifying the inner-part of the house. From the Dutch binnen, within, opposed to buyten, without; A. S. buta and binnen, butt and ben.

VER. 5. Gaed] Vide Note to Stanza I. Ver. 6.

Dochter]

And fast to her gudewife 'gan fay, Scho's aff wi' the Gaberlunzie-man.

#### VII.

O fy gar ride, and fy gar rin, And haste ye find these traiters agen:

For

Dochter] Engl. daughter; Ulph. dauhtar. We here observe how closely our spelling agrees with the Anglo-Saxon, in which it is wrote dohter, dohter, and dohtur; Alam. dohtor, dohter, and thohter; Belg. dochter. The Gr. Ouy at the has a manifest affinity to all these.

VER. 6. Cauld] Another inflance of our care in following the original orthography. Ulphila writes, calds; A S. ceald; Ifl. kaldur and kulde; Alam. kalt; Dan. kuld; all fignifying cold.

VER. 7. Faft] Quick or swift. Prim. Welch feft, agile, hasty. This is a quite different word from the English faft, fixed or stable, which comes from the Mxso-Gothic fastan, to keep or hold fast.

'Gan] For gan, began; and thus Douglas elsewhere uses it, as well as our more ancient poets.

VER. 8. Aff ] Off; but all the other Northern dialces write this word with an a. Ulph. af; Dan. aff; Belg. af. The Lat. ab, and the Gr.  $a\pi$ , are quite fimilar, especially when we obscrive that the Greek word, before another beginning with an aspirate, is written ag.

#### STANZA VII.

VER. 1. Fy] Fy upon. Prim. Welch fy, and hei, whence hinds, abominable; Isl. fae, rottenness; Belg. foey; hence

none

hence the Lat. vah, Ital. vah, Fr. fi. The Gr. vev is by the Grammarians called pays of Triasius, Vox ejus qui se indigna pati conqueritur. In old English this particle always denotes aversion. Chaucer, La. Prol. v. 80.

" Of fuch cursed stories I say fie."

And N. P. T. v. 73.

" Fie stinking swine! fie foul mote the befall."

From hence the Scots formed Fyle, to foul; and the Engl. Defile. We also say Fych, on feeling a bad smell, or seeing any dirty object, from the Celt. cach, kakoa, and caffo, stinking. Hence our kakie, ventrem exonerare. From this origin, too, comes the old French appellation cagots, cacous, cakets, given to lepers, who being confidered as abominable, were shut out from all society in the middle ages. These miserable wretches were found in great numbers about the 12th and 14th centuries, spread over Gascony, Bearn, and the two Navarres, on both fides the Pyrenean mountains. These were not allowed to traffick with their fellow citizens; had a feparate door to enter into the churches, and a holy water-font, which they only used; were forbid the use of arms; nay, fuch was the univerfal horror of mankind against them, that the States of Berne, anno 1460, applied for an order to prohibit their walking the streets bare-footed, lest' others might catch the infection, and to oblige them to wear on their garments the figure of a goofe's foot, which, it would appear, they had neglected to do for many years past. In the ancient For. de Navarre, compiled about the year 1074, we see them called Gaffos and Cakets at Bourdeaux. We find, among the Laws of the Dukes of Brittany, anno 1474 and 1475, orders given, that

none of the Cacofi-caquets, or Cacos, should appear without a bit of red cloth fewed on the outer-garment. They were forbid even to cultivate any land but their gardens, and were confined to the fingle trade of carpenters. Bullet (Diction. Celt.) gives the following account of the rife of the public hatred against these poor people: " Cacous (says he) Nom que les Bas Brettons donnent par injure aux Cordiers et aux Tonneliers, contre lesquelles le menu peuple est si prevenu, qu'ils ont besoign de l'autorité du Parlement de Bretagne pour avoir le sepulture, et la liberté de faire les fonctions du Christianisme avec les autres, parce qu'ils sont crus sans raison, descendre des Juiss dispersès apres la ruine de Jerusalem, et qu'ils passent pour lepreux de race.-Les Cacous sont nommés cacqueux dans un arret du Parlement du Bretagne." Here we have a people, living in the most deplorable state of flavery, from age to age, like the Gibeonites subjected to the Jews, and treated in the fame manner as the Gauls were, after being conquered by the ancient Franks of Germany; the very name they went by, implying the most rooted aversion, though nobody ever gave any account of the reason of this appellation; for the frivolous differtations of Marca and Venuti leave us quite in the dark as to this, as well as to the causes of this extraordinary hatred against a devoted race from age to age. We therefore adopt the account of it given by the learned and most ingenious Gebelin, (Monde Primitif, tom. 5. p. 247) that they were the fcattered remains of the original inhabitants of Gascony and Lower Brittany, who, being conquered by those now called Bretons, and the Cantabri, who invaded Brittany and Berne, were reduced to this miferable state by their Lords, in order to leave them no means of revolt, and to render them useful as slaves. Du Cange informs us, that the celebrated Hevin first obtained, from the Parliament of Rennes, a repeal of those cruel and ridiculous constitutions

constitutions against the Cacous. But the word Cagot still remains a term of reproach, and now signifies a hypocrite. Had we leifure, it would be amusing to compare the miserable state of the poor Cagots, with that infamy which is entailed, in Hindostan, on the cast or tribe of the Sooders. But we have already made this note too long; and all the apology we can offer is, that we flatter ourselves the reader will be glad to find here an account of a fet of men, whose very name is little, if at all, known in this Island, and against whom far more intolerable severities were exercised, than by our ancestors against the lepers, who abounded both in England and Scotland during the middle ages.

Gar | Force one to act, to constrain. Prim. Celtic gor, gar, force, strength, elevation, abundance; vide Dict. Celt. de Bullet in Gorchaled, and Gor. Hence Breton. gor, tumour, elevation; Gaelic gorm, nobleman, grandee. In the language of Stiria and Carniola, mountain; gora, in Sclavon. id. Polon. gora-hegy, a cape or promontory; Lapland, and Finland, kor-kin, high; Hebr. gor, to heap up; Arab. ghurur, pride, ambition; whence Gr. yaupos, proud, elated; Old French gaur, id. Celt. gorain, to cry out with vehemence, which greatly illustrates the primitive fignification of our gar; Welsh, gorchfygiad, to force or constrain; Suio-Goth. gora, antiq. gara, facere; vide Ihre in gora, where this elegant etymologist has observed the agreement betwixt this word and our gar. Adde Lye addit. Etymol. Junii; but none of these writers have gone back to the Primitive Celtic; Aremor. gra, facere. From this root, too, comes the Latin gero, applied fometimes to war, gerere bellum; vide Livy, l. 39. c. 54. Isl. giora, to act; Alam. garen, garuuen. The reader may turn to our Introduction, where he will find fome other observations on this word, to which we only add, that carve comes from this root.

For scho's be burnt, and hee's be slean,

The weirifou' Gaberlunzie-man.

Some rade upo' horse, some ran a-sit,

The wife was wude, and out o' her wit;

Scho

VER. 3. Scho's—Hee's] She shall—He shall; a contraction frequently in the mouths of our country people.

VER. 4. Weirifou] Fou for full, it being customary in Scots to change the *l* into w, as roll, row; ferell, ferow; tolbooth, toubooth; pol, pow, &c. Ruddiman. From fou, we form fouth, plenty, abundance. So Douglass, p. 4. v. 6.

"That of thy copious fouth or plentitude."

Thus from deep, depth; rew, reuth, &c. This is also remarked by Mr Ruddiman, Gloss.

VER. 6. Wude] Mad. Ger. wuth, rage; A. S. wod, mad; Teut. uueuten, to be mad; A. S. wedan, id. Whence perhaps the Scandinavians called their Mars Woden. Doug. p. 16. 29.

"The florm up bullerit fand, as it war wod."

And p. 423, 16.

" Wod wroith he worthis for difdene."

Dutch woed, fury; Ulphila, Mark v. 18. wods, possessed with a Devil; A. S. wod, mad; Isl. æde, furor; Alam. unatage, furious. From this root the Gr. outar, vulnerare, pugnare; and islanger, to swell with anger.

VER.

Scho cou'd na gang, nor yet cou'd fcho fit, But ay fcho curs't and fcho bann'd.

## VIII.

Mein tym far hind out o'wr the lee, Fu' fnug in a glen whar nane cou'd fee,

Thir

VER. 7. Gang Mæso Goth. gagga, pronounced ganga; as in the Greek when two gammas follow each other. Vide ad Stan. I. v. 6.

VER. 8. Ban To curse. Goth. banna, sign. simply to forbid; forbanna, Divis devovere. The primitive Celt. ban. a tie; whence our bond and band. Hence marriage banns. The Isl. forbanna, fign. to excommunicate or put out of fociety. Hence our ban-ish, and the Ital. bandito, our banditti; a-ban-don, to give up our claim to any thing, to loofen our tie to it. The bond by which the king's vaffals are obliged to follow their fovereign to the field, is, in France, called the ban, and arriere ban. Thus to bann one, literally fign. to put him under the bond of a curse. Hence Gael. bana, tied; Fr. bande, bander, our band or company, persons linked together by one common tie, or bond; bandage, to bend; Fr. ruban, whence ribbon, literally, a fillet of a red colour. Hence, too, in the French, the barbarous droit d'aubaine. by which the lord of the foil inherited all that a stranger died possessed of in his territory. We find, in the Bar. Lat. albani, and aubani, a stranger; concerning which word many idle conjectures have been published, as derived from advena. and Albanus, a Scotsman. But it is composed of al, another, and ban, jurisdiction, literally a person living under other laws.

laws. The Isl. bann, to curse, is still used in the north of England.

#### STANZA VIII.

VER I. Hind This is the primitive of behind, hindermost; Scot. hindmost; and is found in all the ancient dialects of the north; Ulphila, hindar, hindana, back, after; hindumists, hindermost; A. S. hindan, behind. Hence comes the verb to hinder, to impede; Dan. hindre, forhindra; Belg. hinderen, verhinderen. From this root comes the A. S. hinderling, properly one who comes far behind his ancestors, familiæ sua opprobrium. In Ll. Edw. Confess. 35. Occidentales Saxonici habent in proverbio summi despectus, hinderling; i. e. omni honestate dejecta et recedens imago; the scandal of his family.

VER. 2. Snug] The primitive of several northern words, all signifying hiding, concealment; Dan. sniger, subtersugio; snican, to crawl about hiddenly; whence Engl. sneak, a sneaking fellow. Lye was mistaken in deriving it from Isl. snoggur, celer. The Gael. snaighim, is the same with the Saxon snican; Dan. snige sig aff veyen, to sneak away. The Scots snod, neat, trim, may come also from this source, as it is evidently the same with the Gothic, snug, short and neat; en snug piga, a neat girl; Isl. snylld, elegance. Ray says, that in the north of England, they pronounce it snog; snogly geard, handsomely dressed.

Glen] Old English glin, or glyn; Gael. gleann. It denotes a large, level tract of ground, bounded on each side by ridges of sloping mountains. Hence we have in Scotland Strathmore, Strathspey, Strathern. There is this difference between the Saxon Dale, and the Gaelic Strath. The former denotes a narrow valley, bounded on each side by a ridge

# Thir twa, wi' kindly fport and glee, Cut frae a new cheefe a whang.

The

ridge of steep mountains, commonly with a river running through the middle; the latter answers the above description, which needs not to be repeated.

VER. 3. Twa] Ulphila twai; A. S. twa; Welsh dau, dwy; Gael. do; Swed. twa; Isl. tueir. Hence the Gr. svw, and twain; our Scot. twin, literally sign. to split into two parts, to separate. It is also used by Chaucer in this sense, R. 5077.

" Trowe nat that I woll hem twinne."

And Troil, 4. 1197.

"There shall no deth me fro' my ladie twinne."

From this root, too, is formed twine, thread, i. e. to double it; A. S. twinen; vide Exod. c. 39. 29. Sued. twynna; Dan. tuinder, to spin; tuinde trade, twined thread; Belg. tweyn draed. In Teutonista, twern yarn, duinum tuinum; A. S. twinne, to twine.

Glee] Mirth, gladness; Isl. gled, gladde, I have made glad; mig. gladur, it is a pleasure to me; Sax. gled, and our glad. With Chaucer glee denotes a concert of vocal and instrumental music. Sir Top. R. v. 126.

- " His merie men commanded he
- " To maken him both game and glee."

Fa. Lib. 3. 161.

- "There faw I fitt in other fees,
- " Playing on other fundric glees."

The A. S. Version of Pastor. 26. 2. David deseng his hearkan, and gestilde his wodthraga mid tham gligge. David took his harp, and stilled his madness with music. Gligman, mimus, scurra; Gligmon, id. Junius rightly conjectures, that glig was first used to denote instruments inslated by the breath, though afterwards indifcriminately applied to every mufical found. This is confirmed by the Islandic gliggur, flatus, breath. A certain species of catch is still called a glee. A. S. gle, joy, and without the g the Goth. lek, to laugh; we fay gaaff, to laugh loudly, and with the open mouth. From the idea of joy, gle and gla came to fignify every thing bright, splendid. Hence a multitude of words, Isl. glaumur, joy; whence our old Scots glamur, often employed to fignify incantations, because, by fuch arts, the mind was thought to be greatly moved, and to look on things indifferent as of great consequence. Goth. glans, and Alam. klanz, splendour; whence our glance, from gla, light; gloa, to shine. this last the Eng. glow, glow-worm; A. S. glowan, to glow; Swed. glod; Gael. glo; A. S. gled; Ger. glut; all fignifying a live coal. Isl. glia; Frisl. glian, to shine; Sax. gleij, fplendidus; and hence the Gr. aiyan, fplendour; which none of our Lexicographers have been able to explain. Hence, too, Engl. glitter, by Ulphila written glitmunjan; Isl. glitta; Ger. gleissen; Swed. glistra, gnista; Sax. glinstern, and the Gr. αγλαιζεδαι; Ifl. glift, and glaft, nitidus. So Snorro. v. 1. Glast med gulli, och silfri, shining with gold and silver. Gr. yexer, splendere; and Hesychius explains yexes, αυγην ήλιε, a fun-beam; αγλαος, splendidus; γλαυςςα, fplendeo; yhauxos, yhaupos, fplendidus; Goth. glassa, and our glaze; Isl. glas, our glass. We call the slipperymucus, growing on stones in the river, glitt; and glatt in Gothic is nitidus, lævis. Hence Engl. gloff; Goth. gles, Succinum: Vide Tacit. Mor. Ger. cap. 45. Plin. H. N. lib. 26. c. 3.

From

From the fame root are derived Goth. glimra, glindra, to shine, whence our glimmer and glimpse; Engl. gleam, a ray of light; Isl. glimbr, splendour. Taking away the g, we have the Gr. Natte, to shine; Isl. liome, light; Ulphila, lauhmon, lightning. And with the g, Swed. glo, to see; Gr. Ynaussw; Sax. gloren, splendere; hence Scot. glowr, to look intently at any object. So in the old Ballad:

- " I canna get leave
- " To luke to my luve,
- " My minny's aye gloquring owr me."

Isl. gloggr, and Goth glau, sharp-sighted; Gr. yanvr, pupil of the eye; Fr. glaire, the clear or white of the egg; Isl. gla, the shining of the ocean in a calm. Hence Gr. yanvr, serenitas; yanvoc, sereno; yanvea, res nitidæ, prætiosæ; yanvoc, a star; Swed. gran, shining; whence the Apollo Gryneus, literally the Splendid Sun. We are much deceived if the many coincidences we have here thrown together, (and to which more might easily be added) do not prove very strongly, a primitive and universal language. We have not room to alledge the many examples the Eastern dialects surnish to us;—these we reserve for a larger work. Mean while, the reader may look at Ihre, Lex. voce Gloa and Glo.

VER. 4. Frae] Engl. from. But we have kept the true orthography. Swed. fram, prorsum, adverbium motus de loco posteriori in anteriorem. The pro of the Latins is from this root, and has the same meaning in prorsum, procedere, prodire, prosferre; and the Swedes say ga fram, giswa fram; Ulphila, iddja fram, processit; Luke xix. 28. framis leits, a little further. So, too, in the compounds, fram-wigis, semper; and Luke i. 18. fram-aldrozi, stricken in years; Alam. frampringan, producere. Tatian, cap. 73.

W. 1. franor, further. We find in Wilking. Saga, p. 3. Hugprydiac spaki, oc framwisi, a genius wise and prudent; from fram and wis, wisdom; and hence framvis, a diviner, conjurer; Isl. framygdur, a wise man; Goth. framsus, a petulant fellow, ever putting himself forward; whence Engl. frumpish. To return to the Scots word frae, as corresponding to the Goth. fram, from. Chron. Ryth. p. 444.

" Huar monde fram androm fly."
Qui ab altero fecessit, aufugit.

Framgangu, going from, departure; Swed. fran. From fram the ingenious and learned Ihre derives framea, a dart used by the ancient Germans, mentioned by Tacitus, M. G. cap. 6. Hastas, vel ipsorum vocabulo, frameas gerunt; from fram and frumen, mittere, jaculari. Hence, in Ulphila, we find, Joh. x. 5. Framthjana ni lajsjand, a stranger will they not follow. Alam. framider; Ger. fremd, a stranger; and Scot. fremdman, one come from far.

Douglas writes this word sometimes fra and fray.

Whang] Prim. tan, a binding or cord. Hence every thing of a long narrow shape. Whang, a slice of cheese, cut in a long narrow form. Ulphila, twang; Isl. tange, vinculum; Swed. tang, a strap hanging at the handle of a knife. They also call an isthmus tang, and we say a tongue of land. Isl. thuing, a band; A. S. twang, whence our whang.

The primitive tan is found in all the Scythian dialects, and those derived from them. Swed. tan, nerve. Leg, Goth. cap. 22. Than en fundr er than hels edanacca; Si abscissius sueric nervus colli. Welch tant, chorda; Ger. id. Alam. than, a leather strap; A. S. tan, vinien, virgultum; and hence tanklyta, fortilegus. Swed. tanor, silaments in sless. The Gr. 7210, is formed from tan, sign. a nerve.—Odyst. 3.

The prieving was good, it pleas'd them baith, To lo'e her for ay, he gae her his aith,

Quo?

€ - πελεκυς δεεκο√ε τενον ας2

" AUXEVIES .--

Securis abscidit nervos cervicis. The Islanders call the nets for catching birds thaner; and hence Latin tenus, tenotis, in Nonius; and Plaut. Bacchid. v. v. 6.

" Pendebit hodie pulcre; ita intendi tenus."

It is needless to observe that our tendon is derived from the same source. The Goths call the swaddling bands of children tanom; Chron. Rythm. p. 561. Barn then som an i tanom lag, Children that lay yet in their swaddling bands. The Greeks called them Teria, Terisia. Vide Jun. Gloss. Ulph. p. 330.

VER. 5. Prieving The proof, the first taste of any thing. Primitive is por, pro; Celt. por, what is before; as por signifies also face. Hence porro, probo, probation; Fr. preuve, eprouver, the prow of a ship; Gr. TPEOlog; Lat. primus, prior, princeps, and a vast number of other words. At prefent we confine ourselves to the northern dialects, where we find, in the Celtic, prid; whence our price, or value of any thing; Ger. preis; Lat. pretium; Italian apprezzare; Goth. pris, id. and metaphorically, glory, honour, high esteem; whence Engl. praise. The truly learned and elegant Ihre observes, that, in the old Swio-Gothic, they used prishet in the same sense. In Chron. Ryth. p. 442.

" Och innan strid stor prishet was." In war he was greatly prized.

With

# Quo' fhe, to leave thee I will be laith, My winfom Gaberlunzie-man.

IX.

With them priss, sign. to prize, apprize; and these words clearly indicate their northern origin. Hence, too, Fr. priser, mepriser; winna priset, to win the prize. In our dialect pris, prieve, is proof, or trial, as here; and in Douglass, p. 309. 49.

- "Thus rude examplis may we gif,
- "Thocht God be his awin Creauture to prieve."

We also use the verb, to prie, to taste.

VER. 5. Baith | Engl. both, by a faulty pronunciation; for the primitive is found in Ulphila's, ba, bai, i. e. baith, not both. So Luke 5. v. 7. Ba tho skipa gafullidedun, they filled both the ships; and Luke 6. v. 39. Bai in dalga driusand, both will fall into the ditch. A. S. ba, butu; Alam. bedu, beidu; Isl. bathur. It is diverting to fee Junius gravely fuppoling that our word comes from Gr. auco, as if our ancestors could not reckon two, till the Greeks taught them. The favages of Kamschatka do more than this; for they follow the number of their fingers and toes up to twenty, and having got thus far, they stop, and cry, Where shall I find more? See the account of this country, published at Petersburg, and translated by Grieve. p. 178. We just add, that the same observation may be applied to the words, aith, oath, laith, loth, which occur in the verses immediately following, and which have been equally vitiated by our fouthern neighbours, as this word baith.

VER. 7. Laith Loth. But ours is the true pronounciation, as derived from Al. leid, luad; Alam. lath; Belg.

leyd, odious, ugly, troublesome; Old Danish, tha the læwas and lædedon iuch, who hate and persecute you. The primitive of all these is sound in the Celt. lad, loc, to cut, pain, of wound; Basg. laceria, missortune. We cannot deny ourselves the pleasure of following this original through some of its many descendants; hence come Gr. has set; Fr. lacerer; Lat. lacerare, our lacerate; Fr. loqueté, cut out in slices; whence our lock of hair, or wool; Celt. laza, to kill; and hence lay, a poem on any tragical subject; so Dougl. 321. v. 5.

## " The dowy tones, and layes lamentabil."

Ital. lai, and our lament, the true Scots appellation of Elegiac fongs; A. S. ley, id. which neither Menage, nor even Skinner understood; Ger. lied, a fong, but properly a melancholy ditty; as the B. L. leudus also fignifies; Fortunat. Epist. ad Gregor. Turon. ad Lib. 1. Poemat. Sola scepe bombicans barbaros leudos harpa relidebat. Id. Lib. 7. Poem 8.

## " Nos tibi versiculos, dent barbara carmina leudos."

Hence, too, Lat. lessus, and the Bas. Bret. lais, a melancholy found or cry; e-legia, e-legy, lesson; and the Fr. leze majested, high treason. We could easily bring many more proofs of the truth of our account of the term elegy, as that passage of Proclus, in Chrest. ap. Phot. Bibl. Το γαρθρηνος, ελεγιαν ελεγων οι παλαιοι, veteres luctum vocarunt εν εγον. Ovid gives us the same idea, Ped. de Lib. 3. Eleg. 1.

- " Flebilis indignos elegia folve capillos,
- " Heu nimis ex vero nunc tibi nomen inest."

Vossius (in Elegia) has quoted these passages, but gives no Etymology, as indeed the root is lost both in the Greek and Roman languages. But we must stop, after observing that the

### IX.

O kend my minny I war wi' you, Ill-fardly wad fhe crook her mou',

Sic

Fr. words laid, (which of old fignified, offence, injury, and now ugliness,) laideur, laidron, and the Gr. Now open, to defame, are all of this family.

VER. 8. Winsom] We have have already shewn the meaning and origin of this word, in the note on Stanza II. ver. 6. In the old ballads we find it often used; so in the old song of Gilderoy, (Percy, vol. I. p. 324, 325.) My winsom Gilderoy; Ger. minnesam, from minne, love, which we have already explained; Alam. wino, a friend; A. S. vine, beloved.

#### STANZA IX.

VER. I. Kend] The primitive kan-enen, signifies art, knowledge, dexterity. Hebr. gwanen, an inchanter, and the verb gwenen, to divine; Gr. xoveziv; Gaelic kann, I know; kunna, kenning, knowledge; kennimen, knowing, learned men, priests; Ulphila, kunnan, Mark 4. v. 11. Iswis attiban ist, kunnan runa thiud angardsos Goths,—To you it is given to know the mystery of the Kingdom of God. Isl. kunna; Alam. kennen, chennen; from kunna, the English cunning; in sea-phrase, to cunn a ship, is to direct her course; in Fr. maitre gonin, a sharper. See the poor efforts of Menage to explain this word. Hesych. xovvew, suveral, entsadal, to understand. We say here kenspeckled, easy to be known by particular marks. The Goths use a similar phrase, Kenespak, qui alios sacile agnoscit; Ihre in kenn.

VER. 2. Ill-fardly] Ill-favouredly, in an ugly manners In Engl. well-favoured, handfome, well-looking; and thus

Spelman,

our translators of the Bible use it, Gen. xli. v. 3. 4. Primitive is fa, to eat, to feed on good things, as descended from the family of fa, denoting every action belonging to the mouth, as eating, speaking, &c. So the Latin fari, whence Fr. faribole, idle tale, and the like. From fa comes Latin favus, honey-comb; favere alicui, to favour one; our favourite, favour; Fr. favoriser, fauteur, and the Latin fautor. common word infant, Latin infans, comes not from in and fari, one who cannot speak, as our herd of Lexicographers fay, but from fa, to nourish, to feed, whence fari itself is derived, which being a diffyllable, can never be a primitive, those (as we have elsewhere observed) being all monosyllables, in every language. From this root, too, we have fawn, a young deer. N. B. The animals do not speak, therefore it is impossible that favon can come from Latin fari: but we must stop here, lest we offend those who hold, that the Our angoutans, a species of the monkey, belong to the human race; and that, though they have passed above six thousand years without framing a language, it is still very rationally expected, that they will yet form one, (vide Origin and Prog. of Lang. vol. I. p. 189. 272). Whenever we are happy enough to possess a Dictionary, collected by some learned Ouranoutang, and a Grammar of this new speech, we nothing doubt, but we shall discover many primitives of language yet unknown. But this by the bye.

We find favour, in the Welch, fleafor, flawr, and in the Greek,  $\phi_{\alpha\omega}$ ,  $\phi_{n\mu\iota}$ ; and in what Festus writes, faventia, bonam ominationem fignificat; favere, enim, est bona fari. Hence the solemn form, Favete linguis. Vossius has said much, to no purpose, about this, in Favere; but he had no principles. We see new proofs of the truth of our Etymology in the hinnuleus of the Latins, and the Gr. 1982c, sig.  $\pi_{\beta\alpha}$  for a boy or young one. Vide Salmas, Plin. Exercit. p. 106. and

Spelman, in Fenatio and Foinessum. Lye mentions fauntekin as an old English word, signifying an infant or little boy, which he rightly derives from the Islandic fante, a young man; whence the Italian fante, a page or servant, and the French fantassim, a soldier who serves on foot, and of those whom we call in-fantry.

VER. 2. Crook] Prim. Celt. Crok, signifies every thing that takes hold; and as nothing can take hold but what deviates from the streight line, this word has formed a very numerous family: Goth. krok; the Gael. krock, kruick, an earthen pot or vase; Goth. kruka, id. We in Scotland call the iron on which the kettle hangs a crook. Shepherd's crook, from its bent form; and, for the same reason, crotchet in music signifies a note, with a tail turned up. Hence, too, come the French crotcheteur escroi, a thief who seizes every thing he can lay hands on; crosse, the sheep-hook, with which bishops are invested; acrocher, to seize or lay hold of. Gebelin observes, with his usual acuteness, that the French peasants who revolted in 1598, were called Les Croquans, because they plundered and carried off every thing wherever they came.

Mou'] Mouth. Prim. muth, mun; whence Ulphila has munths, the mouth; Celt. mu, id. also the lips. Hence Fr. mot, what is spoken with the lips; motet, Basq. motasa, sound of the voice; Gr. mcs., and mythology; murmur, i. e. mu-mu, small sound made by the mouth. Our old word mump comes from the same origin; also mant, to stammer. From the ancient Celtic and Welch mant, signifying the jaw-bone, comes the Latin mandibula, and the ancient munio, munito, to eat; Fest. munitio, mortificatio, ciborum; also mando, manduco; the Fr. manger; Ital. mangiere; Gr. ms. s.z., loqui. Ihre informs us, that the mouths of rivers are called Mynne-a-mynne, and Isl. munne, from mun, the mouth. They say also, the mouth and sips of

Sic a pure man fhe'd nevir trow,

After the Gaberlunzie-man.

My

a wound, as we do: Ll. Scaniæ, p. 22. Far man far gonum lar, allar lag, allar arm, fwa at that havir twa munna, If any man's thigh, leg, or arm, be so wounded as that the sore shall have two mouths. In the same sense the French use balastre, a great wound, which Dutchat rightly derives from the old French balevre, bilabrum: Ce qu'on appelle balastre, est proprement une grande playe, qui fait une espece de bouche, et par consequent deux levres. The Gothic munhasteis, a set form of words, and used in their ancient Jurisprudence. Vide Ihre, Lex. in voce, vol. II. p. 207.

We have in this word a clear example of the method the first men took to express opposite ideas, without multiplying the primitive words. Muth first denoted the mouth and speech. They formed the negative by using the same word in the opposite signification, and thus muth came to signify a dumb person; Gr.  $\mu\nu Jos$ ; Lat. mutus, whence our mute; The Hebrew muth, a dead man, one who speaks not. In another work we have collected many examples of this kind, which we have no room for here. Such is the word alt, high; whence the Lat. altus, signifying high, and also deep.

VER. 3. Trow] The verb, to believe; Belg. truen, id. Douglas uses trueles, for faithless. Prim. Goth. trost, trust, fidelity. Hence, metaphorically, a bold man, on whom we may well rely. So Chron. Ryth. p. 311.

"Thet var en godn trost man." He was a good and trusty man.

Isl. traustor, Alam. gidrost, Engl. trusty. Otfrid, l. 5., cap. 23.

« Zi

My dear, quod he, zere zet o'wr zoung, An' hae na learn'd the beggar's tongue,

To

- " Zi themo thronoste,
- " Sie sint al gidroste."

In their service all were faithful. Germ. triest, and Swed: driftig; vide Ihre in Driftig. From this root, too, the Greeks formed Jappen, to dare, or more properly, to be confident, by a literary metathefis of the same kind as that used by the Goths, while they say toras, to dare; jators, I dare, and then troft, our truft. So the ancient Greeks faid indifferently, Jasos, Spasu's, Japsuva, and Spasura, audacem reddo. Ulph. thrafftian, to confide or trust, and dauran, dare; Mark xii. 34. ganudarsta, audebat, which the Allemans pronounced gidorsta. In one of the Church Hymns, n. 127, The lofwade Gud med gladje och troft, They praifed God with gladness and confidence. We obferve, by the way, that our Scots phrase of loving God, used for praising him, frequent in Robert Bruce's Life, and other ancient poems, is formed from the Goth. lofware, to praise. In the Barb. Latin Laws, we find often the phrases, Trustis regius, Esse in truste regia, Trustinus; and the like; all denoting loyalty. Vid. Cange in Trustis. Marculf. For. l. 1. 18. These men were also called Antrustiones. Vid. Leg. Sal. Tit. 32. cap. 20. edit. Heroldi. Marculf. Lib. 1. Form. 47. ibi Lindenbrog. Gloss. The Antrustiones were of high dignity in the King's Court, as we gather from the article of the Gaelic Law last cited. We have the verb traist, to trust, frequent in Douglas. So p. 52. v. 25.

--- " And there traist coistis nyce."

And p. 213. 37.

" His traifty faith."

To fallow me frae toun to toun,

And carry the Gaberlunzie on.

#### X.

Wi' kauk and keel I'll win zour bread,
And fpinnels and quhorles for them wha need,
Whilk

VER. 7. Frae toun to toun] By toun here is not folely meant city, in which sense we now use it; but the Scots apply this word to every little village, and even to a farm-house, where there is an inclosed yard, after the manner of their ancestors, from the prim. dun, A. S. tun, Alam. zun, all fignifying an inclosure. Hence the Belgic tuyn, a garden, literally an inclosure; Gael. dun-dunam, to inclose; A. S. tynan, betynan, id. The first cities of our Celtic and Saxon ancestors were only farm-houses, or a few straggling hutte. inclosed with rails. Tacitus de M. G. cap. 16. Nullis Germanorum populis urbes habitari notum est, nec pati quidem inter se junctas sedes, (forte ædes) vicos locant, non in nostrum morem connexis et coherentibus ædificiis. These vici were separate houses, like our farmers steddings, which we still call towns. In some districts they are called mains, from mansio, and the B. Latin mansus, a manse, now restricted to our parfons houses.

#### STANZA X.

VER. I. Kauk] From the primitive cal, cel, every thing hard and proper to inclose with. Hence Latin celare, cellarium,

cellarium, our cellar; French celer, our con-ceal; the Celtie cal, a hut or stable. Hence kal came to denote the materials for inclosing, viz. stones, and especially that soft kind of stone, easily divided into small pieces, which the English call chalk, and we, more properly, pronounce kauk. Isl. kalk; Gael. calch; Alam. calc; A. S. ceale, ceale, stan. From this root, too, comes the Greek χαλίξ, explained by Suidas, μικρον. λιδιον, a little stone, and more clearly by Hesych. χαλικες, οί εις τας δικοδομας μικροι λίδι; of the same kind was the χαλίξ, mentioned by Thucidides, in his Account of the Walls of the Pyreus, built by the Athenians, in lib. 1. We are indebted to the industry of Junius for this remark; yet he does not even attempt an etymology of the word χαλίξ, which has bassiled all the lexicographers.

Keel] A red calcarious stone, used by carpenters for marking their lines on wood. The promise here made by the feigned Gaberlunzie-man, to get a livelihood for his sweet-heart by kauk and keel, alludes to the practice of fortune-tellers in Scotland, who usually pretend to be dumb, to gain credit with the vulgar, and therefore have recourse to signs made with kauk and keel, to explain their meaning. The primitive is plainly the same with that of kauk; col, cel, a small stone, (of a red colour).

Win] In the more modern acceptation, simply signifies to gain. So the Goths use vinna of one who wins at play, or in making bargains, or by gaining his cause in a court of justice; winna et karomal, in causa superiorem esse. Vide Ihre, vol. II. col. 2020. But of old it signified to gain our bread by hard labour, and industry. This is still its common meaning in the Islandic. So Exod. 15. Winna alladina winna, Thou shalt work all thy work. Hence winnuhiu, a labouring man. Numbers, cap. 30. A. S. vinnan. So the Dutch say land winnen, to plough the ground. Winnende leeden, membra genitalia;

Ist. vinna, labour; in the A. S. vinfull, industrious; winlagga, sign. to give one's self a great deal of trouble. Hence it is used to denote suffering. So Ulphila, Mark viii. 31. Skal funus mans filu vinnam, The son of man must suffer many things: And Luke ii. 48. Sa atta theins, ja ik vinnandona sokidedum thuk, Thy sather and I have sought thee forrowing. Hence it is transferred to child-bearing: Swed. Hon har wunnet en son, She has born a son; and Belg. Kinderin gewinnen, to bring forth children.

As the ancients knew of no other honourable gains, befides the spoils acquired in war, hence winna came to denote conquest, victory in war; and hence our phrase to win the battle, to win the field. In Matth. xxiv. 7. Vers. Ulph. Theod vinth ongean theode, Nation shall fight against nation. Gevinn, war; gevinne, battle. Tatian, cap. 195. 4. Mine ambathti wunnin, My fervants would fight. In an old Runic inscription, quoted by Ihre (in Winna), Vant Selalant ala, He conquered all Seland. The most modern fignification is that in which it is applied to gain in general. From winna, applied to war, comes the Latin vincere. Strange! that Vossius did not fee the true etymon, though he has mentioned the Goth. winnen, in Vinco. But he feldom or never looks further than the Greek or Latin. Still more abfurd is Varro's etymon, lib. 4. de L. L. Victoria, ab eo quod superati vincuntur. Yet this Varro pretended to give us the origin of language; and he is generally called Romanorum Doctissimus; and so, perhaps, he was.

VER. 2. Spinnels] Goth. Spindel, Machina tornatorum, in gyrum versatilis, says the learned Professor of Upsal. Slenda, susus, Spincok, susus, and hence our rok, a distaff. A. S. Spinel; and from spindle the Greek (πουδου), as the spindle is of a long slender form; the Goth. Spinkog, sig. Slender; and, by a similar sigure, we say Spindle-Shanks,

of a man underlimbed. The prim. is span, to extend, or draw out to length, as the thread is extended from the mass on the Hence our span, of the hand extended. Vid. Bullet, Dict. Celt. in Span. We have much to fay concerning this primitive, which we referve for our Scoto-Gothic Gloffary. Suffice it to observe here, that the word span, to extend, and hence to measure, is found in all the dialects of the North. A. S. span, Spon, sponne; Alam. spana; Isl. span, spon; Ital. spanna; Fr. espan, empan. Vide Hicks, Gram. Franc. p. 98. The Swed. verb spanna, to measure. Hence they call grain in general spannemal, as being fold by measure. Of a young slender girl they say, Hon ar sa smal, att man kan spanna om benne, She is fo fmall, that with two spans you may encircle her; spanna konut, mulieres contrectare. We are not sure whether we are to connect with this the Goth. spann, a bracelet; Ger. spange, B. Lat. spanga, de qua Cange. From this word comes Swed. spanna, to bind. Festus has spinter, armillæ genus. Spannabalt was the ancient desperate mode of duelling, when the combatants, bound within the narrow circle of one belt, which furrounded both, attacked each other with short daggers. From spin, span, a number of words have their origin, all denoting what is long, flender, and sharp. Such are Goth. spik, whence our spike and hand-Dike, the wooden leavers by which feamen heave at the capstan. The Lat. Spica, Spiculum; Gael. Speice; Spoke of a wheel; Ital. spighe, della rota; Ger. speiche. In the Armor. spec and auspec, sign. a small leaver. The Gothic spik, a spear; whence the spiculum of the Latins. Confer Cange, in Specillum, a probe.

Quivorles] A perforated piece of circular stone, fixed on the spindle to give it weight in turning round; literally, whirlers, to encrease the motion in whirling round. Scyth. whirra, to encrease, turbare, tumultuari, surfum et deorsum ferri.

Whilk is a gentle trade indeed,

To carry the Gaberlunzie on.

I'll bow my leg and crook my knee,

An' draw a black clout owr my eye,

A

Goth. huirswel, our whirlwind, from hwerswa, Isl. huerfu, in gyrum agere. From the Goth. horra, the English hurry. Prim. girwhir, circle. A. S. ymbhærtan, to be turned round. Belg. weraven, wieren. Hence the sea-phrase, to wear ship, to bring her round. Fr. virer and verve, by which they denote the furor poeticus, which strongly agitates the mind; and this affection the Islanders, among whom of old it was very strong and frequent, call fealdwingl. From this primitive the Greek yupsu, and the Latin gyrare. It is remarkable that the old Latins said vervare, for circumagere; and urvare, to draw the circular line with the plough, to mark the boundaries of the future city. The word is pure Gothic; but neither Festus, nor any of his commentators, understood it. Confer Acta Sueciæ Litterar. vol. IV. p. 386. Junius has given us no etymon of swhirl. Vid. in voce.

VER. 6. Clout] Goth. klut, panni frustum, a rag. The prim is clo-clu, covered, shut up. Hence Lat. claudo, cludo, in-cludo, and our close, inclose, disclose. Douglas used close for cloister, place where monks and nuns are shut up. In the Gael. cluss, in A. S. cleos, signify joining of a rent. A. S. geclutad braegl, a clouted garment. "Ex his coajicere licet (says Ihre) klut, prima et antiquissima signiscatione denotasse panni frusta ad farciendas vestes immissia." In English, a clouterly fellow, a mean man, a fellow in rags. Belg. kleete, a fool; Swed. klutare, a botcher of old clothes.

K

## 74 THE GABERLUNZIE-MAN,

A cripple or blind they will ca' me, While we will be merry and fing.

VER. 7. Cripple] Lame man. A word found in all the Celtic dialects. Welfh crupl; A. S. crypl; Belg. krepel, kreupel; Swed. krympling, paralytic, membris captus; whence our cramp, binding of the finews. The primitive is craf, crif, craw, to bind. Hence Gaelic crampa, French crampon, cramponer. The shell-sish crab, from its claws, and the French crapaud, are of the same origin. Hence, too, Greek γρυπαινείν, in-curvari, γρυπαλίον, a man bent down or crippled with age. Gloss. Philoxeni κραιπαλούτες, vacillantes. Junius odly deduces cripple, a κραιπαλοί, crapula:—But we are weary of his blunders; and so, perhaps, is the reader of ours.

Jam satis est, manum de tabula.

ADDENDA.

# ADDENDA.

laid down in the Preface, and exemplified in the Notes on the foregoing Ballad, the Public and I are indebted to a learned and worthy friend of the Author\*, whose extensive erudition is only equalled by the modesty and candour conspicuous in his whole deportment. I am sure our learned readers will regret with me, that he has not pushed his researches further than he has done. But, from the little he has here given us, the general principle of Etymology I have endeavoured to establish will derive new force, and our readers new entertainment.

## TO THE READER.

IN the following strictures, I have, in a manner, confined myself to the Oriental languages. My knowledge of the Northern tongues is too much bounded to qualify me for purfuing the coincidences of words through their various dialects. I shall, perhaps, be blamed for terminating the origin of too great a number of words in the Hebrew. This, however, I did, from a conviction that their radical syllables and significations appeared most obvious in that language. In a few instances I have taken the liberty to differ from the

<sup>\*</sup> Mr David Doig, Rector of the Academy in Stirling.

learned and laborious Author of the Notes. I have not, however, the remotest intention to detract from his well-known abilities and merit. I imagined it might neither be displea-fing to himself, nor his readers, to see, upon some occasions, the same individual term placed in various points of light. If the unlearned philologer shall acquire one new idea by the perusal of them, I shall think myself abundantly rewarded for the pains I have taken in throwing them together.

Before I proceed to the additional notes, I shall take the liberty to present to the reader one single word, which, in my opinion, furnishes a very striking evidence of the truth of the Author's leading principle, with relation to the existence of an original universal language.

Ur, aur, our] These words fignify fire, light, heat, and several other things nearly connected with these ideas. They occur frequently in the Hebrew, and its sister-dialects. In the Chald. we have Ur, the name of a city, where, it is thought, the Sun was worshipped by a perpetual fire. Also Or-choe, the seat of the Chaldean astronomers called Or-cheni, Strabo, l. 16. p. 739. We find oreitæ, or oritæ, in different parts of the East, the Chald. Atun B-ura, the surnace of fire, occurs, Dan. chap. 3. ver. 6. &c. In the Gentoo language war, which is only a small variation, imports day, light, see—Halhed's Pres. to his Translation of the Gentoo Laws. In the same tongue, the most ancient Dynasty of the Gentoo Princes were called Surage, from Sur, a name or epithet of the Sun—See Halhed's Pres. and Col. Dow's Introd. to the Hist. of Hindostan.

In the old Persian, or Pehlvi, the word hyr signifies fire, the same with ur, only with the aspirate prefixed.

Hyr-bad, a fire, temple; Az-ur, Mars, i. c. the fiery planet, compounded of Az, or Aft, fire, and Ur, heat or light. Hur, or Chur, is a common name of the Sun in that language.

language. Kur, Rasch, Horesh, Kopos, Gr. which last, Plut. Vit. Artax. signifies the Sun. From the same word we have the sirst syllable of Or-mazd, the God of Light, the chief Divinity of the Persians. Here, too, we find Purim, signifying lots, denominated from the ceremonics of fire employed upon these occasions—Esth. chap. iii. ver. 7. &c.

The Arabian Uro-talt, Herod. l. 3. cap. 8. is compounded of ur, light, and jalath, high. In Egypt we find Orus, or Horus, Apollo, the Sun, Herod, l. 2. Diod. Sic. l. 1. Plut. Ifis and Ofiris, Horapollo, Paff. In the fame language we have Athur, the name of a month, partly answering to our October, on the 17th day of which Ofiris was put into the coffin, a word compounded of ait, or at, or ath, heat, and ur, or or—See Plut. ubi supra. The particle pi was common in the Egyptian tongue, see Kirch. Prolegom. Copt. page 180, 297. Jameson's Spicileg. cap. 9. parag. 4. Hence pur, fire, and sometimes the Sun. Of this word, and the Hebrew chamud, or omud, columna, is compounded the term  $\pi \nu \rho a \mu i$ , pyramid, edifices, erected in honour of the Sun.

The  $\pi\nu\rho$  of the Greeks, according to Plato (Cratyl. .p. 410. Serr.) was berrowed from the Phrygians. These last had received it from the Persians by the Armenians, who spoke nearly the same language. The word  $\pi\nu\rho$  produced a numerous family, all descendants of the oriental term Ur.

Or] Another modification of the fame word, produced  $\mathcal{L}_{\rho\alpha}$ , temperas, a feafon, with a numerous train of connections. Also  $\mathcal{L}_{\rho\alpha}$ , beauty;  $\mathcal{L}_{\sigma\rho}$ , a fword, from its glittering, by the same analogy that the Scandinavians call it brandt: Also  $\mathcal{L}_{\rho\alpha\alpha}$ , video, and many others.

From aur we have the Eolie aupa, aupor, afterwards adopted by the Latins. From our we have oupos, ventus fecundus, with all its compounds and derivatives; also nuvosupa, the North Pole-Star, which the Greeks have corrupted in a shameful

thameful manner. It is really composed of the Hebrew or Phoenician kanes, congregavit, and ur, light, i. e. an Assemblage of Light. From the same root we have our aves, coelum. The last part is probably the oriental en, signifying an eye, a fountain, the Sun being the eye of Heaven, or sountain of light.

In the Latin tongue we have a numerous tribe of words descended from ur, or, aur; such are uro, buro, burrum, ap. Festum pro rufum, purus, purgo. From the fame root we have furo, to rage like fire; furia, a fury. Perhaps this last word may be a native of Egypt, from whence the Greeks derived their ideas of the infernal regions. See Diod. Sic. 1. 1. juxta finem. The Latian Jupiter was called Jupiter Puer. I suspect this epithet is distorted from pi-ur. In ancient times, it is probable, this Deity was no other than the Sun. See Macrob. Saturn. cap. 17. His Ministers were called Pueri; and because they were generally handsome young men, selected for that office, in process of time, I fancy, the word puer came to fignify a young man in general: At Preneste, Jupiter Puer was in high veneration; he prefided over the celebrated Sortes Prenestini, described by Cicero, de Divinat. l. 2. From or we have orior, ordior, and perhaps oro; from aur we have aura, Aurora, aurum, &c.

The words *fire*, *air*, &c. plainly defeended of the fame flock, under various forms, and with new modifications, pervade all the German and Scandinavian dialects; an affertion which the Author of the Notes would certainly have demonstrated, had that term occurred in the text of the Ballad.

In the French we have jour, with all its compounds, from the very fame root. In the Celtic, ore, or aur, fignifies gold, concerning which, Vossius (Etym. V. Aurum) has told a heap of absurdites. The name ore is given it in allusion to its shining quality, a word which we have adopted, and applied to fignify any metal before it is purified and refined. Aur also in Celtic fignifies yellow. Vid. Bullet in Aur. Those who are well acquainted with the remains of the ancient Celtic, can, no doubt, produce many other cognates of the same original term. If the above detail should be thought tedious, the best apology I can make is, that I am consident I have, for the sake of brevity, omitted at least one third of what I could easily have produced: At the same time, all these analogies might have been confirmed and elucidated by a variety of quotations from ancient and modern authors, had the bounds I have prescribed to myfelf admitted such enlargements.

#### TITLE.

Gaber] In some places of Scotland, this word, among the vulgar, denotes an idea very different from that assigned by the Author of the Notes. When a thing is dashed to pieces, they say it is driven to gaberts, or gabers. According to this acceptation, the Gaberlunzie-man will imply a fellow whose clothes about his loins are all rags and tatters, all worn out, &c.

The character exhibited throughout the Ballad, feems rather to be that of a common beggar than of a tinker, though indeed both professions were often united in the same person.

Gab feems originally to denote the roof of the mouth or palate. In some of the Eastern languages it signifies an eminence, a protuberance, gibbous, &c. Hence Arab. gebal, a hill; also the Lat. gibbus, hump backed. According to this idea, it was appropriated to signify the roof of the mouth, which, indeed, rises in a gibbous form or arch over the tongue and lower part of the mouth. From the notion of a rising protuberance, it was probably transferred to signify cabbage, and whatever else imports eminence, elevation, or gibbosity.

Hence

Hence gabah, fcyphus, a kind of cup, fo called from its gibbous protuberant belly, perhaps the origin of the Scotch word cap, and of all its German and Scandinavian cognates.

Caph, Hebr. the hollow of the hand, or any other cavity fitted for containing. By changing the ph but a very little, we have cav, gau, cow, and gow, fyllables which occur in a number of compounds, both in the East and West. Plut. in Alex. tells us that gau-gamela signifies the house of the camel. It were easy to trace this word through many different languages. It is the origin of the English word cave, Scotch cove, and Welch cowe; Lat. cavus, a-um, hollow. Here, I believe, we may discover a composition of the word calum very different from that usually assigned. Co is a house, and El, or Il, a Phnœician name of the Deity. Hence we have Ennius's Allisonans Coil, Annal. L. 1. and also the following verses:

- " Coilum prospexit stellis fulgentibus aptum.
- " Olim de Coilo laivum dedit inclytus fignum,
- " Saturnus quem Coilus genuviț.
- "Unus erat quem tu tollas in coirila Coili
- " Templa."

Hence it is probable that Co-il originally fignified the House of Il, or El, which is perfectly conformable to the notion of Heaven commonly exhibited in Scripture. The idea annexed to this word carries us back to a very uncultivated state of Society. The same word being applied both to signify a cave and a house, intimates that the original men often dwelt in caves. Vid. the Poems of Ossian, passim.

"Domus antra fuerunt,
"Et densi frutices, vinetæ cortice virgæ."

Ovid. Metan.

As gow, gaw, caw, cow, originally fignified a house, in process of time it came to import a collection of houses, a village, a city. This was the case both in the German and Celtic tongues. Thus we have Cra-cow, Tor-gaw, Wormesgaw, Nord-gaw, Rhin-gaw: See Cluv. Germ. Antiq. 1. 1. cap. 13. p. 91. Confer Bullet in Gouri, and Gowrin. In Scotland we have Glas-cow, or Glas-gow, Linlithgow, &c. In the old British dialect, gowe, or rather cowe, signified likewise low, hollow; Scotch howe. From gow, or cow, and ri, a river, we have Gowrie, a low fertile tract of ground, lying on the north bank of the river Tay. In ancient times, this district lay between the rivers Tay and Erne.

Lunzie] We call a bulky parcel, which one carries on his haunch, under his coat, a lunchick; perhaps the fame with the English luncheon, both derived from the word lunzie.

#### STANZA I.

VER. 1. The] This particle has a most extensive range both in the Eastern and Western parts of the Globe. Hebr. zah, or zahah; Chald. da, di, dik, din. Arab. Syr. much the same. Pers. di. From the Chald. da, the Greeks formed their r, the article of the neuter gender. It is the same with the Latin de, though of a different signification. The same article runs through all the Gothic dialects, with very little variation.

Over] This preposition, however meanly it figures in our dialects, is, notwithstanding, one of the terms which made a part of the original language of mankind. In Hebrew we have chabar, or, as some pronounce it, obar, transivit, transgressus est; heber, transitus; Chald. cheber, chiber, from which word, some think the posterity of Abraham were called

L Hebrews,

Hebrews, transfluviani, men from beyond the river. Syrian chabara, or abara, whence Beth-abara, the house of the pass-age, the ferry-house, John, chap. i. 25. Hence also chebar, in Ezek. From Chabar, trans, over, were denominated the Chabareni, a people beyond the mountains of Armenia, Steph. Byzan. in Voc.

From the Chald. Chiber, we have all the *Iberi* in the East. In Spain we have *Celt-iberi*, i. e. the Celtæ beyond the mountains; the river *Iber*, now *Ebro*, denominated, I suppose, by the Gauls who settled in that country.

The word aber, fignifying the mouth of a river, pervades all the Celtic dialects, and differs almost nothing from the Chabar of the East.

From the same word we have the Greek  $v\pi_{\varepsilon}\rho$ , and  $\gamma \varepsilon_{\varepsilon}vv\rho\sigma$ , a bridge. Also the Lat. fuper, fupra, with all their connections. Upon the whole, hardly any particle has pervaded a greater number of dialects, both in Europe and Asia.

Lee] Over all the North of Scotland they pronounce this word ley, which comes very near the Greek λειος, λευιων, λειε, Ε.c.

VER. 3. Gudewife Good, Scots gude, runs through all the Northern dialects. Its primitive is found in the old Perfian language, where it is gath, good. It is the root of the Greek at a desc, good.

Wife] Of all the etymologies of this word, none feem to me more plaufible than that which refers it to the very word chevah. It is only changing the letter heth into w, and throwing away the he at the end; but the profound etymologists will reject this derivation, were it for no other reason but because it is obvious.

Kaiu, Kaio] These words are originally Persian. Kai, or Hei, was a title given to a dynasty of their Kings. Hence

the Princes of that family were called Kaianides, which fignifies the fplendid, or illustrious. The word hai, hei, fignifies fulgur, a flash of lightning. Hebr. kai, or kei, ustio, adustio; Gr. raie, uro. From the same root the Latin prænomen Caius, borrowed, I suppose, from the Etruscans, a colony of Lydians, which last had it from their neighbours the Medes.

γεναω] From γαω, gigno, which last from γεα, Terra, it being the opinion of the ancient uncivilized Greeks, that the original men sprung from the earth, according to the doctrine of Moschus, Democritus, and Epicurus, which was introduced afterwards, and formed upon the same opinion. The radical term is the Hebr. gia, vallis.

Gaudeo is, I believe, deduced from the Hebrew gaah, fuperbire; whence gavah, exultatio, which produces the Gr. year and the Lat. gaudeo, originally gaveo. The Scots word gaff, to laugh immoderately, belongs to the fame family. They feem to be originally onomatopæas, formed in allusion to the found of the human voice in an extasy of joy.

Ver. 4. Ludge] Celt. Lug, Log, a place; whence Lat. Locus, and the Scot. Logie, the name of feveral villages. Hence also Kil-logie.

VER. 5. Night] This word, in various forms, pervades all the Northern dialects. With a fmall variation, we have Lat. nox, noct; Gr. vo\(\xi\); Hebr. Chad. Syr. nuch, quievit, requievit.

Wat] Perf. ab, av, aw, a river; the very same with the Celtic word av, signifying the same thing. Of au and phrat, the Greeks made Evopatns, Euphrates.

VER. 6. Ingle] The origin of this word is very obscure. In many places of Scotland they have no other fuel but peats, furze, broom, heath, and brushwood. Fires consisting of such materials must be fed by continual supplies, which they

call beeting. The Welch vocable inghilf fignifies feeding; this I take to be the origin of the word ingle, alluding to the constant feeding of the fire. In like manner, Isl. elldur is fire; ellde, to boil with fire; both from el, ool, ela, to feed.

VER. 7. Dochter's This word is purely Persian, as is generally known.

Ver. 8. Cadgily] The word cadge is probably derived from the Sclavonian chodge, to trudge on foot; whence, too, our fcodgy, a little wench, who does the dirty work in a farmer's kitchen. The word cadgy, in the present case, should, I think, be written cagy, or cagie, which would agree better with the pronounciation. It imports merry, chearful, jovial, and is, I believe, an abbreviation of the old French word cagedler, the same with cajoler, to cajole, flatter, cox.

#### STANZA II.

VER. 5. Canty] From Lat. canto, cano. Hebr. kanah, canna, calamus, arundo, plainly alludes to playing on instruments made of reeds, the reed being the first substance used for wind music. The Hebrew chanah, among other significations, denotes to sing, to say, to speak to, to testify, to attest. The Greek at two, in ancient times, implied both to sing and to speak. By comparing these two ideas, it appears that the ancients uttered their words with a canting tone of voice, or in the recitative stile. From this circumstance the orations of the Greeks and Romans may possibly have derived some part of that influence, which we still admire, but have never seen.

Ver. 6. Ken] This is another word of Perfian extraction. In that language it denotes a learned intelligent man, especially in the Laws of Zerdusht. Hence all the descendants of that word in Greek, Latin, Gothic, &c

STANZA

#### STANZA III.

Ver. 2. Daddy] This word occurs, with little variation, in many different languages; ab, ap, av-us, at, atta, tat, dad, &c. and are all mere onomatopæas, fabricated from the early prattle of infants. The found is formed by an application of the point of the tongue to the roof of the mouth, one of the most natural efforts of the organs of speech. It was probably caught by mothers and nurses, and by them applied to intimate the idea of father. This process was natural. The first articulate sound enounced by the child was appropriated to the idea of father, he being deemed superior in dignity to the other parent.

Di] Mentioned in the notes on the preceding word, fignifies bright, luminous, fplendid, glorious. It occurs in many of the Eastern dialects, and from thence probably found its way into the West. Persian div, a genius, whence Eol.  $\Delta \iota \beta \circ s$ , Lat. divus, Hebr. zui, splendor; Lat. diu, in the daytime; Gr.  $\Delta \iota s$ , Jupiter, originally the Sun;  $\Delta \iota s$ , divinus, and so forth.

This word makes the first part of  $\Delta torvoos$ , the Greek name of Bacchus, a word which has been strangely garbled by etymologists. In reality, dio signifies bright, and nasia, princeps. The Eolians changed a into v. Hence Dionysius will signify the bright Prince, or the Prince of Light, i. e. the Sun, who was indeed the original Bacchus of the Greeks, and Osiris of the Egyptians.

Ver. 6. Dyke] Heb. deik, munitio, propugnaculum; Gr. 761796. Hence all the progeny of that word throughout the Greek and Gothic dialects. Hence, too, the Gr. Jeiro, Jeiron, offendo, to point out, as from the top of a bulwark, fort, or tower. This word may be compared with the Lat. Specula, Specular, to view from a watch-tower. In ancient times

times it was the practice to erect watch-towers, or eminences, round the frontiers of a country, and in these to place a man, whose business it was to look out, and, upon the approach of an enemy, to alarm the country by lighting up sires. Hence the churim, vigiles, Hebr. Chald. alluding to the kindling up fires; the Gr. opeps, from the same idea; the Lat. speculatores, and the Scandinavian gokesmen.

Ver. 7. Clead] To this family belong the Gr. κλωθω, neo, and Κλωθω, the eldest of the Destinies.

Braw] From brage, mentioned in the Note on this word, we have the Engl. brag, braggodocio, importing originally loud-talking. The Persian word brag signifies shining, sparkling, and might be metaphorically applied to denote a person of shining talents, which exactly suits the Scandinavian brage.

Ladylike] Lady, compounded of Goth. *lhaif*, bread, and *dien*, to ferve, because the mistress of the family used to distribute the *bread* to the guests and domestics.

#### STANZA IV.

Ver. 1. Twa] Scots twa, Engl. two, Belg. twee, Swed. twa, Dan. toe, Sax. twa, twy, Pal. dwa, Ruf. twa, Lat. duo, Gr. δυω, Welch duy, Ger. zwan, Perf. do, Beng. dio, Malay duo.

VER. 2 Wee] Little. This word bids fair for being the root of the Greek 5105, a fon. Hence, too, we have the Spanish hijo, signifying the same thing. This is one of the many Gothic terms still subsisting in the Spanish tongue. Their etymologists tell us, that the word hidolgo, which, in their language, signifies a gentleman, is compounded of hijo

and

and algo, i. e. the fon of fomething. I believe they are miftaken. The word is made up of the two Gothic terms hijo and idely, or idolg, which last, in that language, fignifies a gentleman. A. S. adel athaling, nobly born.

Cock] The Celtic word kok fignifies red; whence Greek rounce, and Latin coccus, purple. Perhaps this bird was fo denominated from the red colour of his crest, or comb. Be that as it may, the creature is a native of Media, and therefore cannot endure the cold of these northern regions, without suffering very severely.

VER. 3. Shot] The root is the Scythian sket, an arrow. Perhaps it may not be amiss to enquire somewhat minutely into the origin and connections of this word, for reasons which will appear by and by. I shall not pretend to trace it through the Gothic dialects, all which it pervades, with little alteration of sound or signification. From the numerous cognates of this term, I shall single out the word skeit, or skout, which is nothing else but a modification of the original vocable. The present meaning of this word is universally known; but, I believe, sew are acquainted with its original and primary acceptation.

The Celtic or Gaelic word feuta denotes a vogabond, a refiless wanderer, one perpetually roving about, without settling in any particular place, or fixed habitation. From this definition it plainly appears that it is of the same samily with the word scout, mentioned above. This radical term, with the definition annexed, I owe to the translator of Ossan's Poems; and it enables me to ascertain the original import of two names, which have greatly embarrassed a multitude of critics, of different ages and countries. This word settle is, beyond all doubt, the original of the Greek savea, Scytha, a Scythian. The sound and signification of the Celtic and

Greek

Greek word fix the analogy to a demonstration. no doubt, applied to the Scythians, with a particular view to exhibit the roving, restless disposition of those people, who inhabited all the Northern regions of Asia and Europe. lagous to this idea, the Persians called the same people Saxai, Sacæ. Herod. l. 7. cap. 64. Old Herral Tavtas The Enubas xalessi Saxa:; " Now the Persians call all the Scythians, " Saca." The Persian word fack is plainly a cognate of the Hebrew Shakak, discurrere, discursitate, &c. The monofyllable root of the word is shak, or sheik, and alludes to the very fame restless, wandering disposition, that the word scuta does in the Celtic. Both the \_x, &ar of the Greeks, and the Sacæ of the Persians, were terms of reproach, imposed by hostile neighbours; and, of courfe, were never adopted by the Scythians themselves, who always assumed a more honourable denomination.

From the same word feuta, and for the same reason, was derived the opprobrious name Scot; a name detested by the Aborigines of the country, who always call themselves by the Gentile appellation, Albanich. During the lower ages of the Roman Empire, the Aboriginous Britons, whom the Romans, upon their first invasion, had forced to take shelter among the sastendard fallying from their strong holds, harrassed the Romans, and Provincial Britons, without distinction. As these people were perpetually roving about, and distressing the Province by desultory wars, the Provincial Britons, out of spite, branded them with the infamous epithet of feuta, in allusion to their wandering migratory course of life. The Romans soon caught the term from the Britons, and turned the word into Scotti, or Scoti.

In confirmation of this etymon, it may be observed, that, not many years ago, the Scots borderers used to call themselves felves fcuytes, and fkytes, as we learn from Cambden. Indeed, less than a century ago, the term was current in the North of Scotland. The Saxon-Scots readily adopted this name, being ignorant of the original import of it; but the Scoto-Brigantes, or Highlanders, have always deemed it a term of reproach, and, consequently, still retain their original denomination, Albanich.

From the same word Saca, or Sak, explained above, the Saxons who settled in the North of Germany seem to have derived their name. They were probably a colony of Scythian emigrants, who settled in that country, and brought with them the Gentile name Sak, which had become the general denomination of these tribes of Scythians who lived nearest the frontiers of Media, and the other Provinces of the Persian Empire. Certainly the etymon assigned by Verstegan, Sir William Temple, and others, who tell us, that it is derived from seaxen, or seaxes, is highly improbable. These seaxen, or seaxes, were weapons much used by the Saxons. They were crooked after the sashion of a scythe, with the edge on the contrary or outward side. The plural, formed by n, instead of s, made Seaxon, which (says Verstegan, p. 21.) the Latins turned into Saxons.

VER. 4. Bent] This species of grass is seldom produced in marshy grounds. It appears in greatest plenty on any sandy hillocks, especially on sandy grounds lying on the sea-shore, which we call links. In Erse it is called is sach, which signifies short, ill-grown; Scot. sitten. Our ancestors used to twist ropes of it, for several purposes; hence, perhaps, it might be called bent, from Islandic band, Saxon bandan, vinculum.

#### STANZA V.

VER. 1. Beggar] To beg, to ask alms; from the Goth-bidgan, Isl. bid, Sax. biddan, to pray; whence to bid beads. Perhaps it may have originated from the practice of beggars, who use to pray for alms. The Hebr. bag signifies meat, and is, perhaps, a cognate of this term.

VER. 2. Strae There is an obvious analogy between this word and the Gr. space, sportula; Lat. strae, sterne, to straw, to spread, to level. In this last sense, they seem to coincide with the word strath, (a level country, lying between two ridges of mountains) so common in all the Celtic dialects. Strath and straith are true Celtic words, a valley lying along a river. Vide Bullet, Dict. Celt. in Strat and Strah. To the same tribe belong Gr. spane, spane, spane, spane, or, strates or, Sc. These words were appropriated by the Greeks to signify a camp, an army, an encampment, Sc. because the original mode was to chuse large level plains for encampments. For the same reason, the word camp, from the Lat. campus, a plain, is used by the French, Spaniards, Italians, and English, to denote the same idea.

The Latin word flerno fignifies to make a bed, which was done by shaking, arranging, and levelling the flraw; whence appears the relation of the ideas. Both Greeks and Latins call a bed-stead torus, because it was formed of thongs of a bull's hide, employed in the same manner as we now do cords. Thus Ossian often mentions the binding of prisoners with thongs. We learn, too, that in that Poet's time, thongs of leather were used aboard of ships for ropes. The Chald. thor is a bull; whence the taupy of the Greeks, and the taurus of the Latins. From these two ideas of straw, and thongs of andressed leather, we may infer, that the ancients of every rank slept not more softly than our peasants do at present.

VER. 5. Koffers] Isl. kofe, domuncula; kofa, cavea, conclave. Here again we may recur to the Hebrew kaph, cavum, vola, manus, &c. Hence, too, we have the vulgar term coft, instead of bought, i. e. coffed, put into my coffer.

Kiffs] The root of this word is the Hebrew kis, loculus, marfupium, crumena.

#### STANZA VI.

VER. 2. Kirn] To the Author's numerous collections on the etymology of this word, we may add, that, agreeably to his idea, the Hebr. geor fignifies coire, convenire, in the fame fenfe that the Latins fay, in circulum venire. I cannot difinifs this word without venturing a few strictures on the very different ideas affixed to it.

Gur, a verb, fignifies, among other things, to fear, to be afraid, to dread. Gur, a fubstantive-noun, imports a firanger, an incomer, a fojourner. From the connection of these two ideas, we are led to infer the inhospitable character of the ancients towards people of a foreign tribe, or clan, who resided among them. Their hospitality to travellers, or passengers, was indeed almost unbounded; but with respect to foreigners who settled in their country, the case seems to have been widely different, as it still is in many places of the distant Highlands: Hence, I suppose, the many injunctions we meet with in scripture, inculcating beneficence and tenderness towards strangers.

From magor, or megor, a compound of this word, we have Mægara, the name of one of the furies of hell, importing terror, difmay, &c.

From another compound of the word magur, habitatio, commoratio, we have the Greek μεγαρου, domus, domicilium, any large repository, or magazine; a word very

common in Homer. From Megurah we have Megara, a city of Greece, mid-way between Athens and Corinth. Garuth, hospitium, is the very same with the Celtic ghwarth, a fort or castle. The same word produced the Persian ghert, guerd, a city, from which we have a numerous samily of descendants in all the Gothic dialects. This word is likewise the parent of the Lat. migro, to remove; or, as we say in Scotland, to stit.

In the notes upon this word, which indeed shew a vast extent of etymological learning, the Author deduces the Greek ayona, from the the primitive gur: To me it seems rather to be formed from the presect. med. of the verb ayespa, congrego, which is derived from the Hebrew ager, collegit, congessit.

Ver. 2. Butt] This word, with all its numerous progeny, was imported from Perfia, where it appears nearly in the fame form, bad, bod, bud, fignifying, in that language, a house, a dwelling, an abode, the very fame with the German and Scandinavian word in question. It is indeed the Hebr. beth, beith; Chald. bith; Arab. bait; Egypt. but. In Egypt, the place into which the initiated were put was called by this name. See Hesych. in voce. Also,  $\beta_{2715}$ ,  $\beta_{20715}$ , and, without the Greek termination but, bot, was a kind of ship, resembling a floating-house or booth. From the same word we have the Greek  $z_1\beta_{2715}$ , a wooden ark. Comp. of the Hebrew geb, gibbus, and bot. This word might be traced through a multitude of languages, and was, no doubt, a primæval term.

VER. 4. Ben] To the numerous etymologies of this word traced by the Author, I shall presume to add one more, which will lead us back to the same original with but, of which it is the opposite. In the Chald, we find the word benin, benina, Ezr. v. 4. signifies ædiscium, a house, a dwelling, from the Hebr. bana, ædiscavit. From benin we may, with

out any violence, deduce the word ben, in the fame manner we do butt from beth.

#### STANZA VII.

VER. 8. Bann'd] This is another word of Persian extraction. In that language the word bend signifies a chain, and metaphorically an obstacle, a barrier, a wall.

#### STANZA VIII.

Ver. 4. Frae The fame nearly with the Gr.  $\pi \alpha \rho \alpha$ . The radix is the Hebr. pharad, or phrad, separavit, sejunxit. The root is phar, phara; or, without the point, phra. It is certainly connected with our words far, frae. Of this word phar, and Chald. bara, is formed the Greek Bapsapos, a Barbarian. In the oriental dialects it signified agressis, rusticus, a peafant; what idea the Greeks annexed to its derivative, is too well known to need to be mentioned.

The Author has fomewhere observed, that there is certainly a very strict connection among the particles of almost all languages. This observation is founded on fact; and I may add, that the not understanding the nature, relations, signification, and original import of these seemingly unimportant terms, has occasioned not only great uncertainty, but numberless blunders, in translating the ancient languages into modern tongues. The Greek language, in particular, loses a considerable part of its beauty, elegance, variety, and energy, when the adverbial particles, with which it is replete, are not thoroughly comprehended. An exact translation of these small words, in appearance insignificant, would throw new light not only on Homer and

Hefiod,

Hesiod, but even on poets of a much posterior date. Particles, which are generally treated as mere expletives, would often be found, energetically fignificant. It is, however, altogether impossible to succeed in this attempt, without a competent skill in the Hebrew, Chaldean, Syrian, Arabic, Perfian, Phonician, Gothic, and Celtic languages. Such an extensive acquaintance with languages is, it is true, feldom to be found in one and the fame person. I shall here take the liberty to mention a few of the most familiar of these particles, one or other of which occurs in almost every line of Homer, and which, I am perfuaded, are generally mifunderstood. Such are dr, fa, usr, 11v, uar, ua, To1, ye, ox, yer, apa, pa. All these particles are truly significant, and, if properly explained, would add confiderable energy to the clauses in which they fland; but this disquisition must be left to the learned Philologers of the Universities.

VER. 7. Laith] The Author adduces very plaufible arguments to prove, that the Greek word exercs is derived from laith. I shall, however, adduce another etymology, and leave the choice to the judgment of the reader. In the Hebrard Chald. we have the word cheleg, plur. chelegim; or, as some pronounce them, eleg, plur. elegim, lisping, stammering. In ancient times, exercise signified the same with  $\theta_{pnro}$ , lamentation. Those who lament use a whining tone of voice; which circumstance, perhaps, gave birth to the word.

### STANZA IX.

VER. 7. Town To the Author's quotation from Tacitus, may be added another from Cafar de Bel. Gal. l. 5. cap. 21.

STANZA

# STANZA X.

VER. 7. Ca'] Few words pass through more languages, and with less variation than this. Its root is the Hébrew kel, vox. Its cognates and derivatives spread themselves through the Arabic, Syrian, Chaldean, Persian, Greek, Latin, and Gothic, and are a striking instance of the universality of the primæval language.

It has been observed, in the course of these Notes, that the German and Scandinavian tongues abound with vocables of the same sound and signification. There are only two ways of accounting for this appearance: First, by supposing that these coincident terms were parts of the universal original language spoken by Noah and his family on the plains of Shinar, and preferved after the confusion of tongues at Babel: Or, fecondly, by granting, that Colonies emigrated from the neighbourhood of Media and Persia, and at last settled in Germany and Scandinavia. Perhaps it might be owing to both causes. Without entering into a minute discussion of this point, which the bounds I have prescribed myself will not permit, I shall only observe, that the Median and Armenian tongues were different dialects of the same language. The Armenians, Syrians, Chaldeans, refembled one another in features, language, and manners. Again, the Phrygian and Armenian tongues bore fo near a refemblance, that many have thought the former were descended from the latter. The Thracians and Phrygians are faid to have been the fame people, and therefore spake the same language. The Thracians and Getæ likewife spoke only different dialects of the same tongue. The latter fpread thenifelves far and wide towards the West and North; probably they over-ran a considerable part of Germany, and forced their way into Scandinavia. Some have thought that the Goths and Getæ were the fame people. This, however, is a vulgar mistake, arising from the ignorance of the historians of the lower ages of the Roman Empire. If the links of this chain shall happen to be firmly connected, we need not be surprised at finding a great number of words pervade all the dialects spoken by these different and very distant nations.

## TO THE READER.

In the Preface and Notes to the Gaberlunzie-man, I have endeavoured to make my Readers acquainted with the true fystem of rational Etymology, which consists in deriving the words of every language from the radical sounds of the first, or original tongue, as it was spoken by Noah and the builders of Babel. Many of these are preserved in the several dialects now in use over this globe, and every day brings more of those roots to our knowledge, as we grow better acquainted with the languages spoken by the several tribes of mankind. But the large collection of these radical terms will, one day, be laid before the Public, under the title of a Scoto-Gothic Glessary, if Heaven shall bestow health and leisure to complete the work.

Mean while, the Reader will be able to form some idea of my plan from the Notes on the preceding Poem; and, in the following observations, I shall confine myself to a more narrow circle of investigation, elucidating our ancient language from the later dialects of the primæval one, the Gothic, Islandic, Teutonic, and Anglo-Saxon.

To relieve the Reader from the tedious uniformity of etymological disquisition, I have interspersed some observations on the manners and customs of our ancestors, during the middle ages, which, I hope, will prove not unacceptable to the curious antiquarian.

Mr Ramfay has certainly departed very often from the orthography of Bannantyne's M. S. As I have no opportunity to confult that book, I have given fuch readings as appear to me most consonant to the phraseology of the sixteenth century.

The learned Bishop Gibson seems to have forgot that he was publishing a Scottish Poem—his orthography and idioms are quite English.

CHRIST's

# CHRIST'S KIRK ON THE GREEN\*.

Ť.

AS ne'er in Scotland heard or feen Sik dancing nor deray, Nowther at Falkland on the green, Or Peebles at the pley,

As

Christ's Kirk on the Green It is not easy to assign the real name of the Author of this truly comic performance.—
Tradition gives it to one of the James's, Kings of Scotland; and we find two of them named, James the First, and James the Fifth. In the Evergreen, it has the following note at the end, Finis, quod K. James I. Drummond's History of the James's, p. 16. says, "This Prince was well skilled in Latin and English poetry, as many of his verses yet extant do testify." While this historian does not tell us what-poetical N 2 performances

\* Kirk-town of Leslie, near Falkland in Fife.

<sup>†</sup> Vide Joan. Majoris Hist. Britan. in vita Jacob, who mentions the first two or three words of some of these Poems abruptly, but surnishes his Readers with no more; so it would appear these are all now lost. But Major is a trivial writer, devoid of all taste.

performances the King left, we cannot, with certainty, ascribe this little poem to him; especially as the language appears rather more modern than the year 1430. James I. was murdered Anno 1436. Maitland \* talks as if many of James's writings were yet extant; but, in his usual way, he only copies Drummond. Vide bottom of the preceding page.

Many different writers have faid that this Ballad was composed by James V. and many arguments are advanced for this opinion; such as, the exact description of the manners and character of our Scottish peasants, with which James V. was intimately acquainted, as he delighted in strolling about in disguise, among the lower people and farmers; in which excursions he sometimes met with odd adventures, one of which he is said to have made the subject of his Gaberlunzieman, which we have, therefore, prefixed to Christ's Kirk on the Green; and, indeed, the style and strain of humour in both are perfectly similar.

The poetical talents of James V. made him known abroad; and it is to him the following verses of Arios. do refer †:

- " Zerbino di bellezza, edi valore,
- " Sopratutti Signori era eminenti," &c.

And, in the following Stanza, we find what country Zerbino belonged to:

- " Pero, che data fine a la gran festa,
- " Il mio Zerbino in Scotia fe ritorno."

Ronfard, who accompanied James's Queen from France, and was his domestic fervant, describes him thus:

" Ce

<sup>\*</sup> History of Scotland, p. 613.

<sup>†</sup> Orlando Fur. Cant. 13. Stan. 8. 9.

- " Ce Roy d'Escosse etoit en la sseur de ses ans,
- " Ses cheveux non tondus, comme fin or luisans,
- " Cordonnez et crespez flottans dessus sa face,
- " Et fur fon cou de lait luy donnoit bon grace.
- " Son port etoit royal, fon regard vigoureux;
- " De vertus, et d'honneur, et de guerre amoureux;
- " La douceur et la force illustroit son visage,
- " Si que Venus et Mars en avoient fait partage."

Maitland's Suffrage, concerning the taste of James V. for poetry, were it of any avail, might be added; but he only copies servicely from others.

There have been a good many different editions of this little Ballad, and the oldest I have met with is one printed at Oxford in quarto \*, and illustrated with Notes by the learned Bishop Gibson, in which he has shewn much knowledge of the ancient Northern languages. As the spelling, however, of his edition is widely different from that used by the best of the cotemporary authors, I have followed, in this one, the orthography of the collection called *The Evergreen*, but much corrected, as more truly corresponding to the Scottish idiom and pronunciation. The Notes of the learned Bishop are distinguished from those of the Editor by the letter G.

In the edition by Bishop Gibson we find two entire stanzas more than in that of Allan Ramsay, which, he says, were copied from Bannantyne's M. S. Collection of Scottish Poems, in Lord Hyndsord's library, now in the Advocates library, to whom his Lordship presented it, written in the year 1568. These we have retained, as they are evidently in the same style and manner as the others, and even appear necessary for connecting the story. They are also warranted by Gibson's edition, being printed thirty-three years earlier than that of Ramsay.

There

There are feveral variations in the reading of these two editions, which we have marked in the Notes; but we have principally followed the spelling of Ramsay's edition corrected, the Bishop having often adopted not only the English orthography, but even the phrases of that language.

We have only to add, that if the little specimen now given of our ancient poetry shall prove acceptable to the real judges of good letters, and the public in general, it is designed to print a full collection of all the Scottish Poems which appeared before the seventeenth century, illustrated with Notes, in the manner of those that follow; in which undertaking we look for the kind affishance of all who love the language and antiquities of our country, and who wish to preserve the poems of our ancestors from oblivion.

" Nobis pulchrum imprimis videtur, non pati occidere quibus aternitas debeatur," as Pliny the younger fays, L. 5. Ep. 8,

#### STANZA I.

VER. 2. Deray] Jollity and merriment; feasiing and frolicking, which are generally accompanied with riot and disorder. In this sense G. Douglas uses it \*:

- " Of the banket, and of the grete deray,
- " And how Cupid inflames the lady gay."

And, speaking of the disorder in the enemy's camp, made by Nisus and Eurialus †:

" Behaldand al there sterage and deray."

Ruddiman

<sup>\*</sup> Virgil, p. 35. l. 12. † Ibid, p. 288. l. 16.

Ruddiman derives the word from the French defroyer, which Pasquier explains, tirer hors de voye, ou de roye. Hence arroy, and our word array; and disarroy, disarray. From descroyer this critic also deduces the Scots word royd, or royet, romping, frolicksome; taking away the first syllable, as in skirmish, from escarmouche; sample, for example; uncle, from avunculus; spittal, for hospital.

Thus far Mr Ruddiman, who, had he been better acquainted with the Northern languages, would have known that the origin of this word is of much higher antiquity than the old French he quotes. Rud, in the Gothic, fignifies line, or order. Thus, in one of their old books \*, Then kunungr the hawær kuninglikt wald met arfde rad, That King who fucceeds according to the line of fuccession. Islandic raud and rada, to put in order; Saxon, na der radt, according to order. In the Scythian dialects we find this ancient word varied by many different terminations. Alam. ruava; Angl. row; and the Scots, who, we shall often find, retain the ancient Gothic pronounciation, fay, raw; Welsh rigwun; Fenn. riwi; Ital. riga. Hence the French raye, and, by inserting an n, rang, whence we form rank; Belg. rege, rijge, whence the Scottish rig, a ridge of corn, from its streightness and regularity. In Ulphila we find, Rathjan +. garathanu find alla izwara tagla haubidis, Numbered are all the hairs of your heads ‡. In Swed. rakna, to reckon or number; Lat. ratio.

As the ancients generally used counters in summing up their accompts, disposed in rows, rad is the common phrase on such occasions in the dialects of the North. Hence Attradur is he who

<sup>\*</sup> Kon. Styr. p. 24. apud Ihre, Lex. in Rud. † Joh. vi. 10. † Matth. x. 30.

who hath attained to the eight line, i. e. fourscore years; Nirædur, a man ninety years old; Tha var Haraldur Konung aatradur at aldoi, King Harald was then eighty years old \*. And in the Islandic bible †, Abram bafdi sex um attræt, Abram was eighty-six years old.

Ver. 4. Peebles at the pley In the old writers we find this word used in several senses. To pley is to plead, carry on a law suit; Belg. pleyten. In Welsh we find the word pleidio, to act as advocate for any. Vide Jun. in Plead. Douglas, Virg. p. 73.

" \_\_\_ Follow our chance bot pleys."

i. e. Without disputing.

And p. 445.

"The auld debate of pley, or controverfy."

P. 3. 34. But pleid, Without controversy. Now, as our ancestors always resorted to the courts of law, armed and attended by their vassals and dependents, it often happened that their differences were decided by sharper weapons than lawyers tongues. Hence the A. S. plegan, to strike, to wound in war; plega-gares, the play of spears. Cædmon, 45. 11. Heard hand-plega, The hard play of hands. Vide Lye, Lex. Sax. in Plega. Hence Spelman in Archeol. derives plea from pleah, damnum, periculum. Play, or pley, was hence used to denote tilts and tournaments, as at these meetings it was very frequent with the knights to give proof of their address and valour in mock engagements, which, however, often terminated in blood. The ladies always were present at such meetings, and gave the prizes.

--- « of

As was of wooers as I ween
At Chryst's Kirk on a day;
There came owr Kittys washen clean,
In new kyrtills of gray,
Fow gay that day.

II.

" of wit and arms, while both contend "To win her grace, whom all commend." Milton.

The town of Peebles was, in ancient times, a place of some note. Here was a considerable Priory; and, being the largest town in that district of Scotland, it is likely that frequent and numerous meetings were held here. The open plains, too, round this city, made it a very proper place for tournaments, and other warlike exercises. Pley, the customary meeting. Isl. plaga, Goth. plaga, folere, also exercere. It is probable one of these exercises gave rise to a Scottish Poem similar to this, entitled Peebles on the Play, said to be preserved by the Reverend Dr Percy of Carlisle.

VER. 5. Ween] Suppose; think, Sax. wenan, opinari; Goth. wenian, Gibson. In the Alemanic it is wanen. The root is in the Gothic wenian. Thus Ulphila, Luke iii. 15. At weniandein than allai managein, All the people thinking. Confer Jun. Lex. Ulphil. Wende, in Chaucer, to think or consider. Tr. lib. 3. 1547.

" And in his thought gan up and down to wende."

VER. 7. Kittys Teither from Kate, Katie, the common diminutive of Catherine; or from their playfulness as kittens, or Scot. kitlings, young cats.

VER. 8. Kirtle] Mantle. Ifl. kiortell. Of old we find the same term applied to the gowns worn by the men-

Thus

II.

To dans thir damysells them dight,
Thir lasses light of laits;
Thir gluvis war of the rassal right,
Thir shoon war o' the straits.

Thir

Thus Franco-Goth. Ung aultre lui vessira un kyrtel du rouge tartarin. Vide Cange, Gloss. Lat. vol. 4. p. 737.

### STANZA II.

VER. 1. Dight] Prepared, or made them ready. Sax. Dightan, parare, instruces; vox Chaucero ustatissima. Thus, dighteth his dinner. To bed thou wold be dight. His instruments wold be dight.—Gibson.

May it not rather be derived from deccan? Sax. Metaphor. Excolere, ornare. Alam. Thecan. Perhaps, too, we are hence to derive the word deck of a ship. Mr Ruddiman (Gloss. to Bishop Douglas) observes, that in Cheshire the word dight is used in the opposite sense to foul or dirty; but this is only provincial, like many other corruptions.

VER. 2. Laits] If this word is rightly copied from the M. S. it may fignify nimble, or light-footed. Goth. laiftjan, fequi. Vide Jun. Gloss. Ulph. in voce. Thus Luke ix. v. 59. Laissei mik, Follow me. Theotis. Gloss. Kalepodia. leist. Dan. lest; Angl. last, on which the shoe is formed. Hence Sax. sotlast, vestigium, footstep. Vide Ps. lxxxvi. v. 19.

VER.

Thir kirtles were of Lincome light,
Weel prest wi' mony plaits;
They were sae skych, whan men them nicht,
They squeil'd like ony gaits,

Fu' loud that day.

III.

VER. 3. Gluvis] So our ancestors spelled gloves. Sax. gloses. Jun. in Etymol. observes, that in Danish they are called haand-kloffuer, from haand and kloffue, to split or divide, which gives the true idea of the word glove. Hence glosar, gloar, glose, glove.

Raffal] I don't well understand the meaning of this word; but, from analogy, it must signify gloves of rough leather. Celt. craf, nails of the singers—a file—every thing that scratches. Hence skins dressed in a rough manner, with coarse instruments, and not smoothed. Confer Bullet in V. Craf.

VER. 4. Straits ] Quære, Is this what we now call Morocco leather, from the Straits of Gibraltar?

VER. 5. Lincome] Is this rightly copied from the M. S.? VER. 6. Plaits] Folds. Douglas, p. 298. v. 4.

" And he his hand plait on the wound in hye."

Plait, nectere, contexere; Gr. TARKELV; A. S. plett, pletta, a sheep-fold, they being of old made of wicker work. The Scots called them faulds, for the same reason, and the English folds.

Ver. 7. Skygh] Shy. Skygg bosta, a shy horse.-Jun.

VER. 8. Squeil'd] Shrieked. Sueo-Goth. fqwallra, blaterare; fqwala, incondite vociferare; Angl. fqueak, fqueal. Douglas, of cattle, p. 254. 40.

0 2

" Bayth fqueil and low."

And p. 248. 36.

" With loud voce fqueland."

It is used metaphorically to accuse; Sqwallra uppa engaliquem accusare; Vide Ihre Lex. Sueo-Goth. in Sqwallra-Sqwallungar, crying children, squaling brats. Suio-Goth. skall, sound; Alam. scall; Germ. schall. "Usurpa-"tur a nobis," says the learned Ihre, "vel pro sonitu for-"tiori in genere, vel etiam in specie, quum multitudo, edito "clamore, feras in casses propellit." Hence skallalaghe, society of hunters; skalra, to cry out; skalla, to bark or howl as a dog. Hence skalla, a small bell, which was hung to the robes of men in power, that the passengers might make way for them. Chron. Ryth. Min. in Præsat.

- " Kunde han danza, springa ok hoppa,
- " Han skulle jw hafwa skallo, och forgylta klocka."
- "If he only could dance and hop gracefully, he had immediate by gilded bells given him." Confer Ihre in Skalla. The old French Romance De la Viollette, ap. Cange in Mantum, describing a rich robe:
  - " Et ot a chascune flourette,
  - " Attachie une campanette.
  - " Dedans si que rien n'en paroit,
  - " Et si tres doulcement sonnoit,
  - " Quant an mantel frapoit le vent."

The antiquity of this ornament appears from the facerdotal robes of the Jewish priests, and those used by other nations. Apul. Met. Lib. 10. Et pictilibus balthæis, et tinuinnabulis perargutis exornatum. Adde Eccard. ad LL. Salic. p. 151. where he observes, that the Ital. fquilla is of the Gothic family. In the Latin of the middle ages we have fchilla—clquilla.

III.

Of a' thir maidens, myld as meid,
Was nane fae jimp as Gillie;
As ony rose her rude was red,
Her lyre was lyke the lillie:

But

efquilla, and fquillare, for fonare. It was also the custom to hang bells to the necks of cattle, that they might be more casily found in the woods: And hence the penalty in the Salic Law, cap. 29. against him, Qui skellam de caballis furaverit. Confer Cange in Tintinnabulum.

Ver. 8. Gaits Goats. Sax. geit, gat; Isl. geit, capra; Goth. gateins, hædus.—Gib.

This is one of the many examples where the Scots have retained the orthography and pronunciation of the mother language, more exactly than the English.

#### STANZA III.

VER. 1. Meid] Mead, hydromel, a favourite drink of our ancestors, and also of the Scandinavians, as we learn from Snorro, and all the Northern historians. Mead and ale, called by them ol, were the constant beverages used in their feasts; Gujus frequentissimus usus est in frigidis terris, says Olaus Magnus, lib. 13. cap. 21. where he has given us an account of the different methods they used in preparing that liquor, which may be of use to our modern brewers. Vide cap. 22. 23. 24. It is called by the Icelanders mied;

Fow zellow, zellow, was her heid,
And fcho of luve fae filly,
Thocht a' hir kin had fworn hir deid,
Scho wald hae nane but Willie,
Alane that day.

IV.

Alam. mede; A. S. medu, meodu; Welsh, meddeglyn, hydromeli; Gr. usfo, vinum.

VER. 2. Jimp] Slender, handsome, G. Gim, gimp, complus, bellus, concinnus; Welsh, gwymp; Armor. coant, pulcher.

VER. 3. Rude] Blush. Sax. rudu; Cimb. rode, rubor. Properly complection, the verecundus color of Horace, Epod. 17. Chaucer, Sir Topas, v. 13.

" His rudde is like scarlet in graine."

Douglas, Virg.

" So that the rude did in her viffage glow."

Jun. Etymol. quotes from Josephus, the 'podavo' To sometos, the roseate colour of the skin, which perfectly expresses the rude of our Poet.

VER. 4. Lyre] Bishop Gibson derives this from the Cimb. hlyre, or the Sax. hleare, gena, maxilla, mentum, facies, vultus, quoting that of Chaucer:

" Saturn his lere was like the lede."

But the learned annotator is certainly mistaken; for it comes from A. S. lire, which signifies (fays Lye) Pulpan, quicquid carnosum est, et nervosum in homine, ut earstyre nates, scanclira,

fcanclira, fura. Thus it means in general fless, as in Wallace's History, b. 7. c. 1.

Burnt up bone and lyre."

And elsewhere:

" Through bone and lyre."

Douglas, Virg. p. 19. 35.

"Syne brocht flikerand fum gobbetis of lyre."

And p. 456. 1.

" Wyth platis full the altaris by and by,

" And gan do charge, and wourschip with fat lyre."

VER. 5. Zellow Thus our ancestors used the z, though they always pronounced the words fo spelled as if they had been written with the letter y. The reason seems to have been, that the gh, to which y has fucceeded in later times, had been taken by ignorant transcribers for an z, as it bore some refemblance to it in the Saxon writing. This feems the more probable, as we find the Anglo-Saxon character still in use after the conquest; and, even under Edward the Third, the Monks blended Saxon letters with the Roman. See Mandeville's Travels, printed at London 1725, and Robert of Glocester's Chronicle in 1724, exactly after the original MSS. Hence, too, we must account for the changes we find in the names of many places. Thus, Yetland was the original name of the island which, from the above-mentioned mistake, came afterwards to be written Zetland, and which is now corrupted, by vulgar use, into its present form Shetland.

Though the z be used in the Gothic tongue, (Vide Ulphila's Gospels passim) yet it is not found in the Islandic alphabet, nor is it much used in the Sueo-Gothic; so that the learned Ihre calls it *Literam Suecis peregrinam*. The figure

### IV.

Scho fkornit Jock and fkrapit at him,
And murgeon'd him wi' mokks;
He wald hae luvit, fcho wald not lat him,
For a' his zellow lokks;

He

z much refembles the Saxon g, which the later English have changed in most words into y; as geard, yeard; gea, yea; gear, year; geong, young; and the Scots still more frequently, (as Ruddiman observes) even where the English retain g; as yate, for gate; foryet, for forget, cc. Junius has ranged all the words in Douglas's Virgil, which begin with  $z_4$  under g. Vide his Gloss.

### STANZA IV.

VER. I. Skrapit] So Ramfay's edition. Bishop Gibson reads skripped, which he explains, "Made a courtie to him in a mocking manner." "Vox deducenda videtur (adds he) per metathesin et syncopen a Cimbr. skapraunade, opprobrio vexabat. Bibl. Island. I Sam. I. 6.

Perhaps this word may be, with more facility, derived from Suco-Goth. fkrapa; A. S. fcreope, a scraper; screopan, radære, scalpere. Hence the saying, Fa en scrapa, to be blamed or mocked. Perhaps our phrase, To fall into a scrape, may have originated from this. Shall we look here, too, for the root of the Latin crepo, increpo, with the s presixed, as the Goths usually do? Similar metaphor in the French, Etriller de paroles.

We have further to observe, that the Goth. skrap properly signisses useless fragments of any thing, which we call scraps. Hence metaphorically a lazy useless fellow. Ansg. Saga cap. Ihre Lex. in Skrap, Thu est messa heims skripe, Tu omnium bipedum ignavissimus es. As such people are often vainglorious, we have the verb skrappa. Jactare se, gloriari, skrappa vet skryta. Hence Lat. crepare, in the same sense. Skrap, jactatio, ostentatio.

VER. 2. Murgeon'd ] Made mouths at him, G. The A. S. murcnung, murmuratio, querela, querimonia; Goth. and Isl. mogla, murmurare.

VER. 3. Luvid ] This may be understood in the common acceptation of loving. But our ancestors used it for praising. Thus Douglas, Virg. p. 455.

- " How Eneas, glaid of his victory,
- " Lovit the goddis, and can them facrify."

Bruce's Life, p. 248.

- " They loved God, and were full fain,
- " And blyth that they escaped so."

Perhaps from the French louer, says Ruddiman; but this word is formed from Goth. lof, praise. The words, in that language, lost, lust, lysta, all denote something high and losty. Loswa, laudare; Island. leiva. In the Havamal, Atqueld skal dag, leiva konu tha kender, make er reindur, is tha yser um killmer, i. e. Praise the day when evening is come, a wife when you know her, a sword when you have tried it, and ice when you have passed it. Lossig, laudable; losord, commendation.

He cherish'd her, scho bid gae chat him, Scho compt him not two clokkis, Sae schamefully his schort goun set him, His legs war lyke two rokkis,

On rungs that day.

V.

VER. 5. Chat him To go about his business, G. Properly to take care of himself, and not attend to her, from the Gothic skota, curare. Chron. Rython. apud Ihre, Lex. p. 619.

- " Han wille thet intet fkota;
- " Parum id pensi habebat."

Ist. Skeita. Job 18. Thes sem ecke skeita um gud, qui deum non curant. The same learned and most ingenious etymologist observes the correspondence of the Fr. Il ne me chaut, I care not; from the old chaloir. He adds, Credo nostrum a skot sinus sactum, ut a sinus sit insinuare, adeoq; propriè usurpatum suisse de infantibus qui in sinu portabantur, unde hodieq; skoting dicitur tenellus, quem nondum de sinu deponere licet. Hence applied to other things, Skota sit ambele, to look after his charge. Adde Douglas, p. 239. v. 30.

VER. 6. Clokkis] Beetles, scarabæi, G. True, the beetle in the Scot. is clok; but perhaps it means here, she valued him no more than the cluk of a hen, which our ancestors pronounced clok, from the sound the hen makes.

VER. 7. Schort Goun] Till the French taught us to wear our clothes short in the present fashion, the gown, covering the knees, was universally wern both in England and Scotland. Hence Jun. derives it from your pro youara, genua.

But

But the etymon is from the Welsh grun, a gown or cloak, from gunio, suere. In the True Protraiture of Geoffrey Chaucer, the famous English poet, as it is descrived by Thomas Ocleve, who was his scholar, and is generally put before the title-page in the old editions of Chaucer, we find him cloathed in the true English gown, close gathered at the collar and wrifts, and flowing loofely down from the shoulders to the knees. The form of this garment we had from Germany; and it feems to have been imported by the Saxons, as it was worn all over Germany. Vide Spelman in Guna. The opulent had their gowns lined with ermine, and other rich furs; the poorer people with hare and sheep skins. Boniface, Archbishop of Mentz, epist. 89. Gunnam de pellibus Jutrarum factum fraternitati væstrie misi. Vinea Benedict, cap. 5. Senibus nostris gunnas pelliceas tribuimus. Sometimes wrote gonna. Thus Gul. Major, apud Cange, in Gonna; Canonici ejusdem ecclesiæ in gonnis suis. In old French .Gonne. In the Romance of Guillaume del. Nez:

- " Or feraigre, fil me tollent ma gonne."
- And ibid. apud Cange ubi sup:
  - " Laissa le siecle, pour devenir prodhom,
    - " Et prist la gonne, et le noir chaperon."

As guna, or gown, denoted the men's garment, the women's was called, in the barbarous Latin of the middle ages, gunella, because made pretty near in the fashion of the men's robe. Ital. gonella; Fr. gotillon, cotillon. Cluverius Germ. Ant. I. I. C. 15. derives gunam a gonaco, quod Varro majus sagum interpretatur, vocem Græcam esse ait. Hysech. καυνακα, ερωματα, ή επιβολατα επορυμαλλα, stragula, altera parte villosa. We shall, in another work, prove evidently, that numbers of the Greek words are formed from the Gothic, of P 2

which this is one, the robe itself being of Gothic, and not Greek invention. We find a Count of Angers sirnamed Grise-gonelle, from his wearing a gown surred with that colour. Vide Cange Gloss. in Griseus color. And we find an Epistle of Pope John, solemnly addressed to him, Gossrido Grisia-gonellas cognominato, nobillissimo Andegavorum comiti. The men's gown is sometimes called cappa. Baldricus in Gest. Alberonis, ap. Cange, ubi sup. Clericali se togo induit—et cappa de panno grisco se super induit. Hence the saying of Henry IV. of France: "Je ne suis q'un pauvre "here. Je n'ai que la cappe et l'espée."

VER. 8. Rokkis] Rock, in Gothic and Islandic, properly denotes a heap of any loose things flung together. Thus rock boys, a heap or rick of hay; and thus it is still used in Belg. Hence transferred to a heap of lint or wool put upon the stick for spinning. The transition was easily made, when rock was used to denote the piece of wood to which the lint or wool was fixed. Thus the Chron. Ryth. apud Ihre Lex. in Roak, p. 496.

- " Quinnor tager theras hæst ock harnijsk ifra,
  - " Ok monde them med rockin fla."
- " Women took the horfes and breastplates from the men,
  - " And beat them with their rocks."

Ist. rock, and apud Kilian. Lex. Tuet. rocken, pensum colo aptare. See the learned Ihre, Lex. Suco-Goth. in vocc. Mareschall Obs. ad Vers. Angl. Sax. 4. Evangel. informs us, that in the times of Paganism, the belt of Orion was, by the Scandinavians, called Frygr rock, colum dex Fryggx. Thus the girl here compares Jock's gown to an ill shaped heap of lint on the rock. Might not his ill-shaped legs, if slender, &c. be compared to the rock or distaft? Another Scot-

tish Poem describes the legs like barrow-trams. Perhaps, too, rock may here be meant of the gown he wore, which looked as if it had been hung on a pole; for rock Goth. and A. S. rocc; sign. toga, vestis exterior; Al. rokk. In the barbarous Latin, roccus, rocbus. Vide Cange Gloss. in voce. Gall. rochet. Whence we call the outer-garment of a sucking-child a rochet, or rachet, and the English, putting f before, have formed their word frock; Gall. froc. Stadenius derives rock from rauh, rough, hairy. Ulphil. rih, as our ancestors sirst were clothed in skins, and after wool came to be used, they continued to line their gowns with surs of different kinds. The Finlanders still call a surred gown roucka, and the bed-coverings they use, made of sheep-skins, are named roucat; whence our rug.

From this origin comes rocklin, the linen veitment worn by the priests; the bishops rocket. Thus Histor. Sigisfmund. ap. Ihre Lex. vol. 2. p. 450. Aslagges prastens hwita rocklin, abrogatur sacerdotis linea toga. This word was used in the same sense by the ancient Latins, as we see from Festus; Rica, vestimentum quadratum, simbriatum, purpureum, quo Flaminæ pro palliolo utebantur—Titinius, Rica et lana sucidei, alba vestitus. Our readers will find many learned and critical mistakes in the notes on this passage, which is quite plain to those who know that it is a Gothic or Scythian term, as many more of the ancient Latin words are. Confer Jun. Etym. in Rockette; Spelm. in Rocketum.

VER. 9. Rungs Round and long pieces of wood. Vox in usu apud Anglos boreales, G.

Properly poles, or long staves like hunting poles, frequent in Douglas, and our old writers. Skinner says the carpenters call those timbers in a ship, which constitute her floor, and are bolted to the keel, rungs.

STANZA

V.

Tam Lutar was thair minstrel meet;
Gude Lord! how he cou'd lans!
He playt sae schill, and sang sae sweet,
Quhyle Towsie took a transs.

Auld

## STANZA V.

VER. 1. Minstrel] This term was indifcriminately applied to the harper, the fiddler, or the player on the bagpipe. menestrier. It appears to be derived from A. S. minster; and those called minstrells were employed in the public worship of the cathedrals as fingers, (vide Jun. in voce) in the fame way the Welsh called musicians cler, as employed in the same Those minstrels, during the middle ages, united the arts of poetry, instrumental and vocal music, their songs being always accompanied with the harp. Thus, too, our Poet represents his minstrel, in ver. 3. below, as playing and They feem to have been the genuine fucceffors of the ancient bards, who, under different names, were admired and honoured from the earliest ages among the Gauls, British, Irish, and Scandinavians; and, indeed, by all the first inhabitants of Europe, whether of Celtic or Gothic origin. were eafy to add many curious particulars concerning this once famed race of musicians and poets; but we refer our Reader to the elegant differtation on the ancient English minstrels. prefixed to the Reliques of Ancient Poetry, where we find it observed, that the light of the song (to use Oslian's expression) never arose without the harp. Douglas, Virg. 250. 18.

- 119
- " Syne the menstrallis, singaris, and dansaris,
- " About the kyndlit altaris."

Du Cange has collected a number of curious anecdotes concerning these minstrells, voce *Ministelli*. The usual theme of their songs we may learn from an old French romance, quoted by this lexicographer:

- . " Quiveut avoir des bons et des vaillans,
  - " Il doit aler fouvent a la pluie et au champs,
  - " Et estre en la battaille, ainsi que fut Rolans,
  - " Les quatre fils Haimon, et Charlons li plus grans,
  - " Li dus Lions de Bourges, et Guion de Connans,
- " Percival li Galois, Lancelot et Tristans,
- " Alixandres, Artus, Godefroy li Sachans,
- " Dequoy cil menetriers font les nobles Romans."

VER. 2. Lans] To run or skip; metaphorically to dance. Arm. Lanca, jaculari, lanceam vibrare. The minstrels, in general, could acquit themselves as dancers, as well as singers and poets. Douglas, Virg. p. 297. 16.

- --- "Turnus lanfand lightlie over the landis,
- " With fpear in hand purfewis."-

Some think the phrase to launch a ship, comes from this word. Vide Essay presixed to Reliques of Ancient Poetry, p. 41. This ancient Celtic word has pervaded many dialects. Basq. lancza; Gael. langa; Corn. lancels; Alam. lamze; Gr.  $\lambda \circ \gamma \chi n$ ; Hung. lantsas, a spearman. Hence Lat lanceare, lancinare. Confer Voss. Etym. Lat. in Lancea.

VER. 4. Transi The name of some foreign dance, perhaps then first used in Scotland, and opposed to Lightfute, a species of the hayer, or, as the Scots call it, reel, a train. Belg. trein, ingens esse clarum numerus (says Jun.) qui ductorem

Auld Light-fute thair he cou'd fore-leet,
And counterfittet Frans;
He held him as a man discriet,
And up the Moreis-dans
He tuke that day.

VI.

ductorem fuum comitatur; une queue trainante, une traine de gens; of which train Towfie was the leader, or choragus, as in this manner the Moresco dances are still performed, which are mentioned below.

VER. 5. Fore-leet] To outdo, G. This is an error; for forlata, Goth. fignifies to leave off, to defert. Job 4. 3. Ho kan forlatat? Quis illud derelinquere poterit? Ulphil. traletan. So Mark viii. 3. Jabai fraleta ins laufqui thrans; If I fend them away empty. The Islanders write it firilata, and fyrirlita. Vide Snorro, vol. 1. p. 103. The preposition for, generally indicates a bad acceptation. Thus forhada, to contemn; and, where God is spoken of, to blaspheme. Forhala, to delay; forhægda, to destroy; forhælla, unjustly to detain what is due to another. An hundred more examples might be given: Thus Towsie here fore-leets, leaves off and despises the dances of his own country, and betakes him to the French and Moresco tunes.

VER. 7. Up-tuke] He took up; he began. Phrasis est Cimbrica. Etenim tasia, tasia till, et tasia upp, ap. Islandos significant incipere, ut, ogg drottins andetos ad vera med honum, capitq; spiritus domini esse cum eo. Gib.

Goth. taga, in general, to take. Taga til lans, to take on credit; taga arf, to take or fucceed to an inheritance; Isl. taka. The great antiquity of this word may be feen in the

Latin

Latin tagere, and tagax, ap. Ciceron. Qui lubenter capit, rapax. Plaut. Milite:

## " Tetigit calicem clanculum."

That is, stole or took it. Hence integer, from whom nothing is taken. Taga also signifies proficere. Han tager sik wackert. Pulchre proficit. He takes to it. Meric. Causaubon. de Ling. Angl. Sax. p. 366. Ταω νεί τακω, τείακα. Αοτ. 2. Partic. τείαχων. Exponunt quidam τεινας, alii τιναζας, alii deniq; λαβων, accipiens, prehendens, quos Steph. sequitur—Certe. Τη imper. ex ταω—omnes exponunt λαβε. Cape. Angl. take. It signifies also to choose. Taka konung, regem eligere. Snorro, vol. 1. p. 65. Taga lag, legem accipere.

VER. 8. Morris Dance] Afric or Moorish dance. A la Moresca; It. Fr. Moresque: Hence corruptly Morris dance. This kind was much used by our ancestors, and is included in the catalogue given by G. Douglas, Virg. 476. 1.

- --- "Gan do double frangillis and gambettis,
- " Dansis and roundis trasing mony gatis,
- " Athir throw uthir reland on their gyfe,
- "Thay futtit it so, that lang war to devise
- "Thare haifty fare, thare revelling and deray,
- " Thare Morifis."

Junius explains it—Chironomica saltatio—faciem plerumq; inficiunt suligine, et peregrinum vestium cultum assumunt qui ludicris talibus indulgent, ut *Mecuri* esse videantur;—because this species of dance was sirst brought into Spain by the Moors, and from the Spaniards it was communicated to other European nations, together with the *rebeck*, or *violin*, which is a Moorish instrument.

# VI.

Then Steen cam stappin in wi' stends,
Nae rynk might him arrest,
Splae-fut he bobbit up wi' bends,
For Mause he maid request;

He

### STANZA VI.

VER. 1. Stends] Long paces, or great steps. G. In old Scots, to stend, to extend; a Lat. tendere. Downglas, p. 39. 34.

" Cruell Achil here stentit his palzoun."

Ital. flendere. Hence flend. Douglas, describing horses running off with the car, p. 338. 31.

- " And brake away with the carte to the schore,
- " With stendis fell."

And p. 420. 53.

" Quhilk fleis forth fae wyth mony ane stend."

VER. 2. Rynk] Sax. rinc. Homo robustus, fortis, præstans, G. And hence it came to signify, a man in general; as wereast rinc, sidus homo. Rinc, also used for husband. Vide Cædmon. 4. 22. Lye, Sax. Lex. in Rinc. Here it means a strong man, or soldier, as it is also explained by Lye, Gloss. Sax. in Voce.

VER. 3. Bobit up] Jumped, or danced, with many bendings of the body. We find a fet of men, in the middle ages, who

He lap quhyle he lay on his lends,
But ryfand was fae preist,
Quhyle he did hoast at baith the ends,
For honour o' the feist,

And dauns'd that day.

VII.

who, from the imperfect accounts given of them, appear to have been a kind of itinerant dancers, and, like their other wandering brethren, of no very good character. Urstis. ap. Spelman. in bobones, bubones, lixæ, calones—Aliqando nebulones et Furciferi. Ger. buben. Chron. Colmar. ap. Cang. in Bubii. Servorum autem pauperum (in exercitu) qui dicuntur bubii, tanta suit multitudo de bobinare. Conviciare, clamare, ap. Fest. ubi vide Scaliger.

Bab, bow often, or fink low, apud Anglos occidentales, to bob, or bob down. Gib.

VER. 5. Lap] Supped; lapt. A Cimbr. lepia. in Imperf. lapte, linqua vel lambendo bibere. G.

Surely our learned prelate has not attended to the obvious sense of the passage: Our Poet describes a clown dancing and leaping with such violence as to fall. To loup is to leap; he lap, he leaped. Thus the Bishop of Dunkeld, p. 418. 47.

--- " Some in haift, with an loupe or ane fwak,

"Thamfelf upcastis on the horsis bak."

Island. ad hleypa, to run; Sax. hleapere, saltator. Confer Jun. Gloss. in Leap.

Lends] Loins. Sax. lendenu, lendena, lendene; Isl. lendes, Gib. From Isl. leinge, to extend, this being the length of the trunk of the body.

VER.

### VII.

Then Robene Roy begouth to revell,

And Towfie to im drugged.

Let be, quo' Jock, and caw'd him Jevel,

And be the tail him tuggit:

Then

VER. 7. Hostit] Anglis Sept. to host, est tustire. Sax. howosta, est tustis; Isl. hoost; Angl. occident. to hust, i. e. to cough violently. Gib.

Hoast, host, cough; A. S. hwosta, from the Isl. hooste, tustis; Angl. Bor. hauste, id. a dry cough, as Ray explains it. Belg. hoest in to cough.

### STANZA VII.

VER. 1. Revell] To grow noisy or troublesome. Belg. ravelen, raveelen, æstuare, circumcursare. Skinner's etymology from Fr. reveiller, is ridiculous. We may here observe, that of old the word revel did not signify, as now, riot and disorder, but decent mirth and cheerfulness. So G. Douglas, p. 146. 48.

- " With revele, blythness, and ane manere fere,
- " Troyanis refavis thaim."

Chaucer also uses it in the same good sense; as also riot, in which he is followed too by the Bishop, p. 37.

- "The gild and riot Tyrrianis doublit for joy." And p. 269. 46.
  - " The blisfull feift they making man and boy,
  - " So that thre hundredth rial temples ring,
  - " Of riot, ripper, and of revelling"

So the old French rioter, to feast and be innocently merry. In this, however, they have departed from the original meaning of the Goth. reta; Island. reita, ad iram concitare. Rede, raide, anger. Inde Scot. rede; Angl. rate, et præposito, wrath; Alam. ratan, irritare. It is more than probable that the ancient Latins used ritare in the same sense: and hence the etymon of irritare and proritare, which the modern etymologists can make nothing of. From riot, the Barb. Lat. has formed riota, used in its original or bad signification. So Statuta Colleg. Corifop. apud Cange, in Riotta: Ab omnibus contentionibus, rixis, jurgiis, convitiis, riotis. And ibid. Ad invicem tunc inceperunt magnam riottam, et fugerunt hinc inde. Ital. riotta. Villani Hist. 1. 9. cap. 304. Venendo tra loro, a riotta. Fr. riote. So Hist. de la Guerre Sacr. ap. Cange. Par cette mariage sut faite concorde du Roi de France, et de celui de Castele, de riote que estoit entre eux. And the Poet, (ibid.)

- " A tant commencent environ,
- " A ribatter tout li Baron."

We have in King Rob. Brece's Life, To rist all the land, i. e. To plunder it.

VER. 2. Drugged] Came to him. Est phrasis Cimbrica. At draga till, est venire ad, vel in. Deut. 1. v. 2. Draga yfer, transire. V. 24. Draga ut, egredi. Deut. 3. 1. Draga fram, præcedere. V. 18. Gib.

We have little to add to the learned Bishop's observation, but to remark the analogy of the languages derived from the Gothic. Thus A. G. dragan; Angl. draw. In the ancient laws of Wester Gothland, ap. Ihre, Lex. in Draga, it is written Draha, Ar eig or hufum drahit, fi ex adibus portatum non fuit, in the same sense as the Latin traho, Fr. trainer. Draga wagnen, to draw a waggon. Ashmatic people are faid draga andan, in the same sense almost as the Latins,

Latins, spiritum trahere. Vide Liv. l. 4. cap. 21. Draza not, to draw a net. Whence our small net, thrown with the hand, is called a drag-net. We may also hence derive the name of that species of net, called by the Latins tragula, a trahendo, says Turneb. Adverf. l. 20. c. 14. Vide Plin. l. 16. c. 8. Isidorus calls it tragum. Metaphorically Draga sin wag, to go away. Lat. viam ducere; Belg. trecken. Adde Cange in Trabo, where he notes the origin of the French tirer vers un lieu. It is used also to signify doubting, the mind being drawn hither and thither. Han nager vid sig, deliberat de hac re. We find quite a fimilar phrase, Sallust. Bell. Jugurth. cap. 93. Marius multis diebus et laboribus confumptis, anxius trahere cum animo suo, omitteret ne inceptum, an fortunam opireretur. Te deceive. Laur. Petri de missa, ap. Ihre, ubi sup. Christen almoga hafwer latit talje och dragha sig. Populus Christianus se decipi passus est. Franc. trahir, to deceive or betray.

VER. 3. Jevel] Vox blandientis, forsan idem quod jewel. Gib.

We cannot agree with the Bishop in this interpretation. These people are about to quarrel, and therefore jevel must here be a term of reproach; perhaps an evil-spirit or dæmon. Goth. jette, giant; Island. gotun. The Saxons call a giant Eten; and hence, perhaps, the Scots Redeten, the name of a Giant or Dæmon used by nurses to frighten their children. Jettegrytor, ollæ gigantum, round holes in the rocks, in which (say the vulgar) the Giants or Dæmons cooked their victuals. Uncertain as we are of the true reading of the MS. we only hazard this as mere conjecture.

VER. 4. Tuggit] Drew. Scots tugge, to draw, from the Goth. tahjan, lacerare, discerpere. Ulph. Mark ix. 26. Filit tahjands ina, Greatly fearing him. Adde Luke ix. 42. Hence, as the learned Ihre observes, (in voce) tugga, to

The Kenzie clicked to a kevel,

God wots if thir twa luggit;

They parted manly wi' a nevel,

Men fay that hair was ruggit house?

Betwixt them twa.

. IIIVae totic

eat, to tear with the teeth, as in chewing. Isl. toga; A. S. teogan, trahere. Confer Ihre, Lex. 2. p. 973.

VER. 5. Kenzie] The angry man. A. S. Kene, kén wer, Vir acer, iracundus.

Clieked ] Catched up, or fnatched. Gib.

Click, in old English, apprehendere, rapere. Island. kla, frico. Ad klaa, fricare. Hence claw, and to claw. Sax. clawan, scabere. Perhaps klick is only a contraction of the Saxon geleccan, apprehendere.

Keyel, or Gevel So it should be wrote, and not errone oully, as in Ramsay's edition, cavell. It is properly a long pole, staff, or spear. Goth. gassack, jaculi genus, apud Vet. Suio-Gothos, says the ingenious Ihre, in voce. Snorro, tom. 1. p. 367. Olassack state stundum bogascoti, enn stundumga specum, King Olas sometimes fought with the bow, and sometimes used the dart. A. S. gaselucas. Matthew Paris, ad an. 1256. p. 793. Frisones—ipsum Williesmum cum jaculis, que vulgariter gaveloces appellant—e vestigio hostiliter insequebantur. Hence the French javelle, javelot, and our javelin. Gassel, Ihre explains, Quicquid bisurcum est, as a hay-fork. Hence Scot. gavelok, an iron crow, or lever, as it is generally divided into two toes at the lower end. Pelletier, Dict. Celt. derives it from two Celtic words, galf, bishdus,

### VIII.

Ane bent a bow, fic sturt could steir him, Grit skayth wead to haif skard him: He cheist a slane as did effeir him; The toder said, Dirdum, Dardum.

Through

bifidus, and flach, scipio, ut adeo denotet baculum bifurcum. Welsh gefa, il, forceps.

VER. 6. Luggit] Pulled each other about. Goth. luggazerines vellere; A. S. geluggian, vellere; Isl. lagd, villum notat; lugg, villus, fign. any cloth or other thing which has been made rough by carding. Hence, perhaps, the Greek λαγος, hirsutus; and the name of the hare in that language, λαγωπος, alias δαςυπες.

It is not eafy to give a reason for Bishop Gibson deriving this Scots word from Cimbr. liuga, fingere; Sax. leegan; Goth. linga, mendacium. Nothing can be more foreign to the obvious meaning of the passage. In old English, lug signifies to draw or pull.

VER. 7. Nevel] Alapa, (fays Gibson, Not. in Polem. Middin.) a blow or box on the ear, qua quis prosterni potest. Verb nevel, to box. Cimbr. hnesse, pugnus. Scotis neaf, (rectius nief, or nieve) et sella, prosternere. Angl. to sell. Dougl. Virg. 123. 45.

"And fmytaud with nieffis her brieft." Bruce's Life, p. 431.

"And als their nives aft samen drive."

STANZA

#### STANZA VIII.

Ver. 1. Sturt] Wrath, anger, despite. Sturt is used actively by Chaucer, to strive or contend. A. S. Alem. Cimbr. strid, and strit. Gloss. apud Jun. in Strife, altercatio. Strit, seditio. Heim strit, dimicant, pugnant, strident. Island. stryd; Germ. streiten, to sight; Isl. stir, bellum.

In Suio-Goth. Storto, præcipitem agere, deturbare. Storta en i olyeka; aliquem in infortunium præcipitem dare. Germ. flurtzen, genflortig, contumax; paflorta, irruere. Isl. flyr, conflictus. Hence the old French effour, and our flour, heat of battle, often used by the old poets: Douglas, 387. 4.

"The floure encressis, furius and wod."

Life of Bruce, p. 293.

" The foure begouth."

He also uses the word start to fignify vexation, 41. 36.

"Dolorus my lyfe I led in sturt and pane."

And p. 238. 21.

" Sturtin study has the stere."

Confer Rudd. Gloff. ibid. in Sturt.

VER. 2. Skaith] Damage, hurt, loss. In our old laws, skaithless to keep, to preserve from harm. Douglas, 72 23.

--- " How grete harme and skaith, for evermair,

" That child has caught."-

And. p. 41. v. 43.

" To me this was first appearance of skaithe."

A. S. skeathian, scaethan; Teuton. schaden, to hurt. Vide Lye, Sax. Dist. Theot. Skadon, damnum, noxa; et Goth. Skathjan, nocere. A. S. sceathe; Teuton. schade.

Skar'd] To have affrighted or hindered him, Douglas, 214.52.

Through baith the chieks he thoch to chier him,

Or through the erfs haif chard him;

Be ane akerbraid it came na' neir him,

I canna' tell quhat mard him,

Sae wide that day.

IX.

"Ne skar not at his freyndis face, as ane gaist."

Used also actively, to scare, to terrify; scare-crow, a figure used to fright away birds. Hesych. interprets suapitalas, tasparselas, turbatur; and Eustath. suapital, palpitare.

VER. 3. Cheist Or chesid, i. e. choosed. Thus Douglas too uses it. Alam. kiesen, eligere, from the Island. kioosa, eligere.

Flane Arrow, also written staine. Angl. S. stan, stan. Perhaps (fays Lye) from steogan or steon, volare. Island. stein, an arrow. Douglas, 387.

- "Fleand with her bow schute mony ane stane."

Effeir] For this is the true reading; not as in Ramsa, affeir. He chose out such an arrow as suited his hand. This is an ordinary term in old our laws: As effeirs, as belongs to, as is proper and expedient. Efferand, or effering, conform to, proper to. Vide Ruddim. Gloss. ad G. Douglas.

Efferis also signifies business. Douglas, p. 359. 48.

- "The greatest part of our werkis and efferis
- " Ben endit now."

Unless this be only another mode of spelling affairs.

VER. 4. Dirdum dardum] Term of derifion; a great ado about nothing. Seems to be formed from the Island dyr, pretiofus; or rather from dyrd, gloria, dyrka, glorifico. The other

### IX.

Wi' that a frien o' his cried, Fy!
And up an arrow drew;
He forgit it fae forcefully,
The bow in flinders flew.

Sic

other word feems to be added only, euphonia gratia, unless it be also from the Island. daare, rash; whence our verb, to dare.

VER. 6. Chard This is another part of the verb cheir, in the verse before. Perhaps it may come from Goth. karfwa, minutim cædere. Sax. ceorfan, beceorfan, amputare; ceorf-æx, securis. Hence char signifies to wound, or cut; and our carve, to divide or cut meat into small pieces.

VER. 8. Mard ] Spoilt his shooting; made him err so wide. Sax. amyrran, distrahere, consumere; Aleman. merren, to hinder; Isl. meru, minutim, dissipare; marde, dissipavi.

#### STANZA IX.

Ver. 3. Forgit] Pressed. Isl. fergia. In Præter. Fergde, premere, compingere. G.

Farg, Preffura, apud Verelium. Hence, perhaps, our word fardel, burden. "Ferg," (fays Ihre) "vocantur conti, qui ad continendum corticem, quo domus ruricolarum teguntur, fastigio utrinq; dimittuntur." From this idea of R 2 pressing,

Sik was the will of God, trow I;

For, had the tree been trew,

Men faid, that ken'd his archery,

He wald haif flain enow,

Belyve that day.

X.

pressing, perhaps the name of a smith's forge is derived; at least, this etymology may be as just as those mentioned by Menage and Junius, in Forge. Bishop Douglas calls a smith forgeare, and a forge forgin.

VER. 4. Flinders] Splinters. Bishop Douglas writes it flendris, and Mr Ruddiman (in Gloss. ad Virg.) deduces it from Lat. findere, Fr. fendre. But the true origin is the Gothic flinga; frustum, utpote quod percutiendo rumpitur, fays the learned Ihre. Isflinger, pieces of broken ice. And these from flenga, tundere, percutere; Gr. 22aa, ferio. Hence, too, Germ. flegel, our flail, and the Fr. fleau. From this idea, the Icelanders call a wedge fleigr, and the Suio. Goths plugg, in the same sense as we use it, viz. a piece of wood driven into a hole. Vide Ihre, Lex. in Plugg. This most accurate etymologist thinks that the ancient Islanders pronounced flac, segmentum, frustum, partem de toto demptam. If this origin be just, we have here the real meaning of the A. S. flicce, and our flitch, as expressing a part of the carcase of the fow. Island. flycke. In Trygwaf. Saga, p. ii. p. 23. Fleickis freid, frustum lardi. Confer Ihre, Lex. in v. Flaca, findere, partiri. Jun. in Flitch.

VER. 7. That kend ] Scribe quha kend.

Kend.

Kend, From kunna, Goth. scire. Ulphila, kunnan, to know. Joh. vii. 27. Kunnum. Adde John xiv. ver. 4. Hefychius has novyziv, scire; kunnist, scientia, now pronounced konst; kunnoga, notum facere; kunnog, sciens, peritus. Knytl. Saga, p. 4. "Harald K. baud cunnugum" mannum;" "King Harald consulted the Diviners;" or, as we say, the cunning men. Hence, he who attends to the course of the ship is said to cunn the ship. Transferred also to denote bodily strength, if this be not its primary signification. Al. chunnan, posse, valere, Germ. chonnen. Anglice can.

VER. 8. Enow] Enough, many. Sax. genog, genoh, fatis; Goth. ganohs, multus; Isl. gnoght, nogt, abundance; gnogr vel nogr, abundantia. G.

In Ulphila, Joh. xiv. 8. Gana unfis, sufficit nobis. Alam. genuoh, any, enough.

Ver. 9. Belyve] Sensus hujus vocis constat ex Versione G. Douglas, ubi sic redditur hoc carmen.

- " Extemplo Æneæ solvuntur frigore membra."
- " Belive Æneas' members schuke for cauld;" Et istud,
- " Ut primum lux alma data eft."
- " Belive as that the halefum day wox licht."

## Quibus adde:

- " How Æneas in Afric did arrive,
- " And that with schote slew seaven hartis belive." G.

Mr Ruddiman would derive this word from Teuton. blick, nictus oculi. We in Scotland fay, A thing was done in a blink, fuddenly; from Isl. blinka nicture; ogonblick, nictus oculi. In the ancient Ballad of William of Cloudeslie, (Rel. of Anc. Poetry, vol. 1. p. 164.)

X.

An hafty henfure, callit Hary, Quha was an archer heynd, Tytt up a taikel withoutten tary, That torment fae him teynd.

I

- "The fyrst boone that I wold aske,
- "Ye wold graunt it me belyfe."
- Ibid. p. 91.
  "He thoght to loofe him belive."

## STANZA X.

Bishop Gibson places here the Stanza beginning,

" A zape young man that flood him neift," &c. which is the XII. in Ramfay's edition.

VER. 1. Henfure] So Ramfay. Gibson has here kinsman; we know not on what authority. Hein, heini, Celt. strong young man. V. Bullet in Heini. It would seem that the copy followed by the Bishop was very faulty; or perhaps he left out this word, because he did not understand it.

VER. 2. Heynd ] Lord H. in his Gloff. to the Ancient Scots Poems, explains it handy, expert. Douglas, p 363. 53.

--- " Eneas heynd, curtas, and gude."

And p. 306. v. 3.

-- " Clitius the heynd."

Skinner writes bende, which he explains, feat, fine, gentle.

VER.

I wat na' quhidder his hand cou'd vary, Or the man was his frien';

For he escapit, throw the michts of Mary, As man that nae ill meind,

But gude that day.

XI.

VER. 3. Tytt up a taikle] Made ready an arrow. Chaucer:

"Well could he drefs his takele yomenly:"

#### And:

"The tackle smote, and depe it went." G. Douglas uses the same often: Thus, p. 300. v. 1.

- " His bow with hors fenonnis bendit has he,
- "Tharin ane tackill fet of fouir tree."

### And below, (ibid.)

"Quhirrand fmertly furth flaw the takyll tyte."

Tackle, Goth. fig. ornamenta navis, rudentes. Ihre, in Lex.

Tackle; and hence we say the tackles, the ropes of a ship.

VER. 4. That torment fae him teynd ] So Ramfay. The Bishop reads:

" I trow the man was tien."

Not having the MSS. we cannot judge which is the true reading. Torment is used by our old writers to fignify wrath, anger, indignation.

VER. 4. Toynd ] Tion, incenfed; Sax. teona, irritatio. G.

Teen,

Teen, and, as Chaucer writes it tene, injury, vexation. Sax. teonan, injuriæ, calumniæ; Belg. tenenn, tanen, irritare. 7eivedat, vexare. Vide Junius, in Teen.

VER. 5. I wat na'] I know not. Goth. wetan, scire. Ulph. vitan; Island. vita; Germ. wissen. The Latin, with the digamma, hence forms video. The A. S. sor vitan, put often wissan. Hence our wist; I Wist not. Non multum abludit esda, esda, qua de acie tammentis quam oculorum usurpantur; as the most ingenious critic Ihre observes, in Weta. The Goths distinguish betwixt bokwett, artium scientia, and manweett, humanitas; and indeed they are often found separate.

VER. 6. Or the man was his frien'] Bishop Gibson reads thus:

" Or his foe was his friend."

Which is scarcely to be understood.

VER. 7. Michts of Mary Through the protection of the Virgin. Every body knows, that the blind votaries of Popery more frequently address themselves in prayer to the Virgin Mary, than either to God or our Blessed Saviour. The Scots say mights, power, from Ulphil. mahts, magan, posse. Mark xiv. v. 20. Ni mag qwiman. Non possum venire. Isl. At meiga.

VER. 8. As man, &c.] Bishop Gibson has it:

" As one that nothing meant."

But I know not on what authority. He has either used unwarrantable liberties with the text, or has been missed by some erroneous copy.

### XI

Then Lowry lyke a lyon lap,

An' fone a flane can fedder;

He hecht to perfe him at the pap,

Theron to wad a wedder.

Ho

# ŜTANZA XI.

VER. 1. Lap] Run, a Cimbr. Hlaupa, in Imp. hliop curtere. Vel leapt, a Sax. leapan, faltare, currere. Imperf. Laup. G.

The last etymology is the true one; from laup we say, to loup, to jump. Thus Douglas, Virg. p. 418.

"Sume in haift, with ane loupe and ane swak, "Thameself upcastis on the horsis bak."

Goth. lopa, currere. Hence loppa, a flea. Ulphila writes blaupan, faltare. Mark, chap. x. ver. 5. Ufblaupands, exilians. Jun. in Gloff. Ulphil. thinks this has fome connection with have 3 ale, which Hefychius explains 5 are de, haftens,

VER. 2. Flane] Vide Note to Stanza VIII.

VER. 3. Hecht] Hoped. A. Sax. hiht, spes. G.

Hecht, he promised to himself, or vowed. So LL. Goth. cap. 4. 1. (ap. Ihre in Heta) Engin ma haita a huathki a hult epa hauga. Nemo vota nuncupabit, nec luco nec tumulo. Ulphila gahaitan. Vide Mark xiv. 11. Al. heizan. Gloss. Lipsii, Giheitan. Island. heita, unde heit votum. Streinga beit, voto se obligare.

VER.

He hit him on the wame a wap,

It buft like ony bledder;

But fwa his fortune was and hap,

His doublet made o' lether

Saift him that day.

Will.

VER. 4. Wad] Pawn. Goth. wad, pignus; A. S. wed, wedde fillan, pignus dare. Fenn. weden. We must observe here, for the illustration of this phrase, that wad properly signifies cloth; because, in the scarcity of cash of old, cloth was given as ready-money, and received as such for other goods. Hence, when any pledge was given, it was generally cloth, wad; and from the frequency of this custom, wad came to signify a pledge. We still say, the wadding of a gun. By the common change of f and w, the Islanders pronounce fat, and fot. Alam. psand; Goth. pant, pans; Lat. pignus. Hence the Goth. verb wadsetta, oppignorare, and the Scots law-term wadsett, and to wadset, to lay in pawn. In the middle Latin we sind vadium, guadium, &c. Etrard in Græcismo, ap. Cange in Vadium.

- " Vado viam, vado quadrupedem, vadio, vadium do,
- " Pro consorte vador; sonat hoc quod sum fidejussor."

Hence vadimoniare. Vide plura ap. Cange in Vadium, et in Plegius. Also called gagium, unde Fr. gage; and from hence the gage, offered by the challenger, and taken up by the person challenged, in surety that he was to fight the other.

VER. 5. Wap] A blunt or edgeless stroke, in opposition to one that pierces the skin. The elegant Editor of the Scots Poems, printed Edinburgh, 1770, explains avapped, suddenly struck down, that is, by a blunt stroke, as of a cudgel.

VER.

VRR. 6. Buft] Sounded; a dull found, fuch as a bladder filled with wind makes, when struck. Puff of wind; flatus venti. Fr. bouffee de vent; Belg. boffen, to puff up the cheeks with wind. Hence buffet, a blow on the cheek. Dan. puff, plaga, ictus. Puffe, percutere malas instatas. Hence, too, vain-glorious boassers are called by the Dutch poffen and poechan. Gr. Noipusser, vehementius spirare. Fr. piaffe, pomp, vain glory.

VER. 8. Doublet of lether ] Our ancestors were very commonly clothes made of leather; and anciently the inhabitants of this island used no other garments. But even long after the use of woollens, those who lived much in the woods, and the yeomanry, were often clad in skins. Thus Guy of Cistorn is dressed, Rel, of Anc. Poet. vol. 1. p. 83.

- " And he was clad in his capul hyde,
- " Top, and tayle, and mayne."

We in this island had this custom from our German, and they from their Scythian ancestors, of whom Justin, 1. 2. c. 2. " Lanæ iis usus, ac vestium ignotus, quanquam continuis fri-" goribus urantur, pellibus tamen ferinis, aut murinis, utun-"tur." Adde Isidor. lib. 19. cap. 23. and Cæsar of the Suevi, lib. 4. cap. 1. Cluver. Geogr. l. 1. c. 16. We find the Emperor Charlemagn clothed with a skin above his inner garments. Eginhart, Tit. Car. cap. 23. describing his dress, Vestitu patrio, hoc est Francico utebatur, -crura et pedes calceamentis constringebat, et ex pellibus Lutrinis, thorace " confecta, humeros ac pectus hieme muniebat." This garment was by the ancient Islanders called felldr, being made of sheep-skin with the wool on, and served them as a cover for their beds at night, as well as a cloke, or robe, through the day. Thus Ara Frode, Libell. de Island. cap 7. describing Thorgeir going to bed, "Oc bræiddi felld fin a fic, et explicabat S 2 " stragulum

### XII.

The buff fae boist'rously abaist him,

That he to th' erd dusht down;

The ither man for deid there left him,

An' sled out o' the town.

The

- "ftragulum suum super se." It is still customary in Greenland, Iceland, Finland, and Lapland, to sleep on skins, and also in Norway. Vid. Buss. Lex. ad ara Frode in Felldr. Even the women of distinction wore their feld in the day time. So the Norwegian poet of Gudruna:
  - " Som det nu lakked till quelden
  - " Indkom Fru Guru med felden."
- "In the evening came in the Lady Gudruna clothed in her "feld."

### STANZA XII.

We give this Stanza from Gibson's edition. It is not in Ramsay's, though by the stille it appears to be genuine.

VER. 1. Buff] Vide Supra, Stanza 11. Buff, fays Gibfon, a blow or stroke.

Abaist] Abased, astonished, says Gibson.

Perhaps it should be abashed; consternatus, stupesactus. Suid. Αβαζος, ησυχος, ηγεν εερημενος τε βαζων, ό ες ελεγων; silens, cui ereptus est usus loquendi. Chaucer has abawed for abashed. I was abawed for merveile.

Jun.

The wives came forth, an' up thay reft him, An' fand lyfe in the lown;

Then wi' three routs on's erfe they reir'd him, An' cur'd him out o' foone,

Frae hand that day.

XIII.

Jun. derives it from Sax. beap; de quo vide Lye, Sax. Dict. Confer Jun. in Base.

VER. 2. Dusht] Fell down suddenly. Dusch, contundere, allidere. Douglas, p. 225. 1.

"The sharp hedit schaft duschit with the dint." And p. 296. 34.

" The birnand towris down rollis with ane ruche,

"Quhil all the hevynness dynlit with the dusche."

VER. 5. Wives Women. Wif, ap. Sax. et twif, ap. Cimbr. fæminam, vel mulierem fignificat. Gib.

Thus, Gen. iii. 2. xx. 5. This wyf; This woman. Adde Cædmon, 58. 9. Matth. ix. 20. An wyf, quædam mulier. Jo. iv. 9. Samaritanisce wyf, A Samaritan woman. Gen. v. 2. Were and wif, Man and woman, male and semale. Vide plura ap. Lye, in Wif. Hence wiman, wimman, i. e. wis—man, Mulier, sæmina. Alam. Uuib, Uuip; Germ. weis. The learned Ihre mentions two derivations; sirst, a westwa, to weave; or else from wif, or hwis, calantica, a woman's head-dress, metaphorically, as the northern writers say, Gyrdle oc linda, Girdel and belt, for man and woman; and also hatt oc hatta, pileus et vitta, in the same sense.

VER. 5. Reft him] Snatched. Sax. reafian, rapere. G. Henc

Hence Douglas uses it for robbed, pulled, or forced away, 74. 12.

"The rayne and roik rest from us sicht of hevin."
Teut. rauben, spoliare; rassen, corripere. Hence bereave, berest; and the Scots, to reave; and reaver, a robber, often used for a pirate. Hist. of Wallace, p. 342.

"Upon the fea you reaver long has been.".

And p. 343.

" At ilka shot he gart a reaver die."

Reif, rapine, robbery. G. Douglas, p. 354. 30.

" For na conquest, reif, stayt, nor pensioun."

VER. 6. Loun] Rogue, rascal. Alludit. Eng. clown, Douglas, p. 239.

- "Quod I, Loun, thou leis."

The old ballad of Gilderoy, Reliq. Anc. Poet. p. 324.

" And bauldly bare away the gear

" Of many a lawland loun."

Lye Addit. to Junius deduces it from Cimbr. luin; ignavus, piger, iners.

VER. 7. Routs] Roarings, bellowings. Cimb. at ryta, wel rauta; frendere, vel rugire belluarum more. Angli Bor. dicunt, The ox rosuts; et hinc ap. Scotos route, est idem as to make a great noise. Ut habet Douglas:

"The firmament gan rummil, rare, and rout."

Hinc, oborto tumultu dicimus, What a rout is here?

orto strepitu, What a rout you make? G. Dougl.

"The are begouth to rumbill and rout."

Sax. brutan, to fnort, to fnore in fleeping. This is Mr Ruddiman's etymon; but we imagine it comes more immediately from

# XIII.

A zape zung man that stude him neist,

Lous'd aff a schot wi' yre;

He ettlit the bern in at the briest,

The bolt slew owre the byre.

Ane

from the Goth. bropian, clamare. Ulphila, Matth. xxvii. 46. Ufropida fiibnai mikilai, clamavit voce magna. Luke xix. 40. Hropjand, clamabunt. Island. broop, clamor; Alam. ruafan, clamare, vociferare. Is roopy, hoarse, derived from this?

VER. 8. Frae hand ] Quickly, in a little time. Ang. out of hand. G.

### STANZA XIII.

This is the 12th in Ramfay's edition, owing to the omission of the foregoing, which we give from the Bishop's edition; but this 13th Stanza is omitted by Gibson.

VER. 1. Zaip, or Zape] Ready, alert. We have already faid why our old writers always use the z for the y English, when it begins the word, as zeir, yeir—zour, your, &c. Douglas, p. 409. v. 19.

- "The biffy knapis and verlotis of his stabil,
- " About thyme stude, full zape and serviabil."

It may also mean vaunting, infulting. Chaucer thus uses it. R. R. 1927.

" And

- " And fayd to me in great jape,
- "Yeld the, for thou may not escape."

Island. geip, boasting. Chaucer, Lucre. v. 18.

Tarqinitis the yonge

"Gan far to jape, for he was light of tonge."

Hence it came to fignify jesting, light talking. Id. Fr. lib. 2. 1167.

- "He gan his best japes forth to cast,
- 46 And made her fo to laugh."

Neist Next. In Decalog. Angl. Sax. Ne wilna thu, this nes nehstan yrses med unriht; Ne concupiscas bona proximitui injuste. Neh, nigh; nehst, nearest. Hence neh-bur, neighbour, from Ulphila's neguha, nigh. Mark ii. 4. Neguha gwiman, To come near. Alem. nah; Bel. nae, naer. Whence our Scots naar, near.

VER. 3. Ettlit] Designed, aimed, intended. Climbr. Atatla, designare, destinare.

"The goddes ettilit, if werdes were not contrare." G. Ætla (fays the learned Ihre) indicat varios mentis humanæ motus, ut dum destinatæ sibi proponit, judicat, sperat, &c. Island. id. Thorsten Wik, S. p. 10. Dat ætla eg. Id Spero, vel animo concipio. Lex. Scanica, p. 16. sect. 21. Ætla wider frænda sin; Consultare cum cognatis, vel amicis suis. Consonat Gr. εθελω, nec sensu longius distat, quum utrumq; desiderium voluntatis ad quidpiam tendens denotat.

Barn] The A. Sax, bearn; Isl. barn; a bairan, beran, parere. Gib.

It is is originally derived from the Goth. barns. Vide Ulphila, Luke i. 41. and ii. 12. We find it even used to signify a girl, Mark v. 39, 40. Hence barnilo, a little boy, an infant. Luke i. 46. Jah thu barnilo, And thou child. Alam.

barn, bern. Let us observe, by the way, that our old authors often use bairn, to denote young men, full-grown persons, as the English do child. So Pallas, addressing Æneas. ap. Douglas, p. 244. 33.

- "Come furth, quhatever thou be, berne bald." And p. 439. 22.
  - --- " And that awfull berne,
  - "Beryng schaftis fedderit."-

Bern time, the whole number of a woman's children. Id. P. 443.

- " Bare at ane birth ---
- "The nicht there moder, that barne time miferabill."

The ancient English writers apply child to knights. Thus the Child of Elle, Reliq. of Anc. Poetry, p. 107.

- "And yonder lives the Child of Elle,
- " A young and comely knight."

Warburton, Not. on Shakespeare, observes, that in the times of chivalry, the noble youth, who were candidates for knighthood, during the time of their probation, were called Infans, Varlets, Damoysels, Bacheliers. From this comes the Scots word chiel, which is applied to a young man, full-grown.

VER. 4. Bolt] Arrow. Sagitta capitata, says Junius. Cymbr. Bollt. Belg. bolt, bout. Non abludit Bears, jaculum; Boxedes, missilia; a Baxxe, jacio.

Byre] Cowhouse. Theotif. Buer est casa, tugurium. Item. byre est villa, siquidem bær est pagus, villa prædium. Gib.

In the old Gothic byr, pagus; a bo, habitare. pagus. Hefych. Bupio, dixinua, habitatio. Etym. Mag. ευβυρίου pro ευσίκου, and βυρίοθεν, Hefych. pro σίκοθεν. " Qumque aliæ olim urbes non fuerint, quam grandiee ores T

Ane cryd, Fy! he had flain a prieft,
A myle bezond a myre;
Then bow and bag frae him he keift,
And fled as ferss as fire

Frae flint that day,

XIV.

" ores villæ, hinc etiam urbes quantumvis ampliores, idem nominis habuere, et etiamnum inter Danos habent," fays the learned Ihre. Hence By fogde, Præfectus civitatis. By lag, Jus civitatis, who fornandes de reb. Get. translates bellago, by frwen, city-officer, or constable. Byr, an inhabitant; A. S. bure; Germ. bauer.

VER. 5. Slain a priest This was, in those days of ignorance, deemed the most horrid murder that could be committed, and in a manner irremissible, the person of a priest being held much more facred than that of any layman. Hence, in the laws of the middle ages, we find the fine, or compenfation for the murder of a priest, much higher than that of a layman, of whatever high rank he might be. They were estimated according to their feveral degrees; and hence, in the laws of Kanute, p. 151. we find Tryhyndmon, Syxhyndmon, i. e. Homo ducentorum, trecentorum, sexcentorum solidorum; every man's life, from the king to that of the cottager, having a fixed price fet upon it. This was generally called wiregild, wergild, and manwyrd, the price of a man. By the laws of King Athelstan, the King's life is valued at 30,000 thrymsas; an Archbishop's at one half of this sum. A common man's life is bought for 267 thrymfas; but a bishop's at 8000; and one in simple priest's orders at 2000. In the additions to the Salic law, made by the Emperor Louis, anno \$19, we find

## XIV.

Wi' forks and flails they lent grit flaps,
And flang togidder like fryggs;
Wi' bougars of barns thay beft blew kapps,
Quhyle thay of berns maid briggs.

The

the compensation for a priest always triple to that of a layman; and if the offender had not wherewith to pay, he was fold for a slave.

VER. 7. Bag The quiver of arrows, which was often made of the skin of a beast.

Kieft] Caft.

# STANZA XIV.

Ver. 1. Flaps] Douglas writes it flappis, strokes given with a blunt weapon, such as a stail. Hence Belg. flabbe, colaphus, a sono, says Ruddiman. Flap, says Jun. extremitas cujusq; rei mollis ac pendula, quæq; ad levem motum statim concutitur. Ita throat-flap, Anglis est epiglottis. Flye-flap, muscarium. Teuton. flabbe, libens, præsixo D. Hence, too, Suio-Goth. flab, os, labium, de quo vid. Ihre, Lex. in Flabb, who, with his usual accuracy, observes the connection betwixt the Greek and Scythian languages; risum nempe, qui patulo ore, et diductis labiis sit, perinde in illa (Lingua Greca) analy yenesa dici, ac a nobis flatt loje. We

T 2

fay also, a broad laugh, a broad stare. Perhaps flatter may be also derived fro flat, de quo vide Jun. in Flatter.

Ver. 2. Fryggs] Perhaps this is the same as freik, ap. Douglas, a foolish impertinent sellow. Teuton. frech, protervus, procax. Petulans, says Mr Ruddiman; unde Angl. freik, whim or caprice. In the Jus Aulicum of King Magnus, anno 1319. sect. 9. we find some public game or meeting, called frimark, prohibited on account of the mischiess and wrongs they did to each on these occasions. Framledis forbjudher minne herre nokor frimark, &c. ulterius prohibita esse vult dominus meus omnia ludicra, frimark dicta, sive equo peragantur, sive alias. Confer Ihre in Frimark. These sports were also called feylemarked, de quo id. ibid. Vide Jus Aulicum, Dan. anno 1590. sect. 25.

Friggs] Forsan eagerly, libenter, a Cimb. frigd, libido. Gibs. vide infra, Stanza 21. v. 4. Note.

VER. 3. Bougars] Rafters; probably from A. S. bugan fledere, unde boh, boga, a bough or branch.

VER. 4: Beft] Beat. Thus the word is used by G. Douglas.

Blew kapps Alluding to the blue caps or bonnets our commonalty usually wear on their heads.

VRR. 4. Briggr] Bridges. The elegant etymologist Ihre observes, that the original word is bro, signifying firatum aliquod—Nunc observare lubet (adds he) septentrionem nostrum solum esse, qui hoc primitivum retinuerit, dum cæteri dialecti omnes diminutivum ejus adoptarunt. Such is brigga, from bro; bygga, from bo; sugga, from so, &c. Hence, too, the Suio-Goth brossol, tabulatum pontis; brokista, sulcimentum pontis; bookar, idem; brygga, a bridge; A. S. brigg, brycge; Germ. brucke. Observe here, that, as in many other words, the Scots have kept more closely to the orthography and pro-

nunciation

The reird raife rudely with the rapps,

Quhen rungs war laid on riggs;

The wyfis came forth wi' crys and clapps;

Lo! quhair my lyking liggs!

Quoth thay, that day.

XV.

nunciation of the mother language, than most of the other northern dialects.

VER. 5. Reird Or Rerde, for thus it should be wrote; not as in Gibson's edition reir. Reirde is properly clamour, noise, and shouting. Douglas, p. 300. 30.

- Bot the Trojanis rasit ane skry in the are,
- "With rerde and clamour,"

And p. 37. 12.

"Syne the reird followed of the zounkeris of Troy."
Ruddiman derives it from Sax. reod, lingua, fermo, as the primary idea feems to have been that of fhouting. Hence, too, rede, council, advice. Teut. raad, concilium; raden fuadere; Angl. aread, to pronounce.

Rapps] Stroak; also the found made by a stroak. Dougl-301. 50.

- "On bois helmes and scheildis the werely schot,
- " Maid rap for rap."

And 143. 12.

" Als fast as rane schoure rappis on the thak."
Alludit 'ραπιζω, percutio, says Rudd. who derives this from

breppan,

hreppan, tangere. But the truer etymon feems to be from Goth. hropjan clamare, from the found made by the stroke. In Suio Goth. rapp, ictus; gifwa en ett rapp, to give one a blow; rappa, the verb, to draw or pull violenty. Ulphila, Mark ii. 23. Raupjan absa, spicas vellere.

VER. 6. Rung A rough pole; Island. runne, faltus fylvæ.

Rigg] And riggin, the back bone. Goth. rygg; Ant. rigg, dorsum; Island. hriggur; Goth. righen, spina dorsi. Notat etiam dorsum vel jugum montis; Gr. paxis spess, the ridge of a hill. In Scot. the riggin of a house; Goth. rygg-knota, spondilus, vertebræ; literally the knots of the back bone. Vide Ihre, Lex. in rygg.

VER. 8. Likyng My beloved. Theotif. likon, placere; Sax. lican, licigian, geleean, from Theot. guodlichan, lik, properly corpus animatum. Ulphila, Mark x. ver. 8. Thanaseiths ni vind tua, ak leik ain, They are no longer two, but one flesh, or one body. Hence metaph, for a lovely girl, Hawamaal Stroph. 84.

- " Annad thorre mier ecke værna
- " Enn vid thad lik liffa."
- " Nil ego pulchrius cogitare potui,
- " Quam illo corpore (puella) potiri."

Hence Douglas uses likandlie, for pleasantly, contentedly, p. 253. 14.

- " Sae likandlie in peace and libertie,
- "At eis his commoun pepil governit he."

Liggis] Lies on the ground. Ulphila ligan, to lie. Luke ii. 16. Bigetan thata barn ligando in uzetin, They found the babe lying in a manger. Isl. liggia; Al. ligen; Bel. liggen;

### XV.

Thay girnit and lute gird wi' granes, Ilk goffip oder grieved, Sum ftrak wi' ftings, fum gaddert ftains, Sum fled and ill mischevet,

The

Suio-Goth. calls immoveable goods, as lands, houses, &c. ligfa; and moveable, gangande fa. In Scot. the immoveable wood of a mill is called the lying graith, in opposition to the moving part, which we call ganging graith. Douglas, p. 462.16.

"They laid this Pallas zing "Ligging thereon."

# STANZA XV.

Ver. 1. Girned] Dentibus frendebant ut solent homines dolore iraque perciti. A. S. gnirne, indignatio, mœstitia. Cædmon 52. 19. Mid gnirne, cum quærimonia, indignatur. It is written also gnorne, mæstus, dejectus, quærulus. Confer Lye, Gloss. Sax. in voce. The Saxon plainly slows from Goth. knorra, murmurare; Sax. gnarren, quod proprie (says the elegant Ihre in Lex.) de canibus hirrientibus usurpatur Isl. knurra, to murmur. Olass Sag. cap 96. Buender knurudu illa; rustici murmurabant vehementer. Knurla and kulla denotes the murmur of the turtle dove. Vide Esdr.

38. 14. Secundum hoc (fays Ihre) knorra proprie erit, malis suis ingemiscere.

Gibson for girned reads glowred, which he rightly observes comes from Cimbr. Att glora, lippe prospectare; but we know not his authority here for this alteration. Adde Lye, in Girnan.

Lute gird] Gave hard strokes. Douglas uses gird, the verb, to signify strike through. Throw gird, did thrust through. Sax. gird, virga. Vid. Exod. iv. ver. 2. Matth. x. ver 10. Leg. Inæ. 67. Virgata terræ, hoops being made of rolls, before they were formed of iron. Hence Scots gird, sig. a hoop; and from it comes girdle. Gird to deceive or beguile, to go about one, to take them in. In this sense, Douglas, p. 219. 22.

"Was it not evin by ane fenzet gird;"

i. e. false story, or trick. Alludit gyrus, gyrare, yupos yupow, says Ruddiman.

Granes Groans. Douglas, granyt, groaned. The reader will observe in this verse the propensity of our old Scots poets to alliteration, a fort of ornament they seem fond of adopting as often as possible, and which was much in request with our Scandinavian ancestors, as we learn from Wormius de Litterat. Runica, and the poems of the ancient Skalds still remaining.

VER. 2. Gossip] Properly godsather, pater lustricus; Sax. godsibhe, cognatus ex parte dei. Vide Jun. in Gossip. "And "the child was called Godbearn," Godson. Chaucer, p. 209. 6. "And certes parentele is in two manners, either "ghostlie or slesshie; ghostly, as for to dele with his godsib." From the drinking on those occasions, the matres lustricæ, or godmothers, were called, in no very good acceptation,

Gossips; and to go a gossiping, denoted a drinking match. And in this fense our poet here uses it of those drunken clowns.

VER. 3. Stings Poles, staves. Cimbr. stang; Plur. steingur, hasta, contus, baculus. Angl. Bor. Stangs. Gib.

Hence nid stang, the spear or pole of infamy, erected against those who were called nidingr, infamous. In what this infamy confifted, (nid, fignifying infamy or reproach) fee in Ihre, Lex. voce Niding; and Jus Sueon. Vetust. p. 346. which passage Dr Robertson has translated, History of Charles V. vol. I. chap. 5. p. 291. of the various ceremonies used in setting up the spear or stang of infamy. Vide Bartolin. Ant. Dan. p. 97. feqq. Steph. in Sax. p. 116. Egill Skallagrim, the famous bard, deeming himfelf highly injured by King Eric Bloddox of Norway, who had profcribed him, resolved, before he left his dominions, to set up the nidstang, or spear of infamy, against him. Having surprised one of his villas by night, and killed one of Eric's fons, and feveral of his friends, with his own hand, just before he fet fail for Iceland, " Confcensa rupe quæ continentem spectabat, " gerens hastile corylinum," (fays Torfæus, Histor. Nor. vol. II. p. 177.) " caput ei equinum affixit, formulam hu-" jusmodi præfatus; Hic ego hastam infamiæ (nidstang) ad-" versus regem Eiricum et reginam Gunhildam statuo. Tunc " capite equino in continentem converso, Converto, inquit, 44 has diras, in Genios qui hanc terram incolunt, ita ut omnes "incertis sedibus vagentur, nec quisquam eorum receptaculi " compos fiat, donec regem Eiricum et Gunhildam tota hac " terra ejecerint, et impressa sissura rupis hasta, litteris Runi-"cis hanc formulam incidit." The learned reader will at once see the analogy of this ancient Scandinavian curse, and that of the Romans, devoting others to the infernal gods. We

The fecond motive for quoting particularly the passage of Torfæus above, was to explain a custom still prevalent among the country people of Scotland, who oblige any man, who is so unmanly as to beat his wife, to ride astride on a long pole, borne by two men, through the village, as a mark of the highest infamy. This they call riding the stang; and the person who has been thus treated seldom recovers his honour in the opinion of his neighbours. When they cannot lay hold of the culprit himself, they put some young sellow on the

flang, or pole, who proclaims that it is not on his own account that he is thus treated, but on that of another person, whom he names.

We may observe here how common and familiar the Gothic was to the English, even in the eleventh century. Eric Bloddox being driven out of Norway, came with his Queen and Court to seek for protection from Athelstan, who gave him Northumberland, anno 935. He lived much at York; and he and his people conversed familiarly with the English of that age, without needing an interpreter, as did his cotemporary Eigil Skallagrim, the bard, when in the service of King Athelstan. A century and an half before this period, we find the great Alfred entering familiarly into the Danish camp, and diverting them in the seigned character of a bard, without their suspecting him to be a foreigner, which could not have happened, had his language differed from their own.

VER. 3. Stanes] Stones. Goth. stains; Sax. stan, lapis; Angl. Bor. stean, G.

The Islandic Spelling is stain. Thus, in all the Runic inscriptions, N. rista stain, N. erected this stone, viz. to the memory of some deceased person. Sometimes they write it stein. Worm. Monum. p. 245. Sasi stati Runir Stein. Sasi Runicum lapidem posuit.

Var. 4. Mischevet] The verb from mischief. The Gothic particle miss, always implies defect, error, or something bad; as mistrust, mislead, miscall, misapply, &c. So the French mesiant, mecontent, mecompter, and the like. The Latins used male in the same manner; malesidus, malevalidus, effeminatus. The Barb. Lat. Missacere, male agere, peccare. Confer Jun. in Gloss. Ulphil. p. 256. Isl. missater, people who differ, among whom concord is wanting. Missossel,

U 2

The menstral wan within twa wains,

That day fu' weil he prievit;

For he came hame wi' unbirs'd bains,

Quhair fechtars war mischieved,

For evir that day.

XVI.

an abortion. Vide Ihre, Lex. in Miss. Misstyrma, male ct ignominiose tractare. Bibl. Isl. Judg. xix. ver. 26. Og peir kiendu hennar, og missyrmau henne alla pa nott. They knew her, and abused her all the night.

VER. 5. Wan Got within, or betwixt two waggons. So Douglas uses the phrase, Wan before, He got before. Sax. wendan, to go; wendan hidar ac thider, to wander hither and thither. Vide Lye, in Wendon.

Wains] Contracted from waggon, as from the Sax. wagen is formed wan and weign. Alam. wagan; Island. vagn; alludit ôxeir, ôxuna, vehiculum.

VER. 6. Prievit] Proved, found. Island. profa, to examine or try. Hence Sax. profian; id. prof, an experiment. Hence Germ. prusen; Fr. preuve, eprouver; Ang. proof. Kon. Styr. p. 14. Prowa med fullom skælom, Prove by evident reasons. Prosshen, a touchstone.

The pronunciation here belongs to the Scots; nor is it in use in any of the sister dialects. Thus Douglas, Prole to Book 10. p. 309.

"Thocht God be his awin creature to prieve."
To prieve fuch a dish, i. e. to taste it.

VER.

Heich Hutcheon wi' a hisfil ryss,

To redd can throw them rummil;

He muddilt them down lyk ony myce,

He was nae baity bummyl.

Thocht

Ver. 7. Unbirs'd] Unbruised bones. Birr, force, violence; also the noise an arrow makes in its slight. Douglas uses thus the word birrand. Island. bir, ventus secundus; mier biriar, oportet me. Hence Sax. me byriad, vel gebyriad; all which include the idea of force and strength: And this is surely a more natural etymology than that from vir, or vires, which the reader will find in Ruddiman's Glossary. Confer Voss. Etymol. in Brisa. Cimbr. brisim, a bruise. Hesych. Bostar, Tiesen, stringendo premit.

VER. 8. Fechtars] Here is another instance of the old pronunciation retained by the Scots. Alam. fehtan, vehtan, to fight; and the Sax. fehtan.

#### STANZA XVI.

Ver. 1. Rysi Bough, twig, or stake. A. Cimbr. Hriis, quod virgam ramum, vel virgultum, sonat. Vil eg tysta hann med mannanna hraise; Cassigabo eum cum virga virorum. Bibl. Isl. 2 Sam. vii. 14. Hinc hreisar apud Island. loco virgultis obsita; et hreys, virgultis consita domus, casula. Danis quoq;

quoq; Hriis fostr, est strues e ramis arborum congesta, et a rice dyke. Apud Anglos Sept. est sepes ex cæsis ramis et virgis texta. Gib.

A. S. bris, vimen, frondes; Al. ris; Germ. reis; Hib. ras; Fen. rifu. Alludit 'pu vimen, fays the learned Ihre, in Ris. Ulphila uses raus, to fignify a reed, which he and Wachter derive from rifa, surgere, in the same manner as the Latin surculus. Suio-Goth. rifa, virgis cædere; rifbad, verbera.

VER. 2. Redd] We cannot guess the Bishop's meaning in his note on this word red; Sax. to rath, confestim, presently. To red, in Scots, sig. to loose, to unravel, or unfold. So Douglas, 127. 43.

- "This being faid, commandis he every fere,
- "Do red thair takillis, and stand hard by there gare."

Confer p. 339. 44. where rede fig. to make way. So we fay, To red the way; to clear the way. To rede marches, settle boundaries betwixt contending parties; figuratively (as Rudd. observes) to make peace. To redd a fray; to interpose betwixt two combatants; and often those who do get the redding straik, get a blow from one or other. Sax. hreddan, liberare; hriddan, repellere. Hence Engl. To rid one's hand of a thing. Riddance, raed, expeditus; reyden, parare. Hence E. ready. Suio-Goth. reda, numerare, synonimous with rækna: Whence reckon, reckoning. Hence our ready money; and the Goth. reda penningar, id. But the Scots redd, as here used, comes immediately from reda, explicare, expedire, ordinare. Reda ut sit heir, to comb out, or, as we say, to redd out the hair. Isl. greida. Snorro, vol. I. p. 99. Tha let Haraldur greida har sit; Tum Haraldus comam fuam explicandum curavit; which, in consequence of a vow, he had worn uncombed, till he should become master of all Norway; Snorro, ubi sup. Vide omnino

Ihre, in Reda: We fay also, to rid one out of the world, i. es to kill him. So Knytling. Saga, p. 212: Han red swarba Plog, He killed Plog the black. Snorro, voll. II. p. 245. Ratha af lift, to red one out of life. And hence rad; flaughter.

VER. 2. Rummyl] Gibson explains it of thundering; but this is a mistake, though he quotes that of Virgil, Intonuere poli, translated by Douglas:

"The firmament gan rummy!"

Properly it fig. to rumble, grumble, roar, or bellow. Douglas, p. 151. v. 7.

"Hillis and valis trimblit of thundir rummyl." of the p. 200. v. 26.

" And landbirst rumbland rudely with sic bere,

" Sae loud nevir rummyst wyld lioun nor bere."

Suio-Goth. ramla, from the Island. rymber, murmur. Rym, verb, raucam voce edo.

VER. 3. Muddilt] Or muddeled, i. e. threw them downs fays Gibson. Island. mill, in minutas particulas divide. Præterit. mulde, unde a mill, and to mull. Vide Hickes. Dictionar. Island. in Mill.

VER. 4. Baity bummil] Effeminate fellow. Gib.

It should be wrote Batie, that being a name our country people, in some parts of Scotland, give to their dogs. The word bummil we remember not to have met with in any old writer. Bulgia, Goth. sig. intumescere; bula, tumor; bulna, intumescere. If these have any affinity with this word, the meaning may be, that he was no vain boaster—that he was not a baty, or dog, that would snar!, but durst not bite.

Thocht he was wight, he was na' wyfs,
With fic jangleurs to jummil;
For frae his thoume they dang a fklyfs,
Quhyle he cried, Barlafummil!
I'm flain this day.

XVII.

VER. 5. Wight] We imagine the learned Bishop has mistaken the fense of this word, explaining weighty, strong, ponderous, from Isl. wift, libra, pondus. We rather deduce wight from Goth. wig, pugna, certamen. Unde Sax. vig, vige: hinc vigian, pugnare; vigend, bellator; Al. wigand, We find vigan, pugnare, employed by Ulphila, Luke iv. Island. wig, pugna; Celt. gwych, vir strenuus, bellator. The elegant and accurate etymologist Thre, justly thinks he has here found the root of the old Latin vicis, as used for pugna; and that it was used in this sense, we have the testimony of Servius, in his Notes to these words of Virgil, Æneid, 2. 433. Nec ullas vitavisse vices Danaum. Hence. too, pervicax, quod contentiofum proprie notat. Indorus tells us, that the old Latins faid vicam, for victoriam. The Goddess of Victory was called Vica Pota. Suio-Goth. wega, certare, cædere; enwig, certamen fingulare.

VER. 6. Jangleurs] Gibson reads juters, (we know not on what authority) which he explains from Cimbr. Jodur, Titan, gigas, Cyclops. To jangle, is to quarrel, gannire, blaterare, altercari, a Teut. jancken.

Jummil] Justle. G.

Jummil] Collidere, infundere, in se mutuo irruere; forte a jump, infilire, says Skinner. Chaucer writes jombre; Germ.

jumpen,

jumpen, micare, exilire. Sicambris, gumpig, lascivus, sportful or playful.

Sklyce] Oftimes written slyce, from Island. slita, disrumpere, lacerare. Hence Sax. slitan, and Alaman. slizzen; idem. Otfrid, lib. 4. cap. 19. 29. of Caiaphas, sleizer sin ginnati, He rent his clothes. Tatian, cap. 56. 7. gisliz, ruptura. Sax. slyten under, to slit and slice. Ulphila uses gasleithjan, perdere, Mark viii. 36. Gasleitheith sik saivalai seinai, perdit animam suam. Plura vide ap. illustriss. Ihre in slita. Island. slyss, damnum, infortunium.

Ver. 8. Barlasummil] Vox concertantium, nam in singulari certamine apud Scotos, agonista, ictu gravi læsus, portinus exclamat, barlasummel. Vox videtur deduci ex bardla, ictus, verber, et simbul, grande, vehemens quid. G.

The original fignification of this word is to be found in the Suio-Goth. famla, which the learned Ihre interprets, Manibus ultro, citroq; pertentare, ut folent qui in tenebris obambulant. The Islanders say falma, which is certainly the original word, as Alaman. folmo, sig. the palm of the hand; and thus, in the passage of Esaias (quoted by Ihre in Famla) Huner wak himila sinero folmo, Quis ponderavit coolos palmo suo. Hence, too, the Lat. palmus; Ang. palm of the hand. Goth. sumla, manibus contrectare, attrectare; Fr. patiner, improbe contrectare; Belg. sommelen. To sumble (says Jun. in Gloss. Angl.) proprie dicitur de iis, qui rem aliquam inscitè, infabrè tractant, quod Suecis est sumla. Douglas seems to use sumbler to signify a parasite, p. 482. 34.

"I am na caik fumler, full weil ye knaw."

Ruddiman here ingeniously imagines caik fumler means a cake-turner, a fellow that will do any mean thing to get a bellyful; or an avaricious person, who whambles, i. e. turns and hides his cake, lest others should share with him. But

X

### XVII.

Quhen that he faw his blude fae reid,
To fle micht nae man let him;
He weind it had been for auld feid,
He thocht ane cry'd, Haif at him.

He

the first is certainly the best interpretation. The other word barla is plainly derived from parley, a stop or cessation in order to speak. It was held ungenerous to refuse this of old, when demanded by one combatant of another. Hence we use the word parley, and to beat a parley, i. e. to make a short truce, in order to propose terms of accommodation; and this phrase is often used even by boys in their games. Or may we not suppose barla to be derived from, and a corruption of Suio-Goth. barma, misereri? Chron. Ryth. p. 165.

- "Gud barme then omilde hempd
- " Deus misereatur immitis vindictæ."

Ulphila has arman. Mark x. 48. Armai mik, Miserere mei. And this from barm, sinus, ibid. Luke xvi. 22. quod quæ nobis indeliciis sunt, in sinu sæpe soveantur, says the elegant Ihre (in Barm.) Hence Lat. insinuare, and our insinuare. Hence we may explain that unintelligible passage in Augustin, Epist. 178. Si licet, dicere non solum Barbaris lingua sua, sed etiam Romanis, si hora armen, quod interpretatur, Domine miserere, &c. Lege, Si Frauja (or Froja) armai, Domine miserere; Frauja signifying Lord in the Gothic. Vide Ulphila, Matth. xxvii. 63.

# STANZA XVII.

Ver. 2. Let him] Hinder or prevent. Sax. lettan, gelettan; orig. from Goth. latjan, tardare, morari. Hinc Island. latur; Al. laz; Dan. lat; and Angl. late. Alludit (says Jun.) ληθομαι, Dor. λαθομαι, oblitus sum. This proves Junius's fondness for Greek derivations, where the originals are to be sought and sound at home.

VER. 3. Weind] Thought or imagined. Gibson here reads trow'd, which he rightly derives from the Sax. truwian, credere. Ween comes also from the same fountain; wenan, existimare; Al. wanen. The root of all these is sound in Ulphila's wennyan, or wenjan, or gawenjan, putare. Luke iii. 15. Atwenjandein than alai managein, existimante omni populo. Adde Luke vii. 43. Confer. Jun. in Gloss. Ulphil. wenjan. It is also used for expectation, because this depends on opinion; Thuis sa quimanda, thau antharanu wenjaima? Art then he that should come, or look we for another? Luke vii. 19. Douglas, 222. 19.

"It stands not so as thou wenys."

figns, as marks to point out the way, and determine our course. P. 100. 6.

"I knaw and felis the wenys and the way."

VER. 3. Feid Enmity. Cimbr. faide; Sax. fahth; Lat. Barb. faida, feida, inimicitiæ; Angl. fewd. G.

Fec, Sax. inimicus; Ifland. faad. Hence foe, and feud, enmity. Leg. Athelstan, 20. Sij he fa wid done Cyng, Sit inimicus regis. In the Saxon laws, fah properly signifies that capital enmity that subsisted on account of murder com-

X 2 mitted

He gart his feit defend his heid,

The far fairer it fet him;

Quhyle he was past out of all pleid;

They fould bene swift that gat him,

Throw speid that day.

XVIII.

mitted. Vide Jun. in Gloff, et Leg. Ecclef. Canuti, 50 Spelman observes the same in voce Faida. This savage custom of obliging the male relation to revenge the slaughter of his friend, is as ancient as any thing we know of the usages of our Germanic ancestors. "Suscipere tam inimicitias (says "Tacit.'de Mor, Germ.) feu patris, feu propinqui, quam ami-" citias, necesse est." Observe, it was not lest to their choice, but under the most severe penalties they were obliged; to profecute this vengeance, by every mean in their power. The excess of this barbarity at last brought on a cure, though the lapse of many ages was necessary to soften the fierce manners of our ancestors. We find many laws among the Salic, Langobard, and Francic statutes, calculated to check this custom; and King Edmund in England, about an. 944, complaining in one of his laws much of this evil, and fuggesting several remedies for it, and ordering compensations to be made by the aggressor. However, we find it still prevailing even in the Norman times; but how this inhumanity gradually loft ground, and by degrees was annihilated, would lead us into a historical deduction, too extensive for these notes, but we may perhaps give it in another work. Confer. Cange in Faida.

### XVIII.

The town foutar in grief was bowdin,
His wyfe hang at his waist;
His body was in blude a' browdin,
He grain'd lyk ony ghaist.

Hir

Our poet here mentions auld fied; for those feuds of old standing, being sharpened by their progress from generation to generation, were, of all others, the most deadly.

VER. 7. Pleid Gibson has totally mistaken the meaning of this word, explaining it by reach; getting beyond their reach. Pleid signifies here the quarrel, broil, or contention. Thus Douglas, p. 111. v. 34.

" At my pleasure suffered me life to leid."

Adde p. 454. 42. where it fignifies opposition, controversy. In Suio-Goth. pleet, ictus lævis; Sax. plæt, handplætar, ictus in vola. Plætan, ferire, unde Fr. playe; and the Bremen pliete, vulnus. Island. plaaga, cruciatus. Alludit annta.

# STANZA XVIII.

VER. 1. Soutar] Shoemaker. G.

The word shoe, now in use, is softened from the ancient Gothic sko, which is properly tegmen, (says the learned Ihre)

id quod rem quamlibet tuetur—speciatim usurpatur pro eo quod extremitates munit, et specialissime de indumento pedum. Leg. Dal. p. 15. Skarper sko a soti, si caleeus pedem urit, i. e. If the necessity be very pressing. Ulphil. skote, shoes; Mark i. 7. Sax. sco, schoh; Island. sko; Aleman. scu. May it not come come from skya, tegere? unde sky.

---- " quod tegit omnia, cælum."

As the Latin nubes, a nubendo, i. e. tegendo. Ist. skyla, to cover; skyfwe, tegmen. Whence the Scots scoug, a shade or cover; under the scough of a tree. Be this as it may, we find the Gothic skaud, a shoe, and skauda raip, shoes ropes; or, as we better pronounce, raips, i. e. shoe latchet. Skohe is skaudaraip and bindan, calceamentorum ejus corrigia solvere, Mark i. ver. 7. Alludit sholve, corium, says Junius; as if our Scythian ancestors had no name for a thong of leather, till they got it from Greece. If there is really any connection, the latter certainly comes from the former. Skotwange, the thongs or whangs of the shoes. Gloves are called in German handschuk; and, in some parts of Denmark, boots are called knasko. Thre observes, that Harpocration has the word shudskoes, which he explains easson to supplie senus calceamenti.

We find here the origin of the title, Skofwen, an officer in the courts of the ancient Scandinavian monarchs. He was a kind of Lord or Gentleman of the Bedchamber, whose duty it was to give the King his shoes; but being always near his person, he was generally a rich and powerful courtier.

Thus, in Trygw. Saga, p. 2. p. 316. the tich Kali is called Skofvein Einars, though he was a man of great power, and a near relation of Einars.

Bowdin So we think it should be read, and not as Gibfon has it, bowen, which he explains as if it had been boun, or bown, prepared to go, from the Islandic bwen, contr. bun, paratus.

Bowdin signifies filled, fewelled, from Goth. bulgia, intumescere. Kon. Styr. p. 212. Ta wardir han giarnt trutin och
bulgin, Tum fere instaur et intumescit. Bulgot, slaccidum.
Alludit Gr. βολοι, which the Glossographers explain by
φυμωλα, tumores. Bulna, intumescere; bula, a tumor or
swelling raised by a stroke. A number of words are hence
derived, which include the idea of fewelling; as bolde, ulcus,
our word bolster; bolja, a wave. Bulla, a fort of round bread
used in Sweden; whence the French boulanger, and our bowl,
bullet. The Latin bulla, hung about children's necks, is also
from it. Vide Juvenal Sat. 5. 164. Goth bulle, poculum.
Histor. Alex. M. ap. Litteratiss. Ihre in Bulle,

"Nappa och fwa alla bulla."

Cyathos et omnia pocula.

Bullra, tumultuaris strepitum edere. Hence, too, bolt, a nail or pin, with a large round head. Ihre informs us, that the large wooden or iron cylinder, or roller, used for breaking the clods, is, in many places of Sweden, called bult.

VER. 3. Browdin] Browden, swelled, or embroidered. Gib.

We find broadin in Douglas, which Rudd. explains forward, bent; and also brudy, abounding with; from broad; broody. Perhaps it may come from the Scots bruche, fignifying a gold chain, or bracelet, as if his body, streaked with his own blood, had appeared as if adorned with gold chains. Douglas, 146. 2.

"The bruche of gold or chene loupit in ringis,

" About thare hals down to the breist hingis."

Vide ibid. 215. 25. Chaucer writes it broche or brooch; or perhaps

Hir glitterand hair, that was fae gowden,
Sae hard in lufe him laift,
That for her fake he was nac zowden,
Seven myle that he was chaift,
And mair that day.

XIX.

perhaps from Sax. brædan, affare, De quo Lye, in Lex. Saxon.

Ver. 4. Grain'd] Groaned. Douglas writes it granyt; Sax. granan; Cimbr. grwn, gemitus columbarum; Hibern. gearan, gemitus, querela. Alludit (fays Jun.) γρωνες, explained by Hefych. τες ακευνθας, και τες μη λαλενθας, audientes, fed non loquentes.

Ghaift | Sprite. Sax. gaft, fpirit. G.

Douglas writes it gaist, gaists, which is nearer the Saxon orthography. Alam. geist. Hence Engl. gastly, ayasos, sidos ayasov, ap. Homer, which Eustathius explains extraoulinov, species terribilis. Hence probably Scots gousty, used by Douglas, waste, desolate, and lonely places, because ghosts were thought to haunt such. Armor. goasta, vastare, to waste. I find in Lye gastoine, ager incultus. Lat. Barb. gastina, de qua vid. Cange, Gloss,

Ver. 5. Gowden] Liquescente. 1 in w, ex golden. Hinc rusum Scoti vocant gowdy locks, scil. pro more gentium septent. apud quas rutili et slavi capilli in maximo pretio habebantur. Hinc Cædmon vocat Saram, Bryd blonden seax, ponsam slavi comam. Lothum etiam appellat, Blonden seax; et in Edda Snorronis legimus Saturnum in taurum rutilum se convertisse,

vertisse, cujus pilus quilibet aureo nitebat colore, Var fagur gulz litur a huortu har. Memnon etiam omnes anteisse pulchritudine dicitur, utpote cujus cæsaries supra aurum nitebat, Har hans var segra en gull. Et uxor ejus satidica, omnium formossissima, dicitur habuisse capillos auro similes, Hun var alstra Kuenna sogurst har hennar var sem gull. Cap. 3. Præsat. Eddæ. Neq; mirandum quod septentr. scriptores rutilum cæsariem tot elogiis celebrant, cum multiplicem Gothorum nationem, Vandalos, Wisigothos, Gepidas, ipsosq; Gothos proprie sic dictos comas rutilos esse scribit Procop. Hist. Vandal. lib. 1. Gib.

All the northern nations were remarkable for blue eyes, and yellow or fair hair. Of the Germans, Tacit. Mor. c. 4. "Truces et cæruli oculei, rutilæ comæ." Juven. Sat. 13.

- " Cærulea quis stupuit Germani lumina? slavam ..
- " Cæfariem."

Confer Cluver. Ger. Ant. p. 118. Aristot. Problem. fect. 14.8. Conringius de Hab. Corp. Germ. p. 11. 12. From this mark, Tacitus (Vita Agricolæ, cap. 2.) infers the German origin of the Caledonians; "Rutilas Caledoniam "habitantium comas, et magnus artus Germanicam originem adservasse." Lucan, Pharsal. I. 10. speaking of Cleopatra's slaves:

- " Pars tam flavas gerit altera crines,
- " Ut nullus Cæfar Rheni se dicat in arvis
- "Tam rutilas vidiffe comas."

So fond were the Germans of this colour of hair, that they used different ointments, both to give and to preserve this ornament; as Plin. informs us, lib. 28. cap. 12.

VER. 7. Zowden] So it flands in Ramfay's edition, but whether according to the M.S. we cannot fay; nor is the meaning of this word very eafy to discover. In the Glossary

Y

### XIX.

The millar was of manly mak,

To meit him was nae mows;

There durst not ten cum him to tak,

Sae noytit he thair pows.

The

to Ramfay's edition, we find zolden, explained holden. In Douglas we have zoldin, which feems to come nearest the sense here, signifying yeilding, or yeilded. But we think it better to own our ignorance, than to sill the page with idle conjectures.

### STANZA XIX.

VER. 2. To meit him, &c.] Gibson reads this verse,

"With him it was nae mows."

Mows] Mockery, or jest. Thus Lindsay of Pitscottie, of Sinclair, when the Lords seized him, "Is it mows, or earnest, my Lords?" Battle of Harlaw, stan. 19.

- "Their was nae morwis there them amang,
- " Naithing was hard bot heavy knocks."

The French fay, Faire la moue, to laugh at one; and hence Chaucer, Tr. lib. 4. î. of Lady Fortune;

- "And whan a wight is from her whele ithrow,
- "Than laugheth fhe, and maketh him the mowe."

Hib. magam illudere, desidere; magadh irrisio, derisus.

Mow also fignifies properly the mouth. Gothmund. Thus faire la mowe, is to distort the mouth, as is done in looking contemptuously at any person. In Sui-Goth. mopa, illudere, vexare, Chron. Rythm. (apud Ihre in Mopa.)

- " Jak seer Erik will oss mopa.
- "Video Ericum nobis illudere velle."

Our elegant etymologist remarks the affinity betwixt this and the English mope.

Among the Ætolians, mova signished cantilena, a song; and in Celtic, moues denotes the same thing. Hence Mosai, the Muses, who made and sung verses. Vide Pezron, Antiq; p. ad voc. Musai. Mwoos, a derider, comes from the Celtic moch, a sow, from the action of that animal in turning his snout up into the air, and men doing so, as a gesture of contempt; mwria, sannia, derisio; and the Celts say, moccio, for deriding. Hence the French moquer, and our mock. Again, the ancient Gauls said gore, for a sow. Hence yopiaw, irrideo, subsanno; and from the same origin, Xospos, sus The ancient Scholiasts truly remark, that this word was seminine, among the ancient Greeks; but they did not know the reason, which is, that gore in the Celtic properly denotes sus semina, a sow.

VER. 3. There durst not ten] Gibson reads the verse thus:

"There durst nae tensome thair him tak."

VER. 4. Noytit] Gibson reads cowed. Goth. nod. necessitas. Inde noda, cogere; nodde, coegit. Vide Gen. 33. v. 11. Ulphila, Nauthjan, uibi vid. Jun. Douglas uses noy for hurt, annoy, and noysum, hurtful, noxious. Thus pag. 191,

"Sa fer as that thir noyfum bodyis cauld."

The buschment hale about him brak,
And bikkert him wi' bows,
Syne traytorly behint his back
They hew'd him on the hows
Behind, that day.

XX.

Ray (Collect. of words) observes, that in Lancashire they fay note, to push, strike, or gore with the horn, as a bull or ram. This he derives from the Sax. Hnitan, to push or gore, Exod. xxi. 28. Gif oxa hnite. And this from the Island. Hniota ferire, which is the true origin of our noyt. Vide Hick. Diction. Island. in Hnyt.

Pows.] So the Scots pronounce Poll, cacumen, vertex capitis. Hence to poll at election, to have each head reckoned; poll-money, capitation tax; a pole of ling, caput afelli piscis faliti. Skin.

VER. 5. Buschment] Contracte from Fr. embuschement, ambuscade. We find buschement used by Douglas. Ambush may perhaps be derived from bush; and in woody places ambushes were generally placed. And this, too, is the opinion of Jun. Gloss. in Ambushes. Hence the Italian imboscate, and the Lat. term subsessions, vid. Serv. ad Æneid v. ver. 498.

VER. 6. Bikkert] Laid a load of rattling blows on him. It would feem, that in this fense the word is used in the old poem of Chevy Chace. Reliq. of Ancient Poet. vol. 1. p. 5.

- "Bomen bickart uppone the bent
- "With ther brow'd arras cleare,"

i. e. their

17 4 2 2 4

### XX.

Twa that war herdmen of the herd,
On udder ran lyk rams,
Then followit feymen, richt unaffeird
Bet on with barrow trams;

But

i e. their arrows rattled in the quiver as they moved. In an old translation of Ovid, quoted in the Glossary on this poem, we find these verses:

- " And on that slee Ulysses head
- " Sad curses down does bicker."

Hence it came to fignify fighting or skirmishing; and here, fay our boys to each other, Let us bicker, i. e. skirmish.

Ver. 8. Hows] The hams. How, from Angl. Sax. hog and boh; and from this last the Scots say still hoch, as in Douglass. Belg. Haessen, verb to hoch, to cut the back sinews of the leg, suspragines succidere. Hence Jun. derives the phrase, hoxing of dogs, genu scissio canum. Adde Spelm. in expeditare canem. Island. huka; incurvare se modo cacantis. Perhaps, too, the huckle-hone had its name from hence. Belg. hucken, desidere, in terram se submittere. Vide, Lye Addit. to Jun. Gloss.

#### STANZA XX.

VER. 1. Herdmen ] Headsmen, G.

Ver. 3. Feymen Lege faemen, i. e. enemies. Douglas fometimes writes it fa, which is nearer to the Saxon fah, inimicus;

inimicus; as from feond, fiend. Leg. Athelstani R. 20. "Sy he fa with done lyng; Sit inimicus regis." Vide LL. Edmundi R. 1. et Jun. Gloss. in Foe. From fah comes feehld, feud betwixt two families on account of the flaughter of a kinfman; Angl. feud; Island. fead; Dan. feyd. The Latins of the middle ages formed hence their faida, de qua Spelman in Archæol. B. Rhenanus Rev. Germ. l. 2. p. 95. " Faidam vocabant Franci fimultatem apertam, qua unus ali-" quis uni vel pluribus bellum denuntiat. Ab hac Gallicani " scribæ faidosum appellat, qui faidam exercet. Germanis " notum nimis vocabulum est." Every difference, however, was not called faida, but only that capital hatred which could not be appealed, but by the blood of the malefactor. Hence Gloff. faida, vindicta mortis. Faidam portare alicui, to declare private war against any person. The dreadful consequences of this right of private war, and the numerous statutes against it, are to be found in all the writers of the middle ages. See many curious particulars concerning it, ap. du Cange in Faida. Hence the poor Albigenses, while cruelly perfecuted and murdered by the Papists, were called Faididi, quod profugi et exulantes erant.

Unaffeired Unaffrighted, without fear, or as we spell it, feir.

VER. 4. Barrow] From Sax. berewe, which comes from Goth. bairan; Sax. bæran, beoran. Hence bier, on which the dead are carried; and those who carry them are called bearers, and the spokes on which the cossin rests, bear-trees.

Trams] Tram, or trum, is Gothic, and thus explained by the elegant and learned Ihre: "Pars arboris longioris in "plures partes diffectæ, ut commodius plaustro injici queat." Germ. trumm, fragorem; Island, trumba. With the German lawyers, tramrecht, or traumrecht, denotes that right which

which one neighbour has of letting the beams or joilts of his house into the nearest wall. Bohem, tram, trabs. Stadenius (Explicat. Vocum Bibl. p. 663.) observes, that the Germ. thramen signifies beams, and the cross joilts on which wooden stairs are supported, which leads us to the thramsleins of Ulphila, Mark i. v. 6. by which he translates the approve, of the Greek, which our version renders locusts, the food of John Baptist in the desert. Many of the ancients, as well as the Gothic Bishop, understand this passage of the facred writer, not of locusts, but the tender tops of some shrub, or species of plant, unknown to us; as Bengelius observes in his note on this verse; and therefore he deduces the last part of the word from teins, virga, ramus tenerior. Adde Wachter in Tram.

May we not attempt, from what is faid of this word tram, to explain the word firaba, used by Jornandes, when defcribing the funeral of Attila Getica, cap. 39. " Postquam " talibus lamentis est desletus, strabam super tumulum eius, " ingenti commessatione celebrant." Wormius (Mon. Dan. p. 36.) quotes a passage from Plac. Lactant. ad Stat. Theb. lib. 12. in the following words: "Exuviis hostium extruebatur " regibus mortuis pyra, quem ritum fepulturæ hodie quoque " Barbari servare dicuntur, quem strabas dicunt lingua sua." Now we know that nothing is more common among all the people of Gothic origin, than to put f. before their words. The word trafwe, the learned Ihre fays, "ufurpatur de " rebus quibusvis exaggeratis, wed trafwe, est strues ligno-"rum," a heap, fuch as the funeral pile. Trafwe also denotes a heap of corn cut down; and hence our thrave, confifting of twenty-four sheaves, as we shall more fully explain in our Glossary of the ancient Scottish Dialect; vide Ray's Collect. of Words, p. 75. Of this the barbarous Latin has made trava, trava bladi, de quo Cange. The custom of the Goths drinking

But quhair thair gobs thay were ungeir'd,
They gat upon the gams;
Quhyl bludy barkit was thair bairds,
As they had worriet lamms
Maift-lyk that day.

XXI.

drinking largely at the funeral of their chiefs, is too well known to need enlarging on in this place.

VER. 5. Gobs] Rostrum, beak, used of birds of prey. Celtic, gob, rostrum. Hence our gab, used to sig. the mouth; and gobble, to devour greedily. Fr. gober. Junius observes, that the Gr. Kaβλεω has some affinity to our words; and is explained by Hesychius, Kalaπινω, devorat, obsorbet.

Ungeird Unprepared. Sax. gearwian, præparare; and this comes from the Islandic giora, parare, facere. Eg skal giora, or eg mun giora; faciam, vel facturus sum. Hickes (in Dict. Isl.) thinks, that hence is derived the Scots to gar, to oblige, or force one to do a thing. Gear, Scot. furniture, apparatus. Island. gearo, gearwe, paratus.

VER. 6. Gams] The gumens; Teut. gaum, gum, palatum; A. S. goma, gingiva. Douglas 345. 31.

"His gredy gammes bedyis with the rede blude!"
Island. gomur, palatum. These strokes they got on the mouth explains what the poet adds, that their beards were all beforeared with blood.

VER. 7. Bludy barkit Gibson, on what authority we know

### XXI.

The wyves keift up a hideous zell, Quhan all thir zounkers zokkit; Als fers as ony fire-flauchts fell, Freiks to the fields they flokkit.

The

know not, reads bludy burn; the meaning of which we are ignorant of.

Barkned Covered with congealed blood, as hard, and in the same manner, as the bark covers the tree. Skinner derives bark from Teuton. bergen, tegere.

VER. 8. Worried] Worry, vexare, dilacerare, vide Lye, Gloss. Sax. in Worian. We find the original meaning of this word in the following passage of Alfred's Version of Bede's Hist. Eccles. 1. 4. c. b. "Seo hreownes thæs oft ewedenan" woles feor & wide eal wees worigende & fornimende; Sape" tempestas dictæ cladis late cunita depopulabatur." Such was the general signification in the mother tongue; but in Scotch it is always restricted to tearing with the teeth, as a dog does. Ray informs us, it is used in the same sense in the north of England.

# STANZA XXI.

VER. I. Keist] Cast. Gibson reads gave.

Zell] A doleful cry, indicating deep distress. Sax. gealpan; jactare, gloriari, exclamare. The root is the Island.
giell, vociferor; gall, vociforatus sum. We find in the

fame language yle, ejulo; ylde, ejulavi. From gielle the Danes fay, at gielle, refonare. Junius, in his idle fondness for Greek derivations, would bring it from μλεμος, or ιαλεμος, cantio funebris. In the old English we also find yawl, lugubriter vociferari; Island. Gala, vociferari; Armor. jala, lamentari. If we must have a Greek derivation, may we not suppose it to come from αλαχαζω? but it is needless to go from home on this occasion.

VER. 2. Zounkers] Young men, a Cimbr. junkiære (fays Gibson) vel jonkiere, generosus vir juvenis. Goth. jugga; and Island. ung. Hence Sax. giung, jung; Welsh, jevange, or jesange; Angl. young, inde younker.

Zokkit] Joined together in combat, as when oxen are joined together by the yoke. Toke, from Sax. geoc. joc.; and this from Goth. gajuk, Alam. joch. We cannot guess what the learned Gibson was thinking of, while he explains yokkit, ready to vomit. Toake, in the north of England, sig. to vomit; the yoakes, the hiccup. But sure this cannot be understood in this passage, as the true meaning. Tex, Angl. sig. singultire; yexing, convulsio ventriculi; Belg. huckup; Suio-Goth. hicka. Confer. Jun. Gloss. Hick.

VER. 3. Fire-flauchts] Fire flying. Angl. Bor. fulgura fire-flaughts, vocant, G. And so do the Scots. The origin is from the Goth. fleckra and fleckta, motitare, from the quick and versatile motion of the lightning. Tobit. cap. 11. ver. 9. Ta lopp hunden framsor at, och sleckrade med sin rumpo; Then the dog went before them, wagging his tail, Ezekiel xi. 22. Ta slecktade cherubim med sinon wingom; Tum cherubim alas suas motitabant. Hence the English slicker, flickering, de quo vid. Jun. etymol. From this action of a dog sawning on his master, we find fleckra, adulari. Kon. Styr. p. 57. Han sum ar salfer ok flikrar; Qui sub dolus est,

et adulatur. Flikert adulatio, ibid. p. 53. Alaman. flechen, adulari; flechara, adulatores. Hence Scot. fleech, to flatter. Douglas has fleichand, flattering, which Ruddiman, for want of a better etymon, derives from Lat. flettere.

VER. 4. Freiks Bold, petulent fellows, who love to quarrel; also foolish and impertinent. Thus Douglas, Prol. to Æneid 8. p. 239.

"Ha, wald thou fecht quod the freik."

Teuton. frech, protervus, insolens, procax. Hence our freak, frakish, capricious. Suio-Goth. frak, tumidus, infolens. En freek uppfyn, Vultus infolentiam præ se ferens. Island. fræckt, insolence. Hence in Scots fractious, troublesome, quarrelsome. Gud. Andreæ Lex. Island. They say also, frakur, fævus. Herraud's Saga, cap. 1. Frakur i beimtam, sævus in exactionibus. Knitlyng. 5. p. 8. Oc var that ed fræknasta, Erant hi milites fortiffimi. The learned and ingenious Ihre derives the Latin ferox, from the Goth. fræks or fracks, with great probability, in Lex. tom. 1. p. 585. This elegant writer also afferts (in voce Frankrike) that the Franks were called in the ancient language Frakr, from their ferocity. All the German writers agree in this. Gothofred. Viterb. Chron. part 17. in Proem. talking of the origin of the empire of the Franks, "Germani adversus Alanos movent exercitum, eos vincunt, et " omnio extinguunt-et propter eandem victoriam a Valenti-" niano Imp. Franci, id est feroces sunt perpetuo appellati." Id. Catalog. Reg. Franc. "Post modum ab Imperatore Va-" lentiniano vocati funt Franci, i. e. Feroces." And Ricardus Episcop, tit. de Leone 3tio Imp. " Sed quia tempore Valen-" tiniani Imp. ejus mandato vicerunt Alanos, vocavit eos Fran-" cos, id est Feroces." Rigordus in gestis Philippi Augusti, p. 74. "Quos cum multis postmodum idem Valentinianus of præliis attentaffet, nec vincere potuiffet, proprio eos nomine

The carlis with clubs did uder quell,

Quhyl blude at breifts out bokkit;

Sae rudely rang the common bell,

That a' the fteipill rokkit

For reid that day.

XXII.

"Francos, quasi Ferancos, i.e. Feroces appellavit." The reader will find more to the same purpose in Cange, voce Francus. Frekner, Island. signifies alacer, strenuous. Olafr. Tryg. S. p. 2. pag. 298. Tho at badi væri sterker oc frekner, Quamvis robusti simul et strenui essent. Freki, serocia. Confer Ihre Lex. vol. 1. p. 586.

VER. 5. Carlis Clowns; Sax. Eorl and Georl, Gib. The true origin is found in the Islandic, not in the Saxon; for corl properly denotes a nobleman, whence Earl; but in the mother dialect, the Islan. Karl, sig. a rustic, or man of mean condition, as here. So too Alaman. karl. Vossius in Etymol. voce Androsaces, brings another etymology, but not a probable one. The Germans say, Ein hapfer karl, a strong man. Hence too our churle, de qua vid. Jun. in voce, who observes, that in the Sax. ceorelboren and thegeaborn are opposed to each other; the first signifying a plebeian, the second a gentleman. It is from this idea of strength that the English say a karlecat, carlehemp, &c. Carlis is clownish, rustic. Thus in the ancient ballad, the Childe of Elle, Reliq. of Anc. Poet. p. 112. vol. 1.

- " And foremost came the carlish knight,
- " Sir John of the north countraye."

Quell] Alam. quellen, Belg. quellen, domare, subjecte. Sax. cwellan. It is used also to fignify killing. Thus Douglas, 153. 50.

- "Thre vilis tho', as was the auld manere
- "In wourfchip of Erix he bad down quel." and p. 263. 1.
- "—— with this famyn rycht hand quellit and flane."
  Hence kweller, carnifex.

VER. 6. Bokkit] Burst forth. Bock properly to vomit, and so used by Douglas. "Vox agro Lincolniens familiaris" (says Skinner) "alludit Hispan. bossar, vomere;" melius a Belg. booken, boken, pulsare.

VER. 8. Rokkit] Shaked. Rock a cradle; agitare, motitare cunas. Douglas 157. 30.

" How that the schyp did rok and tailzeve."

He elsewhere uses rokkand for rolling or tossing. Junius brings it from the Tuton. rucken, trahere, loco movere. But the true origin is from the Islandic krocka, (as also Ruddiman has observed in Gloss. to Douglas) cum impetu quodam moveri. It is ridiculous enough to find Mer. Causaubon going to the Greek oppassing aroppassing, where there is not the smallest affinity of sound. Vide Hick. Dick. Island. in Hrok.

VER. 9. Reid] I suspect it should be reird or rerde, noise or clamour. Douglas, p. 300, v. 30.

"With rerde and clamour of blythness." and p. 37. 12.

"Syne the reird followit of the zounkeris of Troy."

Confer ibid. 324. 25. Ruddiman brings it, with probability enough,

### XXII.

Be this Tam Tailor was in's gear,
When he heard the common bell;
Said, he wald mak them all a' fteir,
When he cam there himfell:

He

enough, from Sax. reord, lingua, fermo, as originally it denoted the clamour of tongues.

#### STANZA XXII.

VER. 1. Gear] Bishop Gibson observes, that gior, in the Islandic, signifies to prepare. True; but that has nothing to do with the word here used. Gear, in our ancient language, denotes all kind of goods and possessions, among which arms were reckoned by our warlike ancestors the most valuable. Primarily it denoted a sheep skin in the Islandic; and as that was the usual garment used by our forestathers, it was afterwards used to signify cloathing in general; and hence armour, as we still say a coat of armour. Vide our remarks on this word, Presace, p. 13.

VER. 3. Steir The English flir, from the A. S. flyran, movere. It is used here for violent commotion, as by Douglas, p. 34. ver. 53.

"But ardentlie behaldis all on stere."

Junius

He went to fecht with fik a fear,
While to the erd he fell;
A wife that hit him to the grund
Wi' a grit knocking-mell
Feld him that day.

XXIII.

Junius has observed the affinity betwixt this and the flupant-  $\zeta \epsilon_{IV}$ , of Hesychius, to stimulate or prick forward. Ulphila has a similar verb, (only compounded) Mark xiv. ver. 5-And—stauridedun tho, they murmured against her; where see the Glossary of Junius.

VER. 8. Knocking-mell] Mell, from the primitive mal, denoting force, power; and hence metaphorically what occasions fuffering, or evil. This is the meaning it carries in the oriental dialects. Thus the Persian mall, denotes anxiety, suffering; moul, patience; malul, disquiet; Arab. mell, patience; Celtic mall, bad, corrupted. But this is not the place for these investigations, which we reserve for our Scoto-Gothic Glossary. Of the same family with our mell, is the Fr. mail, maillet; whence the English mallet. The Latin malleus comes from the same origin.

Our poet here alludes to the large wooden beetle, made use of by our ancestors, to bruise and take the outer husk from the barley, to sit it for the pot, before barley mills were invented. This custom of beeteling the barley, has not ceased yet in some places of the Highlands; and many of the hollow stones, used as the mortar, are still to be seen about our farmers yards, though they are no longer applied by them to the former purpose.

Mellie

### XXIII.

When they had beirt like baited bulls,
And branewod brynt in bales,
They war as meik as ony mulis
That mangit ar wi' mails,

For

Mellie is, by our poets, used for combat, fighting. Life of Robert Bruce, p. 121.

"That men may by this mellie fee."

Douglas has it frequently. Fr. melée; whence the L. B. melleia, and melletum; and, from the Fr. Chaude, mellée, the barbarous writers of the middle ages formed their monstrous calida melleia, as Ruddiman has observed. Vide Cange in Melleia. We have, too, in our old law books, chaudmella. Skene de Verb. Sig. though he knew nothing of the origin of the word, has rightly explained melletum, by strife, debate; as we say that ane has melled or tulzied with ane uther.

Mell is still used in the north for a mallet or beetle, as Ray informs us.

Ver. 9. Felld] From the Isl. fella, to beat down. So the English now apply it to trees, to fell timber. Alam. Fellen befillan. Junius's derivation of this word from velt, a field, is almost as ridiculous as that of Casaubon, who brings it from  $\beta \epsilon \beta \lambda n \mu \epsilon vos$ ; and yet these men were etymologists.

#### STANZA XXIII.

VER. 1. Beirt] Roared and fought with noise, like to that of bulls when baited with dogs. Douglas uses the word bere

for crying or roaring. Bere and birr, according to Ray, fig. force or might; and in Cheshire they say, with and my beer, with all my force. In Scotland too we use this word birr, for might or strength. Hib. Baireadh, quod effertur baireah, denotat fremitum, et bairim, fremere.

In the old English we find beray, berayed with blood or elirt, befouled. Tenton. bern, merda. vid. Jun.

Baited] This word is still in use, though its origin is not so generally known. With Chaucer baye is the stake to which the bear or bull is tied, in order to be baited. Plowm. T. ver. 87.

" As boistous as is bere at baye."

They then pronounced baight, which is now corrupted into bait. Chaucer, ibid. v. 588.

" He shall be baighted as a bere."

The root is the Islandic beita, agitare, incitare. Suio-Goth. bekeya, irretire, impedire. "Proprie dicitur" (says Ihre) "de "illis, quæ cancellis aut caveis inclusa sunt."

VER. 2. Branewod] Roaring like madmen. Braie, fremere, vociferari, barrire, rudere. Hence Fr. braire. βραυως α Hefych. exponit κεκραγυια, vociferans. Lye deduces it from Cambr. brevy, to cry out. Douglas used braithlie for noify, founding.

Perhaps it should be wrote braynewode, and then it will signify mad. Douglas uses brayne by itself in this sense, p. 438. ult.

"Quharfore this Turnus half, myndless and brayne,

"Socht divers wentis to flie out throw the plane."

Brynt] From bræn, ardere; Goth. brinnan; Isl. ad brenna; Aleman. brennan; Sax. byrnan. Hence amber is by the Dutch called bernsteen. Douglas uses brent for burned.

A a Bales]

Bales] Bale, forrow. Isl. bal, bol, malum; bolua, maledicere; boluan, maledictions. Douglas, 408. 2.

" Have reuthe and pitie of my wofull bale." Chaucer, P. T. v. 68.

"Thou shalt be brent in baleful fire."

Gothic baldwyan torquere, Mark v. 7. Ni balweys mis. Do not torment us. Matth. viii. 29. Quhampt hek faur mel balwyan unsis? Art thou come to torment us before the time? Now Junius (ad voc.) properly observes, that the torment spoken of in the New Testament is always represented as by fire; hence the origin of the As. beel, rogus; Island. baal, incendium. Had we room here, we could prove hence the origin of Beltyne, the solemn fire kindled by our ancestors in May, at which time the Celts began their year. Vide Macpherson, Ant. p. 164. Smith Gaelic Ant. p. 31. Pennant's Tour, p. 94. From tine comes tinder, somes; Alaman. zundere, item tundre.

VER. 4. Mangit] Ramsay interprets it maimed with carrying; Gibson reads recaried for mangit; Douglas sometimes writes it menzeit, consounded, marred, maimed. Thus of Andromache fainting, p. 78. 15.

" to the ground all mangit fell echo doun." and 440. 27.

" Bot then Turnus half mangit in affray."

Ruddiman brings it from S. mangzie, or manzie; Fr. mehaign. Hence, too, our maim, per contract. In our old lawbooks it is written mainzie. Reg. Majest. l. 4. c. 3. "He quha is accusit in sic pleyes, may declyne battle, be reason of an manzie, or of his age." From mainzie, the writers of the middle ages formed the barbarous Latin term mahamium; though

For faintness that for for fails fell down lyk flauchtir fails;

Fresh men cam in and hail'd the dulis,

And dang them down in dails

Bedeen that day.

XXIV.

though Ruddiman erroneously derives our word from it. Charta Henrici 2do. "Hæc omnia concessi cum murdro, et morte hominis, et plaga, et mahaim, et sanguine." Charta Philip 3. Req. Fr. ann. 1273. "Quod percussus membrum amitteret feu vitam, vel etiam mahainium incurreret." Plura vide ap. Cange, in Mahamium.

Mails ] Burdens.

VER. 5. Forfochtin] Wearied with fighting. G. We observe here, that in the Gothic dialects, and all its daughters, the particle fore, or for, increases the signification. Thus hindre, forhindra, impedire; minska, forminska, minuere; and often imports a worse meaning than the original word. Thus rakna numerare; forakna, sig. to err in the sum. Gora, sacere; forgora perimere. Arbeta, laborare; for arbeta sig. to overlabour one's self. Hence too Engl. done, foredone; sworn, forsworn. In the Latin, per and præ have a similar meaning. So oro, peroro; facio, persico; potens, præpotens, &c.

VER. 6. Flaughtir fails] These are the thin sod pared off the green surface of a field, with the instrument now called a breast plough, but anciently a flaughter spade, which, as it were, flays the soil; from the Island. ad flàa, excoriare, cutem detrahere; Dani flae; A. S. besta, excoriatus. Hence too A a z

flakes of fnow, from their broad thin shape. Sax. flacea, slocci nivis. Alludit, Gr. 200106 cortex, and 200106, corticem aut pellem detraho; Sax. flean, to slea. Confer. Jun. Etymol. in fell. Ray says, that the surface of the earth, which they pare off to burn in Norsolk, is called flags. This fort of siring is still common in all the moorish countries of Scotland. The word sale or feal, turs, cespes, is found in Douglas's Virgil; and Ruddiman thinks that feal is only a contraction of fewel, as being a common kind of siring in Scotland.

VER. 7. Hail'd] To hail, Scot. is a phrase used at sootball, when the victors are said to hail the ball, i. e. to drive it beyond, or to the goal; and as they may thus be said to cover the goal, it may, perhaps, come from the Isl. hill, tego; hulde, texi; as this from the Gothic huljan, tegere, operiri. Matth. viii. 24. Gahulith wairthan fram wegim, Covered with the waves. Hence hell is called by Ulphila halje; as theol, hell, from helen, tegere, occultare. Thus heal in old English signifies to conceal, from Sax. helan celare. We call the huss of corn the hull, from the same origin. In Northumberland a swine hull, a sow house, or swine stye.

Duiles] The goal or boundary of the course. We imagine it comes from the Island. duel, moror, the stopping-place to which the ball was to be driven by the victorious party. Dualde, moratus sum; duel, mora. Hence to dwell, or make abode.

VER. 8. Dang] Perf. from ding, eedere, detrudere, to beat down, "Haud dubie," fays Lye, "ab Hibern. dingim, of pellere, urgere." Douglas 229. 52.

Teuton. dringen, from ding, dint, a stroak or blow; Sax. dynt, ictus. Infra St. feq.

<sup>&</sup>quot; --- and with hir awin handis

<sup>&</sup>quot;Dang up the zettis ----"

#### XXIV.

The bridegrom brought a pint of aile,
And bade the pyper drink it.
Drink it (quoth he), and it fo staile;
A shrew me, if I think it.

The

" For he durst ding nane addir."

Dails In parties, eight or nine together; from Sax. dal, a part or portion. Gib.

Vide Luke xv. 12. Be dale, ex parte. Greg. Dialog. ex Verf. R. Alfredi, 2. 23. Sume dal. partim. Thus too Chaucer uses it, Prol. to W. of B. Tale:

"But she was fome dele deaf, and that was skaith."

Hence dælan, dividere, Luke xxii. 17, to give alms; dæled, divisus.

VER. 9. Bedeen] or bedene; for thus it is wrote by Douglas,

- "Werpe all thir bodyis in the deep bedene." And
- " How Æneas with the rout bedene."

This word is common also to the old English writers; Rud diman brings it from Germ. bedienen, præstare officium, q. d. assoon as desired.

#### STANZA XXIV.

VER. 4. A shrew me] So it stands in Gibson's edition. It should undoubtedly be read bestrew me, a very common phrase

The bride her maidens flood near by,
And faid it was ha blinked;
And Bartagafie, the bride fae gay,
Upon him faft fhe winked,
Full foon that day.

# XXV.

When a was dune, Dik with an aix

Came furth to fell a fudder.

Quod he, quhair ar yon hangit fmaiks,

Richt now wald flain my brudder?

His

phrase all over South and North Britain in the fixteenth century.

Though I have not Lord Hyndford's M. S. at hand, yet I do take this whole stanza to be an interpolation. It is not found in Ramsay's edition; and the language has something more modern in it than the rest of the poem. Bartagasie, a name (as far as I can learn) unknown in Scotland, strengthens the conjecture I have formed, that it is spurious. Whence the Bishop got it, I cannot say; but the whole of his orthography is so faulty and modern, that it appears he was but moderately acquainted with our Scottish idiom; and this has probably led him to think this stanza genuine, and to commit many errors in his notes on the poem itself.

### STANZA XXV.

VER. 2. Furth Gibson reads out; but we judge this the true reading, as it adds another letter to the alliteration of the verse;

verse; an ornament, or rather jingle, our old poets were very fond of.

Fudder] A load, a great heap. Gibson writes it fother. Ray says it is commonly used speaking of lead, and expresses 8 pigs or 1600 weight. But fudder certainly means a cart load. Germ. fuder, et hoc fortè (says Skinner) a Teuton. fuehren, vehere, ducere. And this seems the true meaning of the word in this passage, though Ruddiman will have us to seek it in Hib. fuidhre, a servant or valet. We find futhir used by Douglas to signify a trisse, or thing of no value, p, 311.29.

# "I compt not of thir pagan goddis ane futhir."

But this has no connection with the other, nor are we to confound with it foder, fignifying beafts meat, from foda nutrire; nor the Gothic fodr, fignifying the sheath of a sword, used by Ulphila, John xviii. ver. 11. Hence A. S. fodder, boge foddr, a quiver, perhaps, because the first quivers and sheaths for swords were made of skins, as foder sig. vellus, pellis; Fr. feutre; Lat. barb. fodrum, de quo vid. Cange; Germ. futher; Angl. fur; confer. doctist. Ihre Lex. vol. 1. p. 511, 512

Ver. 3. Smaiks ] Smaik, filly, pitiful fellow. Douglas, 239. 38.

## "Quod I, Smaik, lat me slepe ---."

From Teuton. fchmach, contumelia. Belg. fmade. id Teut. schmachlich, contumeliosus. The root is the Isl. fmaa, to contemn; Eg fmaae, I despise; fmaa, fmaar, little, fmall, better pronounced, and nearer to the original, by the Scots sma; Goth. fmal, gracilis, tenuis; fmalna, gracilescere. Hence fmale denotes the smaller cattle, as sheep and goats. Alam. call sheep, smallfecho. The ingenious etymologist Ihre thinks

His wyfe bad him gae hame, Gib Glaiks,
And fae did Meg his mudder;
He turn'd and gaif them baith their paiks,
For he durst ding nane udder,
For feir that day.

thinks the Greek unda, sheep, is nothing but the Gothic term wanting the s. Smada, contumelia afficere; smadeord, convicia; Belg. smaeden, smadden, deturpare. And hence the words smutsa, smeta, smitta; unde Angl. smitch, and our fmit, to infect or defile. In the parent dialect we find smarede, reculæ, minoris momenti res; smaher, vile, abject. Alfred. lib. 1. cap. 25. 10. Smaher scale thin, Vilis servus Isl. sma bluter, res viles; smæcka, minuere. Findur Norr. ap. Ihre in voce. Toku swa riki ad smæckast, Incipiebant regna tum minui. Hence the true idea of the name given to Magnus, fon of Eric king of Sweden, called in derifion Smæk, not (as it is generally rendered) blanditiis delinitus, flattered; but denoting a weak, contemptible fellow, who allowed the whole province of Scania to be taken from him by the Danes, and thereby fmeckad, diminished his hereditary kingdom, contrary to the oath taken by the kings of Sweden when crowned. Vide Locceni, Hist. Suet. p. 106.

From this word fmacka, the barbarous Latin writers formed fmaccare, to mutilate or main, de qua vide Cange Gloss.

VER. 4. Wald flain] For would have flain. Gibson reads, that hurt my brother.

VER. 5. Ghicks] An idle fauntering prattler. Glaffe, or glave, is fmooth, according to Ray. Hence glavering is used for flattering. In the Cheshire dialect glaver, to flatter; A. S. gliwer, scurra, parasitus; a gliwan, scurram agere, smooth.

Island.

Island. glar mare, from its clearness; and gler, vitrum Hence Fr. glaire d' un œuf; white of an egg; and Angl. giare. Confer Jun. Etymol. in glayre.

VER. 7. Paiks] Blows, repeated strokes. Angl. paice, verbarare. I shall well paie him, I'll beat him. This is not to be confounded with pay, solvere debitum. Jun. derives paie from Greek rates, verberare; but the true etymon is from Cambr. pwyo, ferire, pulsare, percutere. In looking into the learned Ihre's Lex. we find pak, susting; and hence perhaps we have paik, to beat with a cudgel. Pezron Celt. Ant. takes notice of bach in the Celtic, sig. susting. The Ang. Saxons, changing c into t, say bat. Fr. baton. Our most ingenious etymologist observes, that it is more than probable that the ancient Latins used bacus for a slick or pole, from the diminative baculus, still in common use.

We have thrown these notes hashily together, they being only meant, (as well as those on the Gaberlunzie-Man) as a kind of specimen to a Glossary of the ancient Scotish language we intend, at some future period, to publish, provided those who are the proper judges of such an undertaking, shall deem such a work useful for promoting the knowledge of the antitiquities and language of our country.
